

Welcome to London, 1886
Our Story Begins

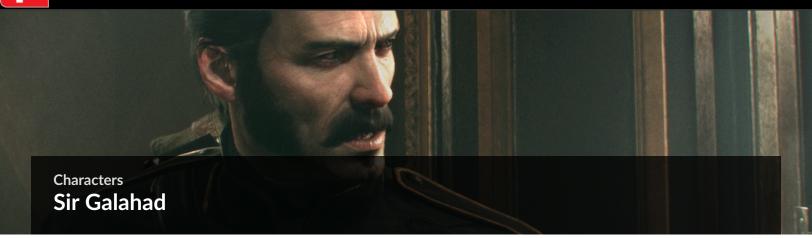

1886

This innovative and truly compelling alternate take on history is set in Victorian-Era London, in a time when the Industrial Revolution has changed the face of the world. Electricity runs throughout the city of London, a newly formed underground train system serves its districts, while Airships patrol its skies. At the heart of *The Order:* 1886 is an age-old war between Man and Half-Breed. Over the centuries, one of the Half-Breed races known as the Lycans, has taken a foothold throughout Europe. They are an intelligent but savage people who have proved a ruthless foe against mankind. In Arthurian times, the Knights of The Order were assembled to protect humanity from this threat. Thus Knights and Lycans have been fighting for centuries.

By 1886, advances in technology by inventors like Nikola Tesla have given humans an advantage in this war. Equipped with powerful weapons such as incendiary Thermite rifles and electrical Arc guns, The Order is steadily turning the tide against the Half-breeds. But a new threat is rising in London—a populist rebellion, rooted in the "sunken classe" of the gritty, downtrodden streets of Whitechapel.

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

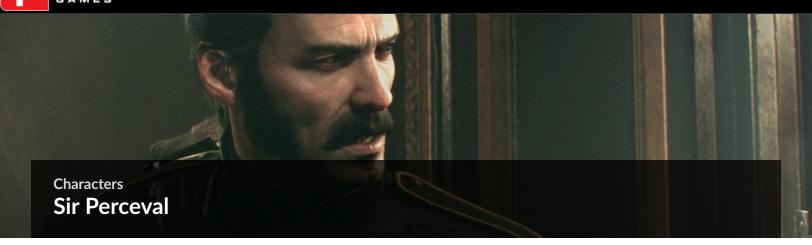

You play as Sir Galahad, a Knight of great principle, a highly skilled warrior, and a brutally efficient soldier when necessary. Galahad deeply values The Order's mission and legacy. An expert Lycan tracker and hunter, he has learned much from his mentor, Sir Perceval, skills that he's passed on to his own protégé, Lady Igraine. Galahad's birth name is Grayson, a name only a close few use to address him.

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

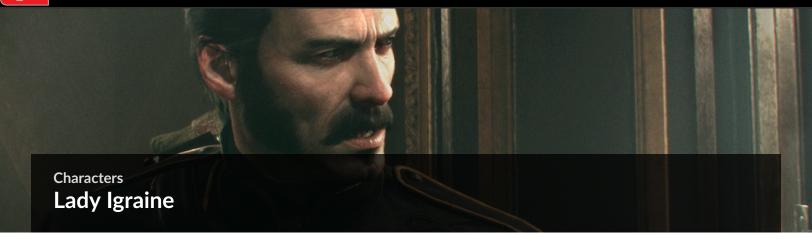

Sir Perceval was born Sebastien Malory, and is said to be related to Sir Thomas Malory, the 15th century author of *Le Morte d'Arthur*. He's one of the oldest and most respected Knights of the Order. As mentor to Sir Galahad, Perceval has imparted centuries of wisdom upon his disciple. Their respect and trust in each other have proven strong, likened by others as the bond between two brothers. Perceval is more than willing to ignore the directives of the Council of Knights, and trust his own instincts honed over centuries of dedicated service.

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sonv Computer Entertainment Europe. All rights reserved.

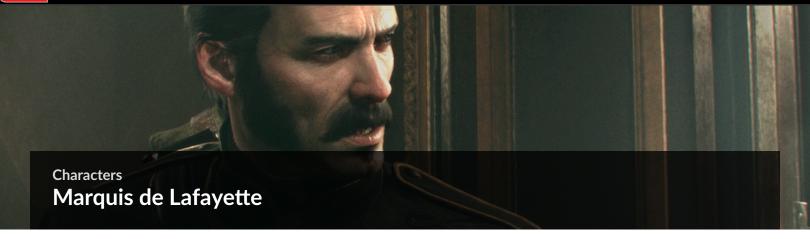

Lady Igraine is a talented Knight, the youngest member ever to be elevated into The Order's ranks. Her skills rival even Galahad's, her mentor, and she never passes up the opportunity to point this out. But their banter also reflects the affection they share. Igraine is the adopted daughter of the Lord Chancellor, Augustus d'Argyll, and sister to Sir Lucan. Igraine's given name is Isabeau or Isi, as she is affectionately called by some.

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

Lafayette is a Knight Apprentice and is disciple to Sir Perceval. A brilliant tactician during the world-changing revolutions in America and France in the previous century, Lafayette is known for his impetuous genius, his sense of humor, his passion for liberty, and his love of women. He brings a different perspective, a worldly experience, and perceived youth that strengthen Sir Perceval's already formidable squad.

Characters The Lord Chancellor

The Lord Chancellor is said to have fought side by side with King Arthur himself back in the day. Now, as arbiter of the Council of Knights, he remains a steadfast protector of The Order's sacred mission. His authority remains unchallenged, though it is questioned at times by Sir Perceval, who views the Lord Chancellor's cautious and conservative approach too antiquated for current affairs.

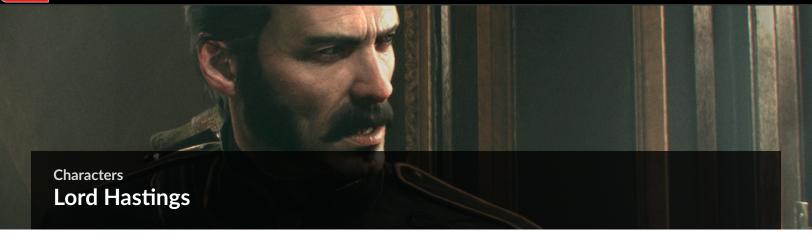

Alastair D'Argyll, known as Sir Lucan, serves as The Order's Knight Commander. He is the adopted son of the Lord Chancellor and brother to Lady Igraine. Lucan is forthright and steadfast, and tends to play by the rules. But his respect for Sir Perceval induces him to allow Perceval's squad to pursue their investigation of odd happenings in Mayfair and Whitechapel.

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

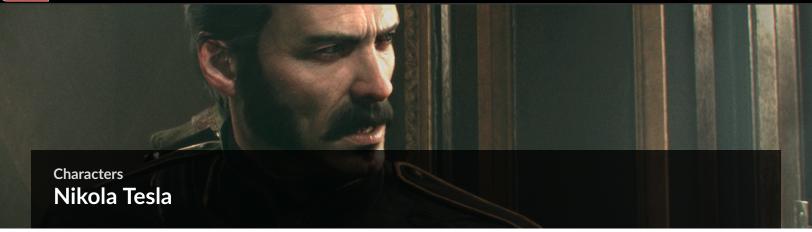

Lord Hastings is a peer who serves in an advisory role, as do a few others within the government, to the Council of Knights. He also serves on the board of the United India Company as its director. This nexus of commerce and politics affords him great influence and trust within the monarchy.

A young and brilliant mind, Nikola Tesla serves as the Order's Quartermaster. He brings with him a wide range of expertise and a skillset he has put to use at the service of the Knights. His laboratory in the Catacombs beneath Westminster Palace is home to many inventions and weapons that have proved invaluable in the war against the Half-Breeds.

Game Basics Overview

First things first: read the game manual! Everything you need to know about basic game mechanics in *The Order*: 1886—game controls, options and settings, the HUD (heads-up display), how to use specialized weapons, and so forth—is detailed in the manual. Our basics section focuses more on how best to play the game.

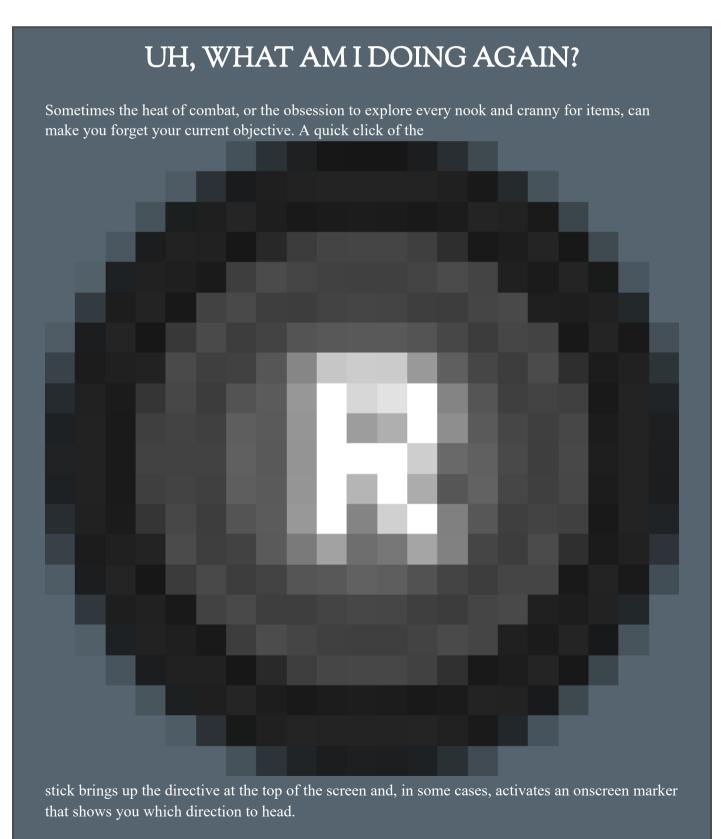

That said, let's start with a diagram of the PS4 controller and lists of the menu, movement, and combat controls. It never hurts to have an additional reference source.

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

Game Basics The PS4 Controller

The Story Structure

CHAPTERS & SCENES

The story in *The Order*: 1886 is divided into a prologue and sixteen chapters. Each chapter is further divided into a number of scenes. All of the scenes you've completed are listed underneath their chapter's title when you scroll to it in the Chapter Selection screen. Then, if you want, you can scroll down to select any scene listed and replay it.

Note that "scenes" are not the same as "checkpoints." For more on checkpoints, read on.

CINEMATICS ON DEMAND

Some scenes are dedicated to certain key cinematics, allowing you to jump right to—or past—them, depending on your preference.

CHECKPOINTS

Most scenes feature regular checkpoints. These mark natural restart locations if Galahad gets killed or you just want to try a different approach to your current situation but don't want to jump all the way back to the scene's beginning. For example, if you leap off a wall into a courtyard full of enemies, that leap is very likely a checkpoint. If the battle goes poorly or you want to try different tactics, press Options and select "Restart From Checkpoint." You jump back to the last checkpoint you passed—in this case, the leap from the wall into the courtyard.

Game Basics Movement & Exploration

The Order: 1886 is not an open-world or "sandbox" game where you move freely in any direction, triggering interactions in random orders. While you can make certain navigation choices, for the most part you experience the story along an intricately constructed path. It's a story-driven, filmic experience with great gameplay.

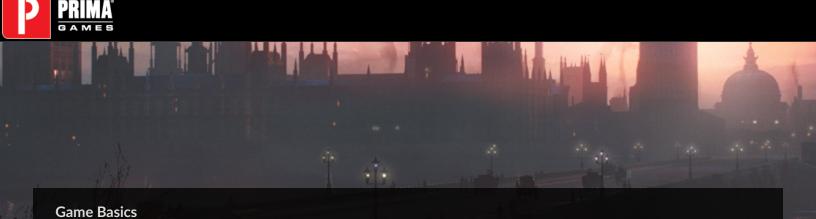

However, there is plenty of exploration to be done along the dark edges of the path. The game features dozens of clue-like items planted to enrich the narrative and hint at murky corners of a London obsessed with Ripper murders and fears of class warfare—and the ride itself is full of physical surprises too. What looks like a dead end may actually be a climbing wall with some unconventional handholds leading to unexpected places.

TRAVERSING

Progress in the game often calls for use of the button (called the "Traverse" button) in conjunction with the left stick. You use this combination as you jump, swing, hurdle, and climb across the dense jumble of London's cityscape in pursuit of foes and answers. Traversing can also lead you to collectibles stashed on rooftops or tucked into rooms just off the main path.

INSPECTING ITEMS

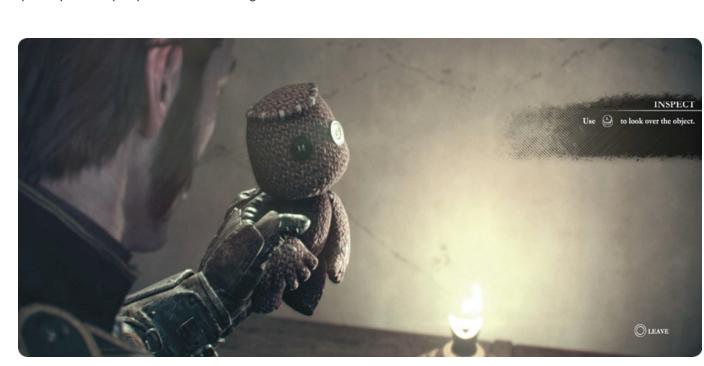

Collectibles

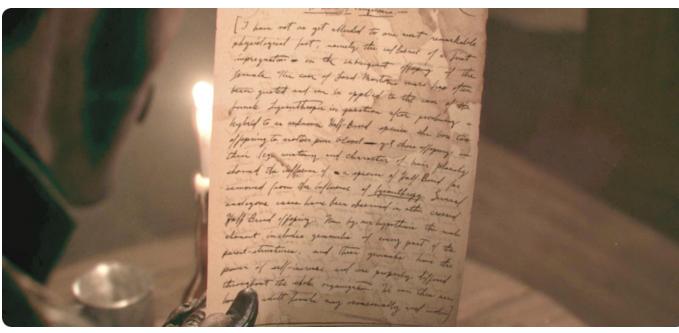

As you explore, look for a number of items that you can pick up and inspect. Newspapers, objects, photographs, and documents are scattered throughout the environment. Each inspectable item is marked with an action icon that changes into a prompt when you get close. Press to pick up the item.

Documents and photos can be turned over to their back side by pressing —sometimes you find interesting things there. Objects can be "looked over" (moved around) using the left stick. When finished with your inspection, press to put down the item.

Note that the game logs every inspection. You can earn Trophies for inspecting all of the items in each collectible category: Objects, Newspapers, Documents/Photographs, and Phonograph Cylinders. You also earn a gold "Inspector First Class" Trophy if you inspect every inspectable item in the game.

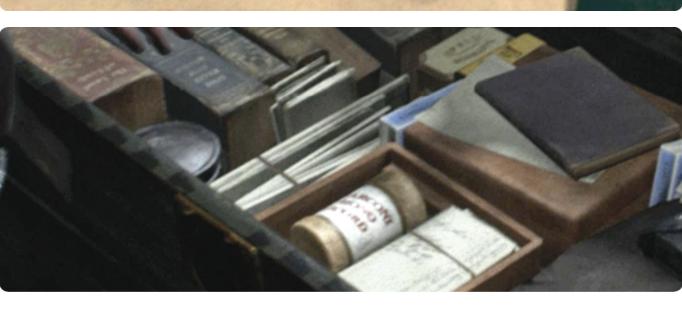

COLLECTING PHONOGRAPH CYLINDERS

Try to collect all 16 of these glinting phonograph cylinders labeled "Marconi Phono Record." Most of them sit out in the open atop tables or desks, but a few are stashed inside cabinets, drawers, or locked chests.

To collect a cylinder sitting in plain view, just approach it until a prompt appears onscreen and then press that button. Galahad grabs the cylinder, its name appears on the right side of the screen, and the recording is added to your Archive.

If a cylinder is stashed in a drawer, cabinet, or locked chest, the place is marked with an action icon. Approach until the icon turns into a prompt and press that button. If it's a cabinet or drawer, Galahad opens it and grabs the cylinder. If it's a locked chest, Galahad takes out his blade and pries open the lid. (You may have to participate by rapidly tapping until he gets it open.) When the lid finally opens, Galahad collects the cylinder.

to earn Trophies, so play however best suits you!

Order" is a trademark or a registered trademark of Sony Computer Entertainment Furone. All rights reserved

All collected phonograph cylinders are added to your Archive. To listen to the recording and/or read a transcript, press Options

and select "Archive." Scroll to any recording to bring up its transcript to the right. Press to listen to the recording.

UP FOR A CHALLENGE? The game defaults to "Medium" difficulty, but if you are finding it too easy or too difficult, you can

pause the game with the Options button and change the difficulty within the "Game" section of the "Settings" menu. Your difficulty settings take immediate effect and have no impact on your ability

Game Basics Using Gadgets

STAMFORD LOCKPICK

Several times during the game you encounter locked security doors. You can't just ram these open with a shoulder. The only way to get past reinforced doors is to use your handy Stamford Lockpick tool.

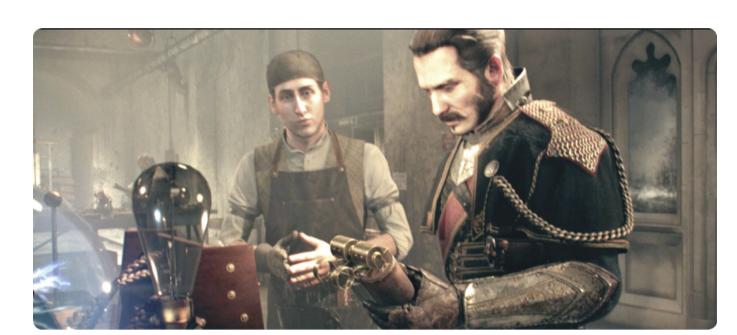

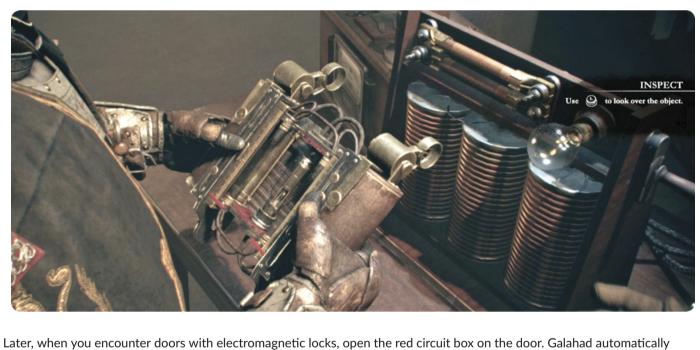

Here's how:

- Approach the security door and press . Galahad automatically inserts the lockpick in the keyhole. This gives you an x-ray view of the lock's inner workings.
- Hold in to drive the air cylinder, which exposes the first of three tumbler pin positions. You can see the first pin as a ghostly white rod on a spring (circled in our shot).
- then slowly rotate the right stick until the vibration in your controller slows down. (If you toggled Keep holding in Vibration off in your game's option settings, watch onscreen for the tumbler pin to be pushed upward and turn brighter
- to engage the pin. It clicks upward, out of the lock housing. • When this happens, press
- · Now you have two more tumbler pins to go. Repeat the same process with each of the remaining pins to unlock the door. Press again to turn the lock, which slides the metal lockbars out of their slots. Open the door and enter the next room.

TS-27 INVERTER/RECTIFIER

In The Order: 1886, a few doors and hatches have powerful electromagnetic locks. The only way to disable such a lock is to disrupt its power supply. Fortunately, you have Nikola Tesla on your team. At the end of Chapter II, Nikola gives Galahad his latest invention, a TS-27 Inverter/Rectifier device that converts currents. As he explains, "Quite handy for overloading and incapacitating certain electrical systems."

hooks up the TS-27's brass clips and you get the TS-27 interface.

Game Basics
A Knights Specials

BLACKWATER

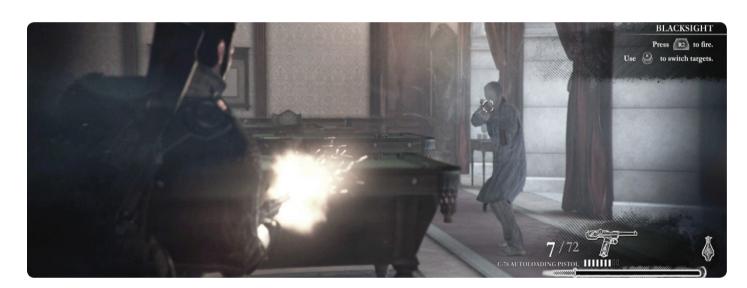

Blackwater is the mysterious Holy Grail fluid that instantly heals wounded Knights and prolongs their lives for hundreds of years. Every Knight has a personalized flask of Blackwater kept on a chain around his or her neck.

If Galahad takes too much damage he collapses to the ground in a downed state, unable to do anything but crawl slowly. Be ready! After a few seconds the prompt appears. Immediately press the button: Galahad drinks from his flask of Blackwater and recovers.

Don't stop there! When the prompt subsequently appears, tap that button rapidly to increase both Galahad's health and his Blacksight meter.

BLACKSIGHT

Blacksight is your Knight's near-supernatural ability to slow down the world while letting you auto-target enemies and shoot your secondary weapon at full speed. Press to activate it. Your targeting reticle immediately auto-centers on the closest target, so quickly pull to fire.

When the reticle turns red, that targeted foe is taken out. Quickly push the right stick toward the next target. The targeting reticle instantly jumps and auto-locks on him. Shoot again!

This all happens very fast, so you can take out a number of enemies quickly. But Blacksight is a timed state, available for just a few seconds. How much Blacksight you have left is shown on the meter bar beneath your weapon info at the bottom right of the screen. This bar starts emptying the moment you activate your Blacksight. Don't waste it! Keep shooting and toggling to new targets until the meter runs out.

CONSERVING BLACKSIGHT

If you clear the area of enemies before your Blacksight meter runs out, press Q again to deactivate the ability. Whatever's left on the meter is conserved.

The Blacksight Meter

The white segment of the bar shows how much Blacksight is left; when no Blacksight is available, the meter's bar is gray. Note that Blacksight cannot be activated if the meter hasn't filled past the hashed area at the left of the bar.

BLACKSIGHT GENERATION

Taking out enemies during regular combat refills your Blacksight meter.

checkpoint restart.

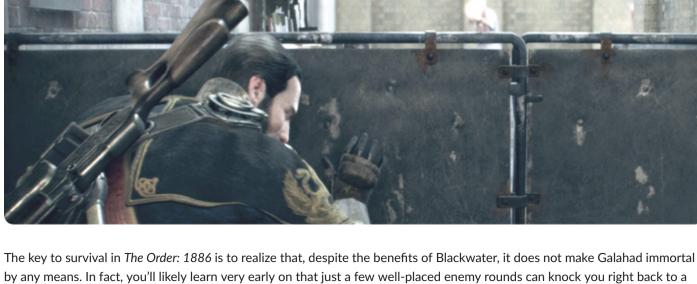

Combat Tips & Tactics

core experience of the game is some pretty heated combat employing a variety of weapons, foes, and environments. With the help of the Ready At Dawn team, we've put together a quick list of tips and tactics that can help you fend off rebels,

With a character-driven story at its heart, The Order: 1886 offers a compelling narrative framework for its gameplay. But the

lunatics, and Lycans alike. But before we get to our list, let's start with what we consider Our Tip Of Tips.

THE IMPORTANCE OF COVER

Thus the most important combat tactic you employ regularly is finding and using cover. During combat sequences, whenever you enter a new area—a plaza, street, room, hallway, or passage—make it a habit to immediately scout out good cover locations before you proceed. If you take fire, dive into that cover! As you take down foes, advance carefully from cover to cover, taking their shooting angles into account as you go.

Learn how to refine your aim more safely from cover, as well. When you press to aim, Galahad pops out of cover and the to drop back into cover. As targeting reticle appears onscreen. Adjust your aim quickly towards a target and then release

long as you don't adjust Galahad's position, you'll aim at the exact same spot when you press again. Learn how to do this dance rapidly. This method of refining your aim then dropping back into cover will serve you well, minimizing damage from enemy fire—especially if your foes are accurate shooters, e.g., snipers.

Remember that Galahad automatically regenerates health over time. If you take a few hits and the screen reddens (indicating

damage inflicted), find cover and stay put until the screen brightens again.

Tips on Using Cover To peek over short cover and around any unobstructed edge of cover, simply hold the Left Stick toward the cover. To peek out from an edge, hold the Left Stick toward the edge. Peeking gives you a better view of the battlefield while

providing minimal risk to you. It is particularly helpful for getting a better aim approximation for blind-firing.

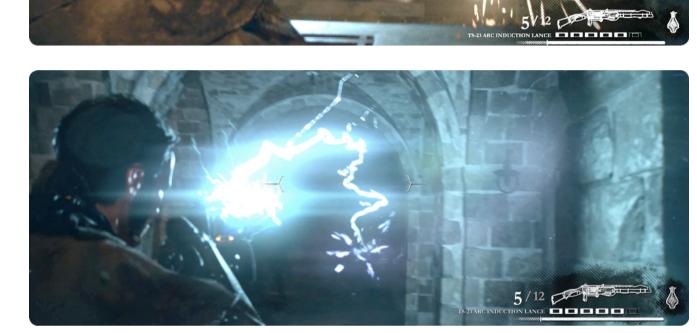

• You can move around the unobstructed edge of a piece cover in several ways. If there is more cover around the corner,

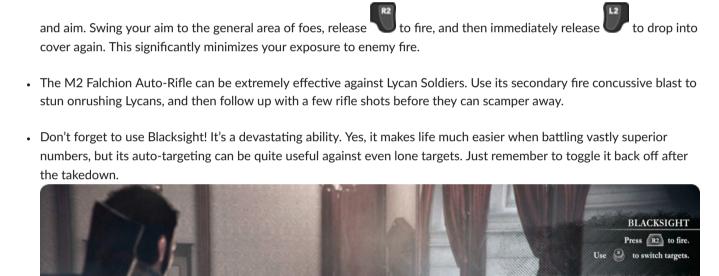

- you can hold the Left Stick toward the corner and then hold to slip around the corner while staying in cover. Holding the Left Stick the same way, you can tap W to slip out of the cover into a jog or hold U to exit into a sprint. • You can also hop over short cover. Simply hold the Left Stick toward the cover and then tap 💟 to vault over the cover.
- This maneuver can be very useful for quickly getting past wide pieces of cover. • If you're at the edge of a piece of cover and spot another piece of parallel cover that is aligned with your current cover, hold the Left Stick toward the new cover and tap w to quickly scurry over to it while staying low and protected.
- When you exit cover by backing away from it with the Left Stick instead of tapping W, you enter "soft-cover" mode. While in soft-cover, Galahad stays low and automatically slips into any cover that you steer him into. If you move too far away from any actual cover, start sprinting, or tap W, you exit soft-cover. Fortunately, aiming and hip-firing allow
- you to retain your soft-cover state (though you stand the entire time you hold \P to aim). This is very helpful for cautiously moving from one piece of cover to the next.

TIPS LIST · Use the Thermite Rifle to attack enemies hiding behind cover. Just fire the cloud above them and ignite it with your Alt/Fire flare to rain thermite down on foes you couldn't hit with other guns.

while behind a barricade, and then press

• Charge up the Arc gun's shot while safely in cover. Hold in

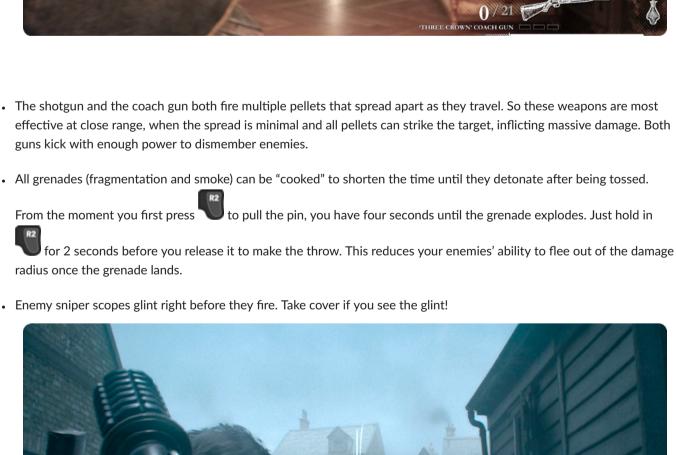

C-78 AUTOLOADING PISTOL · Many players tend to hold onto their Blacksight until the end of a chapter. Use it freely and often when available. Your

· Mixing Blacksight with the C-81 Maschinenpistole as your secondary weapon creates an overwhelming hail of fire that

Blacksight meter refills fairly quickly during combat as you score kills.

can swiftly tear an enemy platoon apart. It's also a good combination against Lycan attacks.

- yourself at minimal risk. It's not very accurate, but at close range it is quite effective, and is a good way to give yourself covering-fire in preparation for relocating to new cover.

damage from other enemies while performing a melee attack, and moving into the appropriate range can be quite risky. Fortunately, being in cover doesn't inhibit your melee capabilities. Galahad simply reaches over or around and takes them down, allowing you to take a more protected route as you close in for the kill. Lastly, Heavies, thanks to their sturdy armor, simply aren't vulnerable to your melee attacks; the button prompt doesn't even appear. If you linger near an enemy for too long, they try to strike you, dealing a sizeable amount of damage. Finish them before they finish you! · During the game's stealth phases, enemy guards patrol in repeated patterns. To avoid having a stealth target unexpectedly turn and spot you, stay in cover and observe his pattern until you learn his stops and turns.

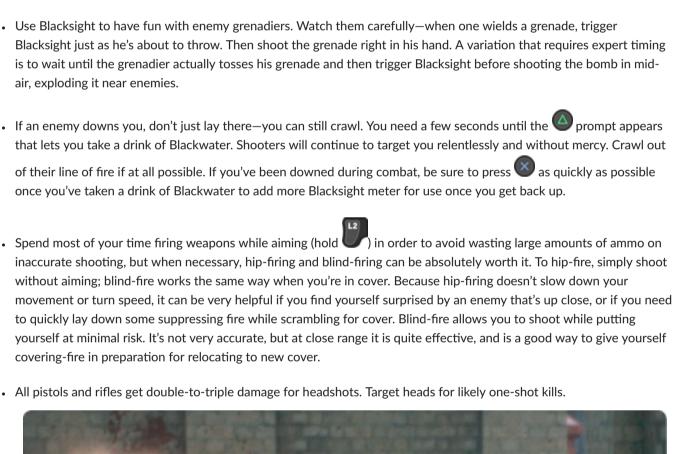

• Galahad is ruthless in close-quarters combat, employing impressive fighting skills to quickly incapacitate foes. When

you're close to an enemy, a 🎱 prompt appears. Press it for a quick, guaranteed takedown. Be careful! You can still take

Shoot those red barrels! In tough fights, you'll often find highly explosive powderkegs sitting in strategically important locations—next to a particularly tough enemy Heavy or Leader posted on a high balcony, for example, or near a cover spot where multiple foes have taken up firing positions. When detonated, these barrels deal immense damage to anything nearby, so you can make a single bullet pay huge dividends.

but if you're too late (or significantly early), you may find yourself in trouble.

Performing melee attacks while sneakily infiltrating is similar to melee during open combat, but requires more precise timing. Don't run while approaching an enemy from behind. You have better control of the strike when you approach slowly. Wait for the pulsing outer ring to meet the center, causing the prompt to flash. Right as this happens, press the button to perform a silent takedown. If you miss-time your strike a little too early, you won't have as clean of a kill,

- guns kick with enough power to dismember enemies.

One of the most striking elements of *The Order:* 1886 is its array of imaginative weaponry that melds 19th century aesthetics with modern lethality. Once you've wielded an Arc Induction Lance, nothing else will ever feel quite adequate. Special thanks to our friends at Ready At Dawn for the stats and commentary they provided for each weapon.

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

DAVIES MK I SERVICE REVOLVER

Pistols

Fighting with this weapon

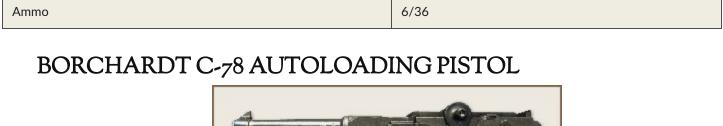

This Mk I Service Revolver works best at close range in patient hands. While its rate of fire and accuracy are less than that of

the C-78 Autoloading Pistol, it is demonstrably more powerful. A single round staggers most opponents, giving you plenty of time to follow up with a second, killing shot—two bullets is usually all it takes! Because of its short barrel and somewhat diminished accuracy, it's not recommended to attempt precision shots with this weapon. Instead of taking your time with

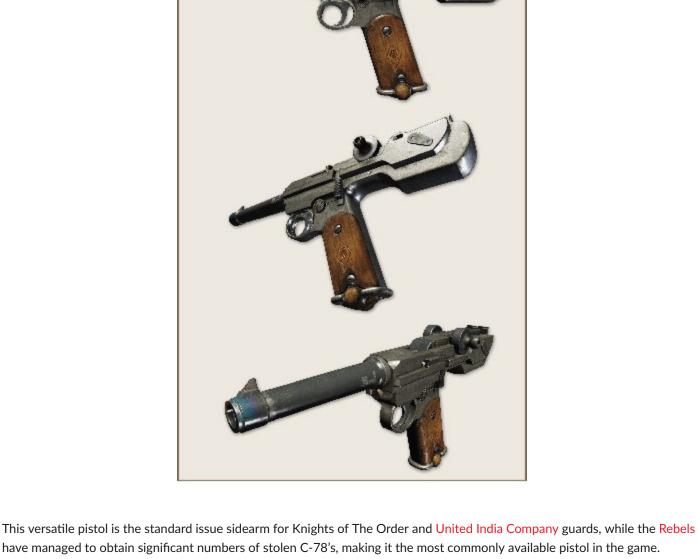

Shotgunners. Hit them once to stagger them, allowing you to safely move in for a melee takedown while they're still reeling. Fighting against this weapon As a Knight, this weapon poses a fairly minimal threat at range. However, if you're already badly wounded, a single shot from a Mk I Service Revolver can be all it takes to finish you off! Additionally, large numbers of foes with this weapon can deal a

headshots, try aiming for two easy shots to the torso to dispatch foes quickly. It can also be useful for dealing with encroaching

STATS

surprising amount of damage, especially if you stay exposed out of cover for too long.

Surprisingly accurate, the C-78 can be effective even slightly past mid-range, while its impressive rate of fire allows it to be dangerous at close range (though often at the expense of ammunition). As such, the key to using the C-78 effectively is knowing how best to treat it at any given range:

· Close Range: Forgo precision (even to the point of relying on hip-fire instead of aiming) while pulling the trigger as fast as possible to lay down an impressive barrage of fire...as long as you land at least three of your nine shots, you'll come

Fighting with this weapon

out ahead against most foes. • Mid-Range: This is where the C-78's accuracy truly shines! Take your time to aim for headshots and you can become a methodical killing machine that never has to worry about ammunition. Even if you miss, you have a large enough clip to make multiple follow-up attempts.

- Long Range: While the C-78 can still down foes at this range, it starts to lose power and can't reliably land headshots. If possible, close the gap or use something better suited to the distance.
- Fighting against this weapon

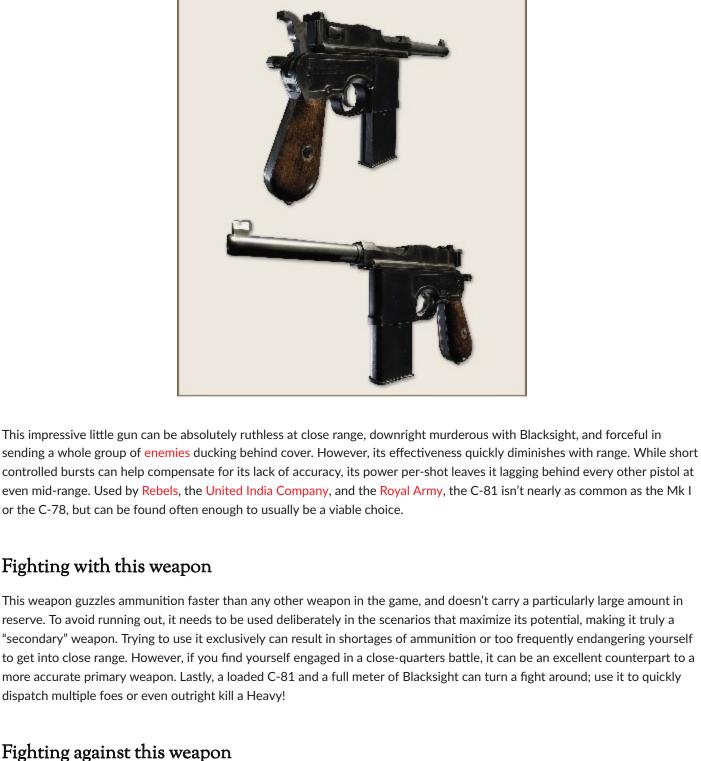

Similar to the Mk I Service Revolver, an individual C-78 isn't a particularly big threat to a Knight. However, between their rate of fire and accuracy, a group of them can be quite damaging at mid-range. Furthermore, if you're too close to a foe, they try to unload their entire magazine into you as fast possible. If they all hit, it's more than enough to make you have to reach for your

FEEDERLE C-81 MASCHINENPISTOLE

Blackwater.

Weapons

Long Arms

ESSEX M82 SELFLOADER CARBINE

This common rifle can be found in the hands of Rebels, United India Company guards, and the Royal Army. Accurate and powerful, it can be deadly in the hands of a skilled shooter.

Fighting with this weapon

In many ways, the M82 Selfloader Carbine can be thought of as a "big brother" to the C-78 Autoloading Pistol: it is more powerful and more accurate, able to stagger most enemies with a single round and kill them with a second, but it is also slightly slower and doesn't hold quite as many rounds as the C-78. As such, it requires a bit more care when being used at close range, but it is also more effective at mid-to-long ranges. Specifically:

- · Close Range: Use your first shot to stagger the target, giving you plenty of time to recover from the sizable recoil and line up a clean second shot. A torso shot will suffice for anything less than a Shotgunner. If you're extremely close, try aiming the first shot low to account for the recoil, allowing the second shot to hit home immediately after.
- Mid-to-Long Range: At mid-range, the M82 can be extremely effective for scoring clean headshot kills. At longer ranges most enemies won't be able to accurately return fire, allowing you to methodically land pairs of torso-shots to pick them off one by one.

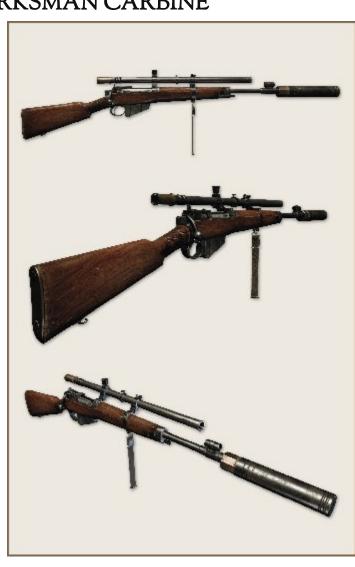

Additionally, the M82 is common enough that it is almost always a safe choice as a primary weapon; you most likely won't have to worry too much about ammo.

Fighting against this weapon

In enemy hands this weapon can be surprisingly damaging as they lay down slow but steady fire from afar. A group of Soldiers armed with M82's can take you down quickly if you don't stick to cover. Fortunately, their aim is somewhat diminished by the unwieldy rifle when you get close, but if you get too close they'll forgo aiming to pump rounds into to you as fast as possible; it takes only five rounds to incapacitate you.

STATS	
Ammo	6/60

ESSEX M84 MARKSMAN CARBINE

afar then this is your weapon.

Used exclusively by enemy Snipers, this precision rifle isn't commonly available, but if you prefer to engage foes carefully from

As one might expect, this weapon is best suited to long-range engagements. Use the default scope view to scan for targets; you can press V to toggle the variable magnification, allowing you to line up more precise shots as needed. Additionally, you

Fighting with this weapon

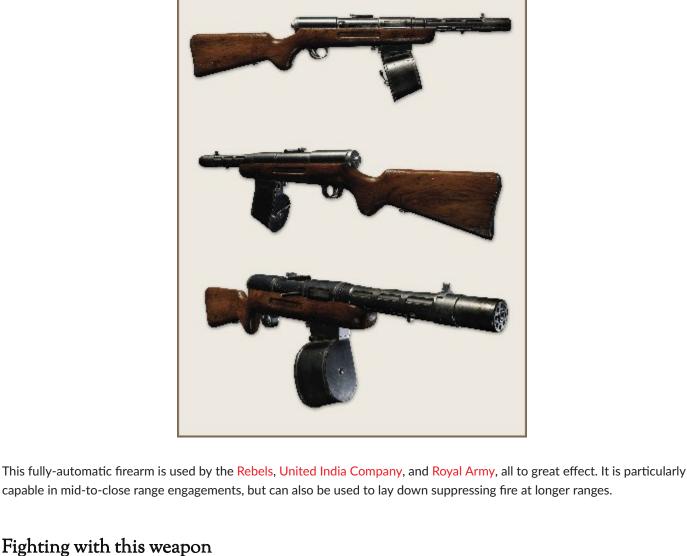

can hold to hold your breath and steady your aim, something that can be crucial when trying to line up a headshot. Fortunately, a shot from waist-up on anything less than a Heavy is an immediate kill, so you don't need to be overly precise unless your foe is armoured...in which case, you'll need three clean headshots to get the job done! Lastly, note that this weapon cannot be hip or blind-fired; you must take aim to use it.

Review the Sniper section for specific details on how these enemies fight, but suffice it to say you should always try to keep solid cover between you and the barrel of an enemy Marksman Carbine. It only takes two shots to put you down! Additionally, getting hit by this weapon causes you to stagger backward, potentially knocking you out of cover if you're not careful.

STATS

Ammo	5/30	
BERGMANN M85 AUTOMATISCH		
	-	

While the M85 Automatisch can easily chew through rounds when fired "full auto," it is also quite effective when used in short, controlled bursts. Additionally, it is common enough that ammo should be plentiful, making it a safe choice for a primary

weapon. One thing to be cautious of though:

that you bring a more accurate pistol. Alternatively, if you prefer to fight exclusively in close-quarters and plan on frequently taking the risk of closing the gap with the enemy, it can be paired with the C-81 Maschinenpistole to allow you to bring an impressive amount of firepower to bear before needing to reload.

the Automatisch becomes significantly less powerful over range, so if you wish to retain a versatile loadout, it is recommended

STATS

Fighting against this weapon The M85 can be surprisingly effective in enemy hands at longer range. As they fire in bursts, only one or two rounds will actually score a hit...but each time this happens it delays the regeneration of your health. This means that, before you know it, a few distant M85's could have you ducking behind cover, waiting to recover. Unfortunately, getting closer only makes things

worse! Your foes fire longer bursts, or at extremely close range they simply fire from the hip while unloading their entire
magazine into you. If you're caught in the open while this happens, you most likely won't get a chance to use your Blackwater
before being gunned down.

Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

OGDEN RA-5 REPEATING 12-BORE SHOTGUN

Used by Shotgunners amongst the Rebels, United India Company, and Royal Army, the RA-5 Repeating Shotgun is able to unload a series of 12-bore shells to deadly effect at close range while still holding enough rounds to be moderately effective at even mid-range.

Fighting with this weapon

As one would expect from a shotgun, this weapon is most effective at close range. Because it fires a spread of pellets, the closer you are to your target

the more of that "spread" hits it. Additionally, the pellets significantly weaken in power at mid-range, making engagement beyond that distance a waste of ammunition. Don't let this deter you though; at close range, a single blast can kill most targets, and at extremely close range it can blow an unarmoured head clean off! Additionally, the RA-5 is loaded one shell at a time, allowing you to top off your magazine during any down time; you can also interrupt a longer reload if the situation is dire. Lastly, a good shot from the RA-5 staggers most foes, giving you time to close the gap while lining up a second shot.

Fighting against this weapon

Beware, like the M84 Marksman Carbine, this weapon knocks you backwards if it lands a good hit on you. At close range, even getting hit in the arms while blind-firing can result in being knocked backwards out of cover, making you an easy target for any follow-up attacks. As such, it's safest to eliminate Shotgunners and their RA-5's before they get into range. If that fails, wait to fire between their shots to avoid getting staggered. If you have an opportunity to run away, you may be able to catch a Shotgunner performing the RA-5's lengthy reload, but if he manages to get close again he stops reloading to resume firing.

STATS	
Ammo	5/30

WORCESTER 'THREE CROWN' MAGNESIUM 12-BORE COACH

This brutal weapon literally shreds targets at close range by firing all three barrels simultaneously to create a massive gout of a molten magnesium shards. It may have to be reloaded after every firing, but in skilled hands there is never any immediate opposition left alive to take advantage of such an opportunity. This monster can be found in the hands of Rebel and United India Company Shotgunners alike. Even more terrifyingly, it is also used by some fully armoured Heavies, making for a foe that means almost certain death for you should he reach close range.

Fighting with this weapon

Because the Three Crown's power is severely diminished even by mid-range, closing the gap with your foes is a must. However, the real skill of the Three Crown is in finding the right angle to catch multiple foes in a single blast. All enemies within its deadly cone of fire take damage, meaning you can easily eliminate two or more foes with a single pull of the trigger. This can be particularly important, as immediately after pulling said trigger, you need to reload before firing again. However, you can offset this risk by blind-firing the weapon. Since accuracy is hardly a concern, why bother aiming? With this same approach, you can also become a highly mobile killing machine, using sprinting and hip-fire to quickly close distance with your foes while barely losing any momentum to fire. Be careful though; timing your attack wrong can result in your taking a hail of gunfire while exposed in the open.

Fighting against this weapon

STATS

Ammo

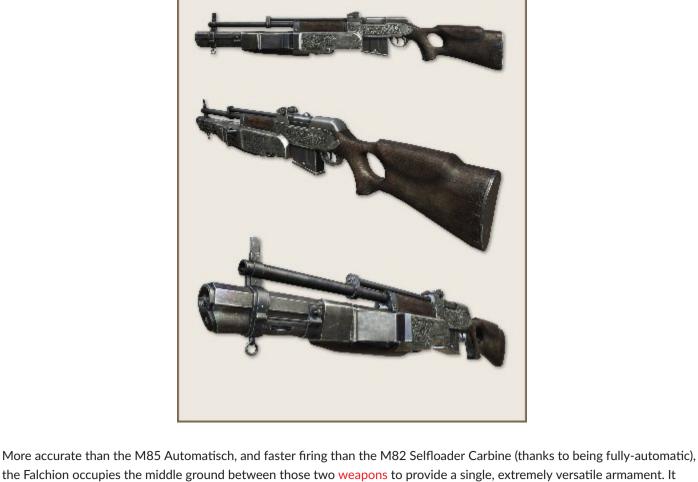

Like the RA-5, this deadly weapon can send you reeling with a good hit at close range, and it leaves you incapacitated after only two shots. Unfortunately, if this does happen, being behind cover won't likely save you. The wielder will most likely move around and execute you before you can use Blackwater. Therefore, eliminating Shotgunners wielding the Three Crown should be your highest priority, while Heavies wielding the Three Crown should not only be your highest priority, but you should

	consider retreating to increase the distance between yourself and their deadly fire! Fortunately, there is a way to very
	effectively deal with this problem! The C-81 Maschinenpistole and a full meter of Blacksight can easily eliminate even a pair of
	Three Crown Shotgunners or a single Heavy, so if you find these particular foes to be troublesome, it may be worth it to carry a
	C-81 specifically for dealing with them.

Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

ESSEX M₂/PN8₃ 'FALCHION' AUTO-RIFLE

gets even better though—with the underslung Pn83 (that can be triggered via Alt-Fire on Pn, the Falchion can stun entire groups of opponents at close range, shatter flimsy cover, and even repel Lycans! Its only major downside is its rarity. Made specifically for the Knights of The Order, only the occasional trial unit or cross-training loan can be found in the armouries of the United India Company and the Royal Army. Fighting with this weapon

The Falchion remains accurate and effective at mid-to-long ranges, requiring only a quick burst of three rounds to finish most foes; at extremely close ranges, only two rounds are needed. Additionally, its recoil is manageable enough such that the trigger

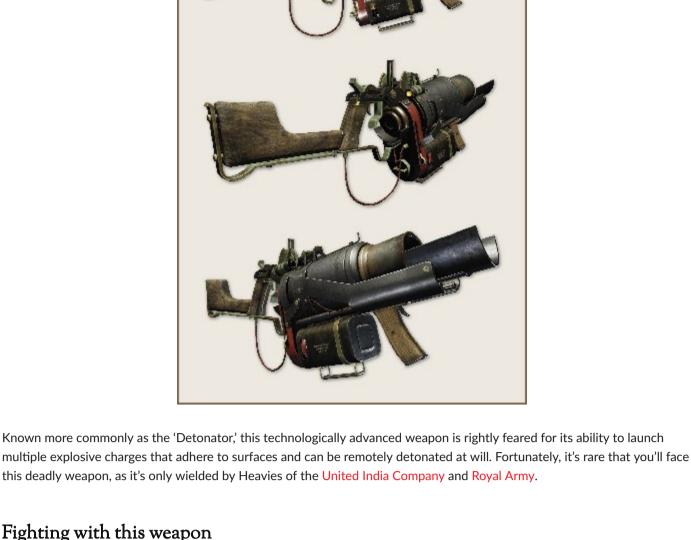

can be held down with only a minimal reduction in accuracy, a feature that is crucial when fighting Heavies (who are effectively immune to the Pn83's concussive blast). Aim at their head and don't let up until they go down! On the other hand, the Pn83 is

all but invaluable when fighting Shotgunners. Wait for them to close in on you, and then simply blind-fire the Pn83 in their general direction to stun them. From there, you can either sweep in for a melee takedown, or finish them off with primary fire from the M2 Auto-Rifle if you prefer to hold your ground. Lastly, a well-timed blast from the Pn83 can repel a charging Lycan, giving you an opportunity to land a few more rounds, oftentimes just enough to down the beast. Fighting against this weapon Fortunately, this extremely effective weapon isn't something you'll have to face.

TS-17 REMOTE D	ETONATIC	N SYSTEM		

Unlike most other weapons, the Detonator often is most effective when you're not aiming directly at your target. Instead, try aiming at the ground between him and another enemy, allowing you to catch both of them in a single explosive blast. However, if they are very close to one another, you can try for a direct hit; if you're successful, the explosive charge goes off automatically! When you don't score direct hits, your charges can be set

off by tapping Alt-Fire would to detonate your charges one at a time (the first charge you launched is the first to detonate), or you can hold 🕮 to detonate them all simultaneously. This weapon is easiest to use when you have the high-ground,

STATS

allowing you to easily land charges behind enemy cover. Fighting against this weapon

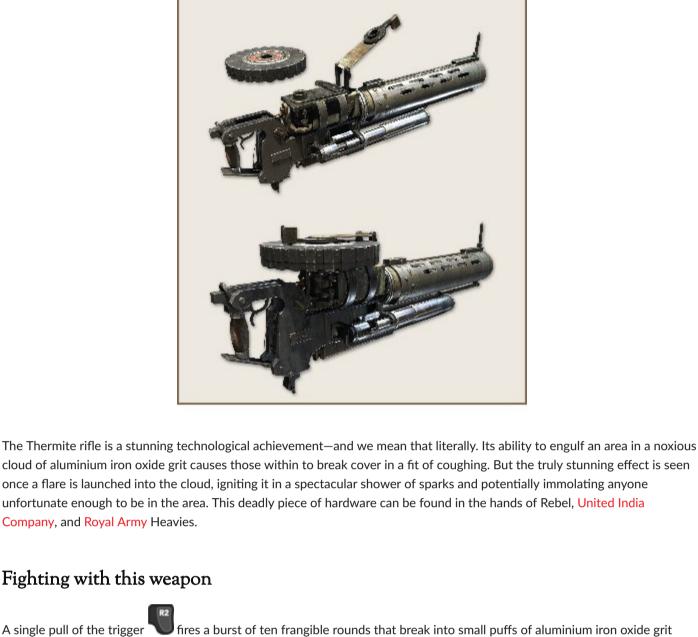

When fighting against a Detonator, listen for the distinctive "clink!" sound of a charge adhering to a surface. Once you've heard that sound, you need to determine if you're safe from the charge, or need to move to avoid it. Fortunately, you have two tools

4/8

for determining how close a charge is. The threat indication icon appears, potentially prompting you to press 🖤 to dodge away from the charge if it's very close. In addition to this, you can also hear interference over your Communicator when near a charge; the closer you are, the louder the interference will be. If you're near the charge, obviously you should move to avoid taking serious damage from its blast (even the edge of the blast can cause you to stagger). If you're not near the charge, you should strongly consider staying put; accidentally wandering into the blast can be disastrous.

Ammo ESSEX M86/FL THERMITE RIFLE

make a sizable cloud of ignitable airborne grit. Alternatively, you can sweep a broad area as the burst fires, allowing you to potentially catch many foes in a single burst. Do not be afraid to follow up with a second burst if you need more coverage. Also note that even direct hits from these frangible rounds do very little damage; attempting to kill a foe with only the primary fire is a waste of ammunition. Next, once you've caught your target(s) in a cloud of grit, Alt-Fire was an ignition flare into the cloud to initiate the weapon's

namesake "thermite" reaction. These flares travel slowly in a bit of a corkscrew pattern, but clouds they strike are immediately ignited, creating brief, but extremely high-temperature blasts that ignite any unarmoured enemies in the immediate vicinity.

upon impact. When firing at a single target, the inherent inaccuracy of these rounds gives you an effective spray pattern to

Additionally, the shower of molten sparks that rains down from the blast can be similarly damaging, though it is not powerful enough to be lethal against an undamaged foe. However, any foe that is currently ignited can act as an ignition source for other

fire and set off a deadly thermite reaction right on top him.

A single pull of the trigger

clouds of grit, including new ones you fire. This can allow you to finish off a target that was only caught by the shower of sparks, or can allow you to spread the blast even farther to other targets nearby. This can be particularly important because, while you do have an unlimited supply of flares, you have to wait for the auto-loader to finish before being able to fire another one. Note that flares can be somewhat damaging all on their own; a direct hit causes the target to stagger backward. While it takes a total of three direct hits to kill even the weakest of enemies, the flare adheres to them (like any other surface), while the staggering allows you to easily follow up with a burst of primary

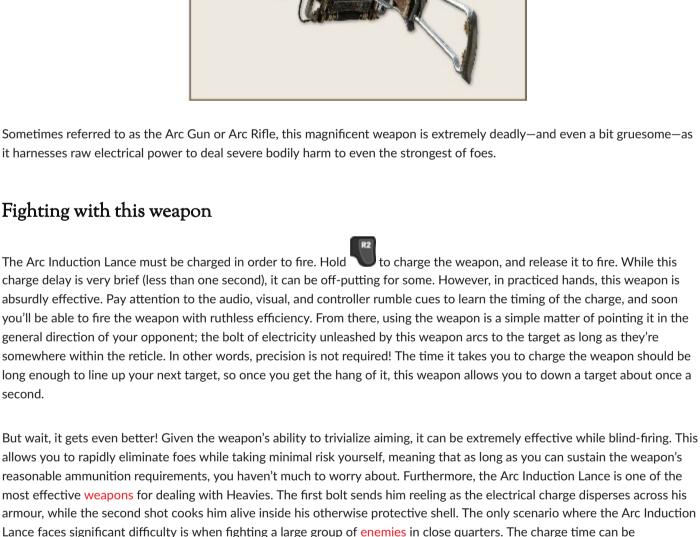

will surely finish them. Fighting against this weapon Unfortunately, everything that makes the Thermite Rifle excellent for destroying your foes also makes it quite deadly when used against you. While facing a Heavy wielding a Thermite Rifle, you need to remain highly mobile. The weapon's ability to engulf entire pieces of cover in a deadly inferno means that staying put usually isn't an option. However, staying on the move out of cover can be dangerous if there are foes with more traditional weapons around, so you need to take them out quickly to avoid getting gunned down in the open.

Given these features, the Thermite Rifle is a very effective weapon for dealing with large groups of enemies, as well as for dealing with foes that are entrenched behind cover. The coughing exposes them, and the igniting blast of the thermite reaction

tactics immediately! A single round of primary fire landing anywhere near you can be quite damaging, as it will be ignited by the flare now attached to you! In this scenario, your safest option is to find a tall piece of cover and keep it between you and the Heavy until the flare burns out; actually attaching to the cover would be a mistake though, as it will most likely end up engulfed in a cloud of grit. As such, you'll actually want to stand a few feet behind the cover to avoid igniting anything.

Once you can move freely, it simply becomes a matter of staying out of the grit clouds while returning fire to slowly whittle down the Heavy. There is, however, one exception to this: if you get directly hit by the Heavy's flare, you need to change

Fighting with this weapon

forces of any of the opposing factions you face.

Your bolts instantly kill anything less than a Heavy if you score a hit, the trick here being properly accounting for the travel time of the projectile. Unlike most other weapons, the Arbalest projectiles need a (very short) period of time to reach their target; the farther the target, the longer it takes to reach it. This can make hitting moving targets a bit difficult, but since the projectiles are perfectly accurate (they go exactly where your crosshair aims them), carefully leading a target can be effective. Beware though! While sneaking about with this weapon, a missed shot can alert your target, sending him looking in your general location and increasing the chance of your being spotted. Additionally, since ammo can only be obtained from crates, you need to use the Arbalest carefully and precisely if you don't want to run out of bolts. Like the M84 Marksman Carbine, this weapon cannot be hip or blind-fired: you must take aim to shoot.

This crossbow is a silent, deadly, and highly accurate stealth weapon. Given its atypical nature, it can't be found in the armed

MILLS MK IV FRAGMENTATION GRENADE

This hand grenade can kill multiple foes in a single blast with a good throw, making it a deadly armament in yours and enemy hands. It is used by Rebels, the United India Company, and the Royal Army, making it fairly common.

Fighting with this weapon

The Frag Grenade can be aimed with and "fired" (thrown) with . More specifically, Galahad pulls the pin as soon as you press , but he doesn't actually throw the grenade until you release , allowing you to "cook" the grenade, causing its fuse to start burning down before you throw it. Since the Mk IV's fuse is four seconds long, "cooking" is helpful for making sure enemies don't have time to escape the blast. On the other hand, cooking a grenade for too long will not end well...

Hip-fire and blind-fire can be an effective means for quickly getting a grenade out in the general direction you want, while peeking first can be helpful for subtly more precise throwing. However, if you need to sling your grenade to a specific location,

aiming with draws an arc to indicate how the grenade will travel. Note, however, that this arc does not account for bounces, drawing only where the grenade initially strikes. Fortunately, the blast is large enough that extreme precision isn't required: enemies closest to the center are killed outright, while those farther away are significantly stunned by the concussive blast.

Fighting against this weapon

In the hands of the enemy, these grenades are a serious threat. If you're caught in the center of the blast you're downed immediately, while getting hit by the edges of the blast can briefly stun you. Getting well clear of live grenades is crucial to your survival, to the point that you should be willing to leave cover and risk gunfire in order to avoid them. When a grenade is near, an icon appears on the HUD in bright red, making it easy to spot; if you're close enough to the grenade, the icon changes into a

prompt for the button, allowing you to roll away from the grenade by holding the Left Stick in any direction and tapping. You should wait until the grenade has exploded before returning to your spot, but if you're impatient, you can use Blacksight to easily target and destroy the grenade. In fact, Blacksight can be used in this same way to shoot mid-air grenades (an enemy's or yours) or even to detonate a grenade in the hands of an enemy Grenadier, instantly killing him and any foes nearby!

STATS	
Ammo	1/3

MILLS MK IV-S MULTIPURPOSE SMOKE GRENADE

The cloud of smoke generated by these grenades can be useful to provide a protective screen to block enemy vision, but it is also quite effective at flushing targets from cover, causing them to cough and gag as they stumble out of the smoke. This is particularly useful in areas where the destruction caused by Fragmentation Grenades would simply be unacceptable (like aboard an airship). You face Grenadiers throwing Smoke Grenades amongst both the Rebels and the United India Company.

Fighting with this weapon

Smoke Grenades are operated identically to Frag Grenades, with the same fuse time (the only difference being that if you "cook" a Smoke Grenade for too long, you just end up looking silly instead of being incapacitated or killed). While the smoke cloud can be helpful for blocking the enemy's line of fire, it also blocks yours, making it a double-edged sword. Where the Smoke Grenade truly shines is in flushing out and stunning enemies while denying them cover. They avoid entering the smoke as much as possible, and those caught in the smoke are stuck coughing for several seconds. This is helpful for buying you some time to heal, but it also can allow you to melee or gun down several targets as they try to clear their lungs. It can also help break a Shotgunner's assault, but is completely ineffective against Heavies; they'll simply wade through the smoke and continue firing.

T. 1 . . . 1 .

Fighting against this weapon

It can be very difficult to distinguish between a Smoke Grenade and a Frag Grenade. When in doubt, assume it's a Frag Grenade and get out of there! If you do end up in a cloud of smoke, you'll have a hard time seeing, making it possible for

enemies to flank you. As such, you should try to relocate if at all possible, only holding your ground if absolutely necessary.

STATS	
Ammo	1/3

Numerous foes ranging from bedraggled mental patients, to streetwise rebels, to Company-hired mercenaries, to Royal Army redcoats stand in the way of Galahad's quest in *The Order: 1886*. But regardless of their affiliation, your human enemies are divided into six distinct classes: Soldier, Leader, Shotgunner, Grenadier, Sniper, and Heavy.

Regardless of faction, enemies of a particular class all tend to behave the same, sporting roughly equivalent capability and durability whether rebel, mercenary, or trooper. So let's start by taking a look at each class.

Soldier

The term "Soldier" is here used in a generic sense, as in "a person who serves a cause"; while UIC and Royal Army Soldiers are also professional soldiers, hospital escapees and Rebel Soldiers certainly are not. Regardless, "Soldiers" are the most common class of enemy, armed with only standard rifles or pistols. Most Soldiers fight from cover, retreating behind it when taking heavy fire or while reloading, but in certain scenarios they may be bold enough to aggressively fight in the open.

Shotgunner

A dangerous foe not to be taken lightly, "Shotgunners" (or "Shotgun Specialists" amongst the more militarized factions) have a singular goal: to ruthlessly eliminate you at close range. In order to quickly reach said range, they eschew cover in favor of mobility, moving in a distinctive "running crouch" that minimizes their profile. They're also a bit tougher than Soldiers, able to take one or two more shots before going down, so be sure to identify them early and eliminate them before they get close enough to become dangerous. It can be helpful to listen for their distinctive voice as they usually order their comrades to give them cover while they get into range. Shotgunners can often be heard before they're seen.

Grenadier

Once a Grenadier has entered the fray, you will usually know by hearing the distinctive noise of them pulling the pin of their namesake armament...followed shortly by the grenade indicator UI likely appearing nearby, and inevitably a "boom." Once they've thrown their initial grenade, Grenadiers switch to their pistol and fight like a typical Soldier, periodically switching back to their grenade to flush you from cover. Grenadiers are also ever so slightly tougher than Soldiers, taking at most one extra shot to be defeated. However, well timed use of Blacksight can allow you to shoot their grenades out of the air, or even better, to detonate them in the Grenadier's hand!

Leader

Leaders fight very similarly to Soldiers, but usually prefer to remain slightly farther back than their subordinates while dealing impressive damage with their powerful 'Duelist' Revolvers. They can become a serious threat if left unchecked...but fortunately Leaders can be spotted by their distinctive hats, allowing you to pick them off. If they're hidden behind cover, you can usually shoot off their hat to lure them out for a headshot.

Heavy

Well-armed and armored, Heavies can be easily spotted by their shining metal cuirass and helms, and heard by their muffled voices. Wielding some of the deadliest weapons available, they fearlessly move into their preferred weapon range and continuously assault you, flinching at only the mightiest of wounds. In fact, they're significantly tougher than any other class—even able to withstand a bolt from the Arc Induction Lance before being defeated! Fortunately, good use of Blacksight can severely damage or even kill a Heavy. If you've been saving your Blacksight for just the right time, the appearance of a Heavy is usually it.

Sniper

When you hear the echoing report of the Sniper's powerful marksman rifle, get to cover! Able to down Galahad with only two shots, the deadly Sniper is a menace at long range; keep an eye open for the glint of light reflecting off of his scope; it means he is preparing to fire. Once the glint is gone (usually after he fires), you're safe to move or return fire, but be careful! If he managed to shoot you while you were exposed (whether merely aiming or being truly out in the open), he immediately starts lining up a second shot and the glint returns! Fortunately, there is a way to trick the Sniper into firing while minimizing your risk of being shot. Stay hunkered behind cover until the glint appears. Once it does, wait a moment or two, and then "peek" out of cover by using , tricking the Sniper into firing as if you were about to fully expose your position. If you do manage to get

close enough to the Sniper, he switches to his pistol in an attempt to fend you off.

You face these lunatic foes early on in the streets of Mayfair and inside the atrium. Escapees come in the basic Soldier variety only, armed with the pistols scrounged and stolen during their rampage from the Hospital.

Two varieties of Half-breeds lurk in the game. You encounter two Lycan Elders during boss fights with special combat rules. You fight less powerful, but still formidable, Lycan Soldiers in three different locations using standard weaponry.

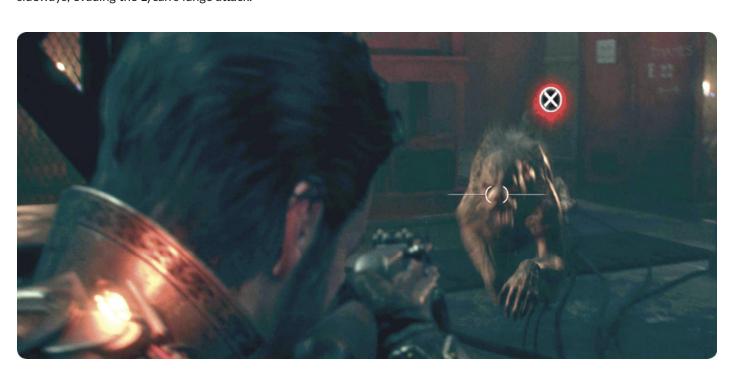

LYCAN SOLDIER

The Lycan's "weapons" are its claws, teeth, and speed. Their approach is swift, so Blacksight can be very helpful and effective against Lycans, especially when combined with the C-81 Maschinenpistole. Here, we'll recap the strategies for fighting Lycan Soldiers presented in our walkthrough.

How To Dodge A Lycan

When a Lycan attacks, the beast sprints at you, makes a jumping lunge that inflicts damage, and then tries to hurry away before you can shoot. During each Lycan's approach you see a red-highlighted "X" appear. When you see this prompt, quickly flick the Left Stick to the left or right away from the Lycan and simultaneously press on your PS4 controller. Galahad dives and rolls sideways, evading the Lycan's lunge attack.

How To Fend Off A Lycan

If a Lycan gets in close, it can force you on the defensive and trigger a tense standoff. Tap arpidly when the prompt appears to keep the Half-breed monster from tearing out your delicate, fleshy throat.

How To Kill A Lycan

To kill a Lycan you must first wound it with gunfire. A wounded Lycan drops to the ground, immobilized for a few seconds. Rush to the fallen creature for an "Execution" move—that is, press of to finish it off with a merciless knife thrust to its heart. Make this move quickly! Lycans recover from gunshot wounds within a few seconds and then rush away.

Here are three basic strategies you can try:

Cut Off Lycan Approach Angles.

Don't aim too quickly, so you can see any Lycan that rushes you. Once it begins its approach hold and adjust your aim to wound it with gunfire. Once you've killed a wounded Lycan with the execution move, hurry to the next corner and watch for the next Lycan attack.

Use Blacksight Effectively.

Once a Lycan starts its charge, immediately enable Blacksight if you have it available. (Again, check the meter underneath your

weapon readout.) You should be able to put the beast into a downed state before it gets close enough to slash you.

Use Your Falchion's Alt-Fire.

wounded, finish it off with the execution move.

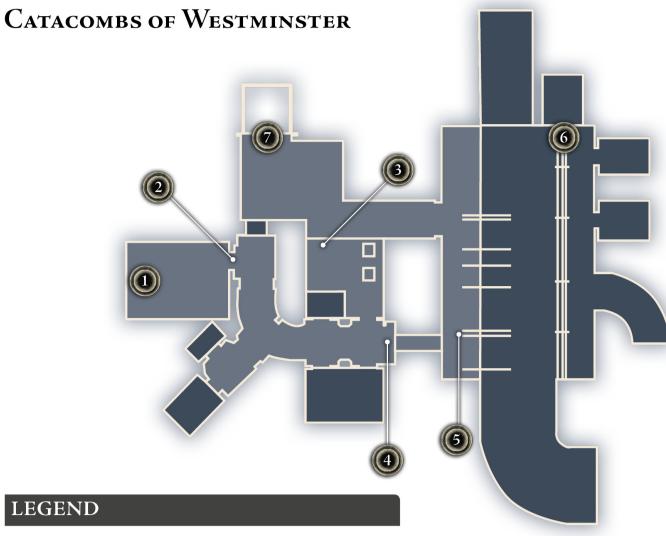

The M2 Falchion rifle's secondary fire is a concussive air blast that can briefly stun a Lycan, knocking it backward. Target a charging Lycan and press for knockback, then quickly pump it full of primary fire bullets. When the creature falls

The Twentieth Day of November, 1886

This story begins underwater. Your main character, Galahad, enjoys an intimate view of the bottom of the dunking tub in the Catacombs of Westminster. The ordeal by water at the hands of two sadistic, redcoated Royal guards is long and brutal. Hold your breath and bide your time.

INSPECTABLE ITEMS 0 **Pistol**

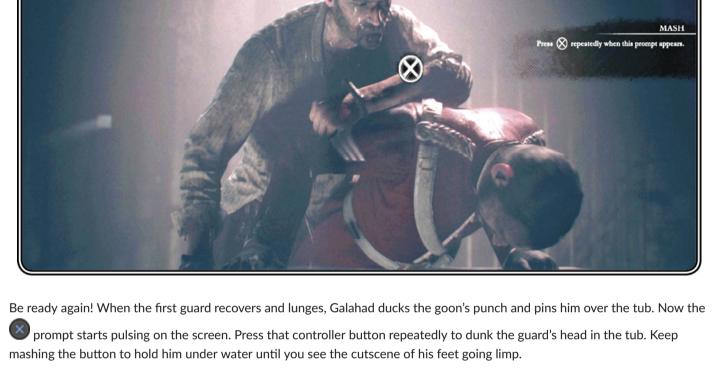

- 1 Start **5** Canal walkway
- 2 Exit door 6 Half-breed fight 3 Inspect item (Pistol) 7 Elevator (guard)
- 4 Padlocked grate
- Galahad suffers the ordeal once, blacks out in his cell, and then faces a second bout as the two guards drag him back to the tub

chamber for another "morning bath." Be ready! After the dunking, the prompt flashes onscreen. Quickly press that button on your PS4 controller. This triggers a quick scene: Galahad manages to yank the left shackle bolt out of the tub frame, and then slams his freed elbow

into his torturer's chin. When the second guard intervenes, the poor fellow gets the sharp end of the shackle bolt right in the neck. Ouch.

and frees himself from the shackles.

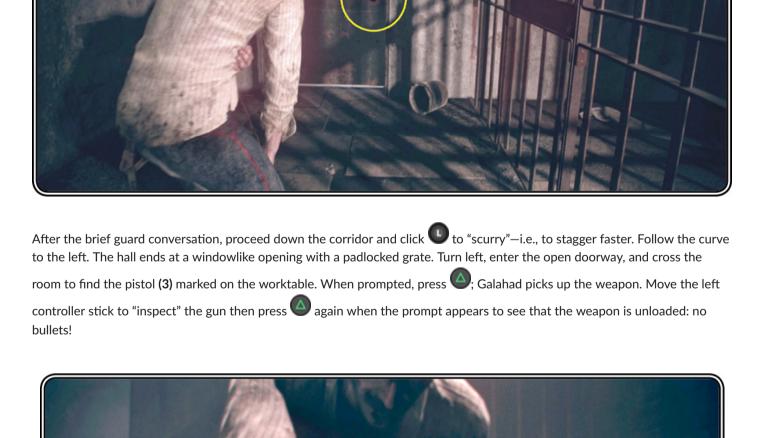

TUTORIAL

If you haven't guessed yet, this opening sequence is your fully game-integrated tutorial of gameplay basics. In the same way, consider our detailed "walkthrough" of this very simple opening level as a

Now Galahad needs the shackle key lying just out of reach on the floor. The prompt reappears, but this time you must hold down that controller button until the circle around the onscreen prompt fills up. When the meter is full, Galahad snags the key

tutorial for how to use this strategy guide.

Use the right controller stick to look around as directed, and then use the left stick to stagger toward the chamber's exit door. (You can see your starting point marked as (1) on our map.) Note that the door (2) is marked onscreen with a glowing "point of interest" icon. As you approach, the icon turns into the prompt. Press that button and Galahad rams open the door.

Head back to the padlocked grate (4), now marked with an action icon. When the prompt appears, use it to trigger a scene:

Galahad uses the empty revolver to smash the padlock.

Continue down the passage until Galahad emerges onto a walkway (5) along an underground canal. This ends "Tortured" and begins the next scene, "The Catacombs."

Galahad hustles into cover behind a broken wooden barricade as a guard across the canal shines his lanterns your way. Follow the onscreen directions to execute a "cover transfer" maneuver: push the left stick leftward and press to dash across the gap. Then watch as the squad of Royal guards tangles with a snarling Half-breed (6).

After the scene, move forward into the next room where another redcoat guard arrives via the elevator (7). Hold in your PS4 controller's trigger to aim your weapon at the guard—he doesn't know your gun is unloaded, so he raises his hands. While still aiming, walk toward the guard to trigger the next scene: Galahad herds his hostage into the elevator.

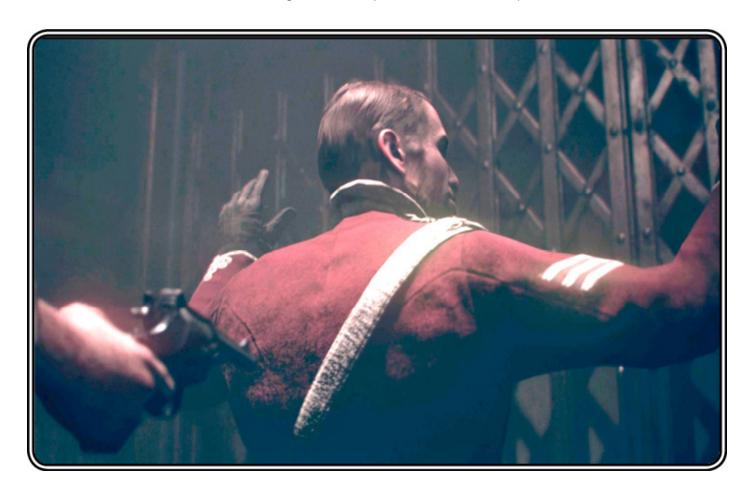

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

Watch the next scene as Galahad and his hostage ride the lift up to Westminster's balcony level.

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

When the lift arrives, two armed guards open fire from down the hall. In the scramble that ensues, Galahad and his hostage fall into the elevator and fight for the pistol. Start tapping when the prompt appears, but be aware that you can't retain the pistol—the weakened Galahad inevitably loses the struggle. Be ready to press the moment the prompt appears onscreen. When you do, Galahad body-slams the guard.

Now comes your first "turning point" challenge. Use your controller's right stick to move the targeting reticle over to the point-of-interest icon glowing on the guard's head. (The in-game direction calls this "assessing the situation.") When the reticle gets close to the icon it turns into a prompt. Quickly! Tap your button to "take action." Galahad head-butts the guard to the ground. Once Galahad gets the guard in a headlock, start tapping quickly. Keep tapping until Galahad snaps the poor guy's neck.

A TURNING POINT

"Turning point" challenges can be tricky until you get the hang of them. The gamespeed slows and two glowing items appear onscreen: a targeting reticle and a point-of-interest icon. Quickly use the right stick to move the reticle toward the icon until an onscreen button prompt appears. Then press that button on your PS4 controller to "take action."

Then watch as another gunman (with a French accent) gets the drop on Galahad...but inexplicably lowers his gun to let the fugitive escape. Galahad reaches an ornate set of double doors. Use the prompt to open them and rush outside.

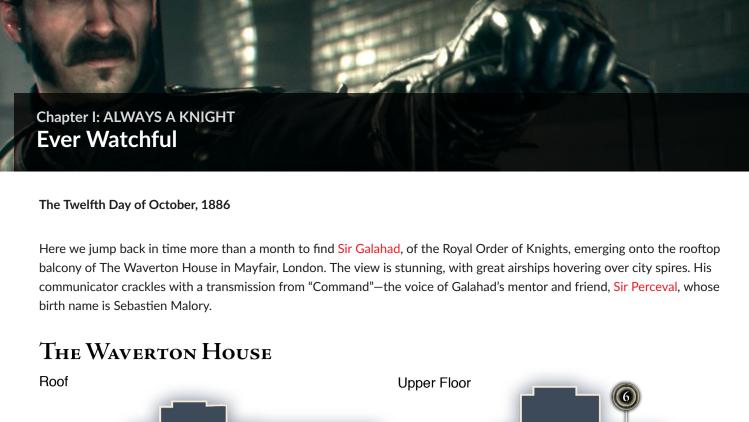

Galahad emerges onto a long balcony with a panoramic view of the city across the river. But escape in either direction is cut off by soldiers and some very well-dressed, well-armed folks: Knights of the Order. They are, in fact, Galahad's former compatriots, and they are clearly agonized by this balcony standoff.

As the bearded Lord Chancellor calls for Galahad's surrender, another "Hold" prompt appears onscreen. Hold down until the circle meter fills up around the prompt to trigger the Prologue's final spectacle.

Lady Igraine, born Isabeau D'Argyll, has a long and tangled history with Sir Galahad...a past that clearly lurks beneath the dry, competitive wit of their exchanges. "Isi" is a young Knight but a tough, first-rank fighter, trained by Galahad and Perceval after being raised as the daughter of the Lord Chancellor himself. As she puts it, "You're still pretty good. But I'm better."

Igraine reports that bedlamites escaped from the mental hospital and are running amok, possibly as a rebel subterfuge. Perceval calls in to report multiple escapees spotted at the east entrance of the United India underground station. Intercept with caution. Time to move.

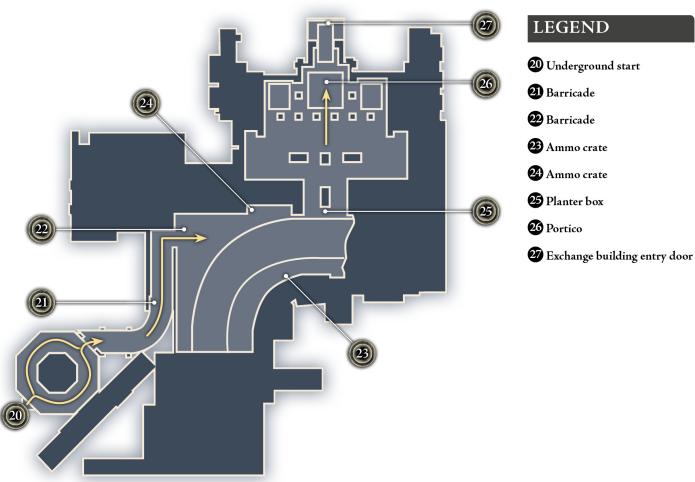

FOLLOW IGRAINE

You start on the steps (17) at the edge of Mayfair's United India Square. Follow Lady Igraine as she jogs across the plaza. Note that if you click and hold (the right controller stick) you not only display the directive onscreen but also activate a point-of-interest icon associated with the directive. Thus, if you get disoriented you can easily get back on track. In this case, the directive marker shows you where Igraine is located.

Igraine moves quickly, so you can use use the "Accelerate" control to keep up; while moving forward, just click to move faster. Move across the square past the fountain, up the stairs (18) past a fine dining establishment called The Pheasant, and then down to the gated and guarded Underground entrance (19). En route, you can stop to eavesdrop on various citizen conversations without losing Igraine, if you want. She'll stop and wait for you at a couple of checkpoints.

Mayfair Underground & Exchange Courtyard

When you arrive, Igraine exchanges pointed words with one of the United India Company's hired goons then leads you downstairs into the London underground (20) where tube passengers and police are in a chaotic frenzy. Go around either side of the Ticket Office and follow Igraine up the far stairs to Mayfair's Main Street exit. This triggers a quick cutscene: an escapee in his hospital garb wrestles a gun away from a London cop.

Here's your first gunfight! Rush forward to the barricade (21)and press to take cover. Cover is very important for survival in this game, so use it whenever possible. After Igraine says, "Let's get to work!" you get a new directive.

Check out the notes and stats for Hospital Escapees (Bedlamites) in our Enemies chapter. Do this

KNOW YOUR ENEMY

for each new class of enemy you face in the game.

Using the "Equip Weapon" controls, press the left D-pad button to equip your secondary weapon, a C-78 Autoloading Pistol.

INCAPACITATE THE ESCAPEE THREAT

(Again, check out its specs in our Weapons chapter.) You can "blind-fire" weapons from behind cover by simply pulling the Fire

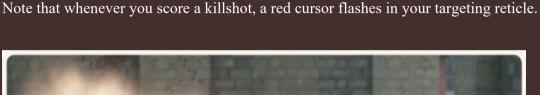

, but this method makes aiming adjustments imprecise. It's much more effective to use Weapon trigger cover and aim, adjust aim quickly, release the trigger to drop back into cover while your targeted enemy fires back, then pop up again and fire before the target can return fire.

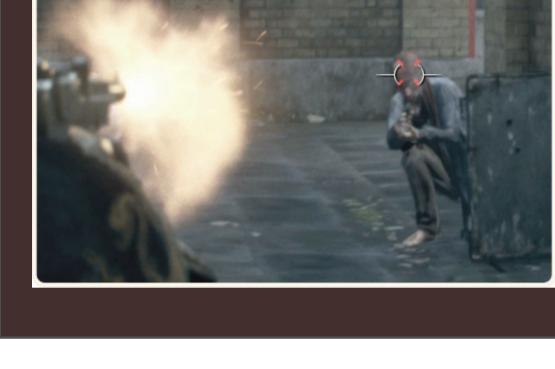

The C-78 Autoloading Pistol gets a Damage Multiplier of 3.0 for headshots, so be sure to target

TRIPLE HEAD BONUS

enemy heads when possible to inflict triple damage.

RED MEANS DEAD

using the "Vault" maneuver to hop the barricade—i.e., push forward on the left stick and press , the same controls as "Traverse." Here you can choose to swap pistols by picking up dead escapees' weapons. But your C-78 has greater accuracy and power than their MK I Service Revolvers so we recommend you pass up that trade. When you reach the corner, watch the cutscene

When your first ammo clip gets low, Igraine suggests you reload. Take her advice and press ut to do so. (It's always a good idea to use any lulls in combat to reload your current weapons.) After you pick off the first two escapees, push forward by

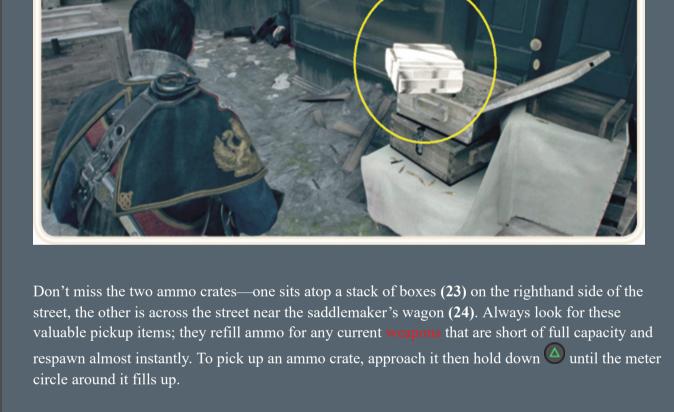

as more bedlamites tip over a carriage and deploy to fight.

AMMO CRATE PICKUPS

notes how "some are headed for the atrium." Nail the ones that take up positions down the street, and then follow Igraine's

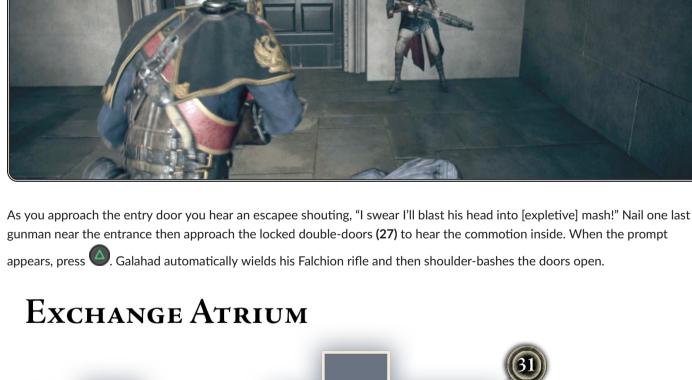

lead as she pushes forward to the courtyard of the Royal Exchange building.

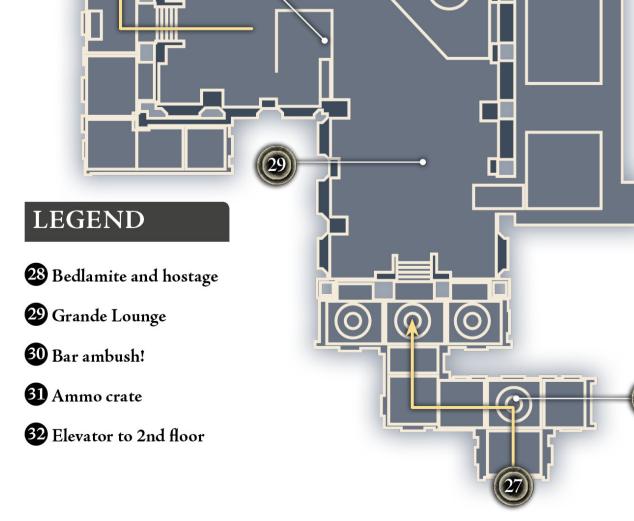

PURSUE ESCAPEES INTO THE EXCHANGE BUILDING

Duck behind the first planter box (25) for cover and start gunning down the escapee gang that advances across the courtyard near the King Alfred the Great statue. Push forward with Igraine from cover to cover and fight upstairs onto the Exchange

building's portico (26). Be sure to check fallen foes for dropped ammo!

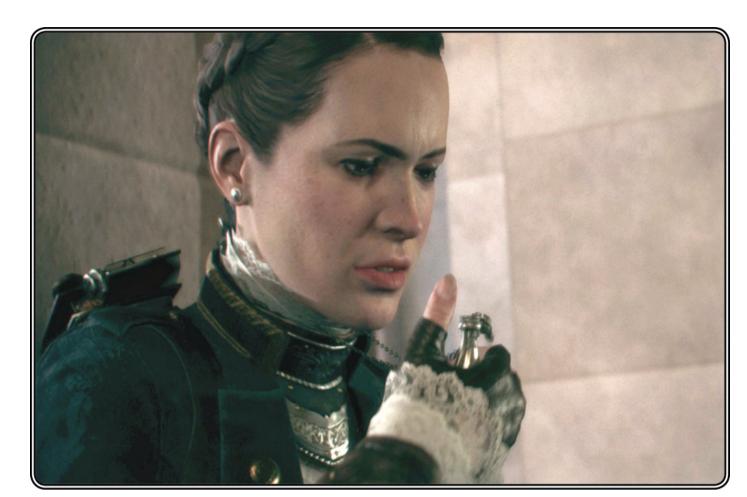

An escaped lunatic holds a gun to his hostage's head (28). Quickly! Aim your Falchion at both men and press (the right bumper button) as directed onscreen to fire the rifle's secondary armament, a stun-inducing concussive blast. Both men get knocked to the ground. Shoot the escapee and follow Igraine left to the next corner. Galahad complains, "I'm too old for this."

This triggers a quick cutscene as the Knights round the corner to the next area (29), an open central atrium called the Grande Lounge. When a bullet grazes Igraine's shoulder, she "repairs" it by drinking from a small flask hung around her neck. This is the legendary Blackwater that instantly heals Knights of the Order and allows them to live for hundreds of years. Afterwards, Igraine suggests using smoke grenades.

CLEAR THE GRANDE LOUNGE

Press the up-button on the D-pad to equip one MK IV-S Smoke Grenade. Press and hold (left trigger) to aim the grenade;

you see a white throwing arc appear onscreen marking where your toss will go. To throw the grenade: press and release (the right trigger).

Note that each grenade has a fuse countdown, meaning it won't detonate until five full seconds after you first push in

if you want, you can hold in to "cook" the grenade—that is, to start the fuse countdown while still holding the grenade. This way it explodes sooner after you toss it. Don't cook it too long, though! Get rid of it before the five-second fuse time ends.

Once the smoke is released, foes caught in it become disoriented and cannot fire. Move in fast behind Igraine, stay outside the smoke cloud, and pick them off. Push forward but watch out for a hidden escapee who suddenly hops over the counter of the Wallace Bar on the left (30). Take him out! More attackers emerge from across the atrium, so use the bar for cover.

Once the Grand Lounge is cleared, Galahad reports more enemies on the level above. Before you enter the building, climb up onto the piano platform near the Cigar Bar. (You can use 🐿 to just pull yourself up the railing.) You see the innocent bystander who got pushed off the balcony above; you can also find an ammo crate (31) in the corner.

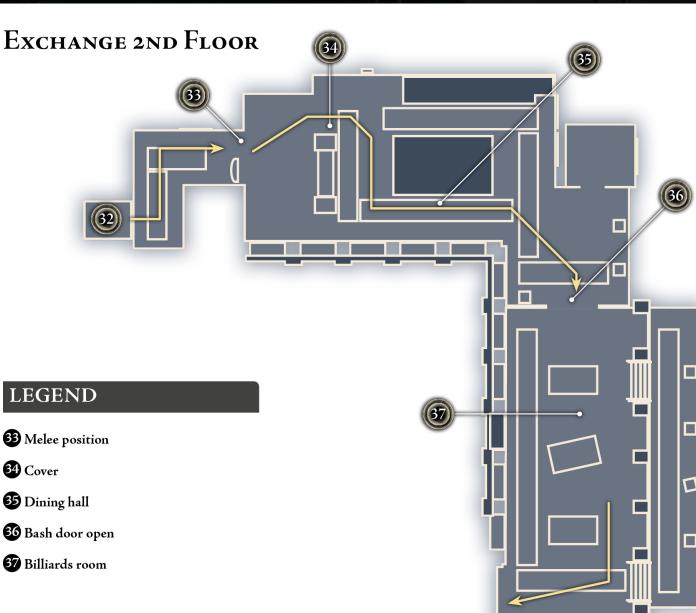

you go—make this a regular habit after each battle! Then move around the corner toward the elevator (32) to trigger a cutscene.

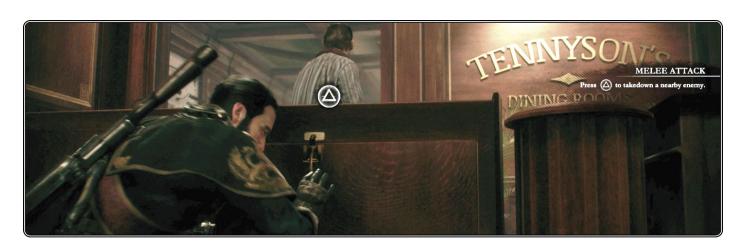

Follow Igraine up the stairs under the "Dining Hall" sign. En route, be sure to look around for useable ammo from fallen foes as

Chapter I: ALWAYS A KNIGHT
Just Another London Morning

Watch as Galahad and Igraine ride the elevator up. On the second floor, they sneak behind a railing just outside the Tennyson's Dining Rooms; Galahad ends up directly behind an unsuspecting escapee (33). When directed, execute a melee attack by pressing to incapacitate the enemy. Meanwhile, Igraine conducts her own melee takedown.

CLEAR THE 2ND FLOOR EAST WING

Take cover quickly, move around the wall (34), and start gunning down armed bedlamites. Fight across the Tennyson Dining Hall (35), moving from cover to cover. When the room is clear, follow Igraine to the next door (36) and bash it open to find more gunmen in a billiards room.

Here's your introduction to Blacksight, a powerful Knight's ability that slows down the world while letting you auto-target and

shoot at full speed. The aiming reticle auto-centers on the closest target, so pull to fire immediately. When the reticle turns red, the targeted foe is taken out. Quickly push the right stick toward the next target. Again, the aiming reticle auto-locks onto the target, so open fire immediately.

Next, the game invites you to toggle on Blacksight mode yourself, the way you'll use it for the rest of the story. Your Blacksight meter is the bar beneath your weapon info at the bottom right of the screen. The white segment of the bar shows how much Blacksight time is left; when empty or unavailable, the meter's bar is gray. (Note that Blacksight cannot be activated if the meter hasn't filled past the hashed area at the left of the bar.)

BLACKSIGHT GENERATION

Taking out enemies slowly refills your Blacksight meter.

Press to activate Blacksight; the meter starts emptying from right to left. Start eliminating targets immediately! Don't waste valuable Blacksight time. Keep shooting and toggling to new targets until the meter runs out. If you clear the room before the meter runs out, you can press again to deactivate Blacksight.

Clearing out the billiards room (37) completes the directive and automatically triggers a long cutscene. Watch as Galahad and Igraine finally meet up with General Lafayette, who chats with an admirer. Galahad also spots Perceval in the street conversing with a mysterious, hooded fellow. Then the Knight trio descends into the London Underground, Mayfair.

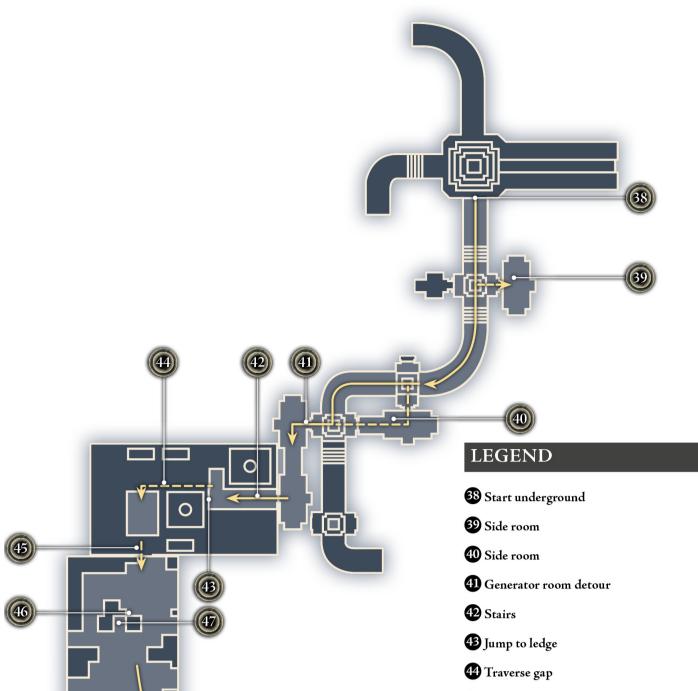

Underground, Mayfair

45 Jump across gap

46 Ammo crate

47 Ammo crate

PURSUE THE REMAINING ESCAPEES

Galahad sends Igraine and Lafayette one way then heads through another entrance alone (38). As he heads downstairs, Air Command calls in to report overhead sweeps of the Mayfair area looking for escaped patients. Follow the main tiled passage; you can explore a couple of side rooms (39, 40) along the way, but you won't find much of interest. You hear voices up ahead—a fellow named Wickes seems to have made a grisly discover of some sort. But you encounter no resistance.

When you reach a locked gate in the main corridor, veer right into another generator room (41); you get a comm report from Igraine and Lafayette. Eventually you climb a staircase (42) with red metal banisters that leads up to a brick wall (43). Move toward the wall and press to jump up and grab the ledge atop the wall.

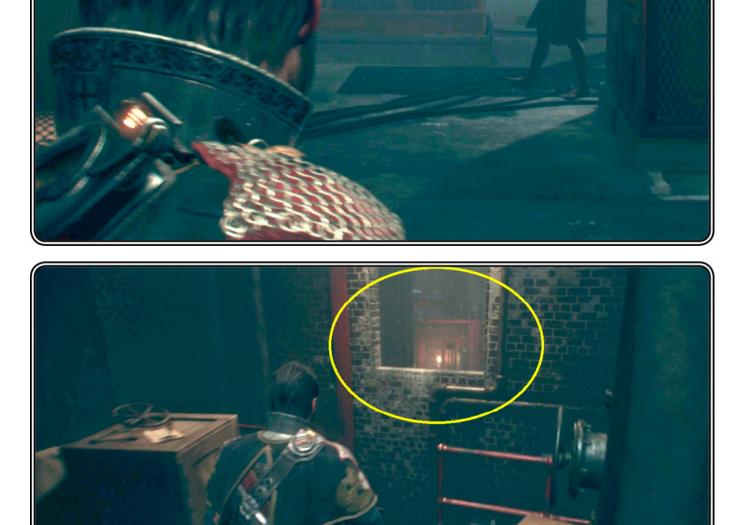

calls to Galahad from a catwalk on the far wall: "Youth always prevails!"

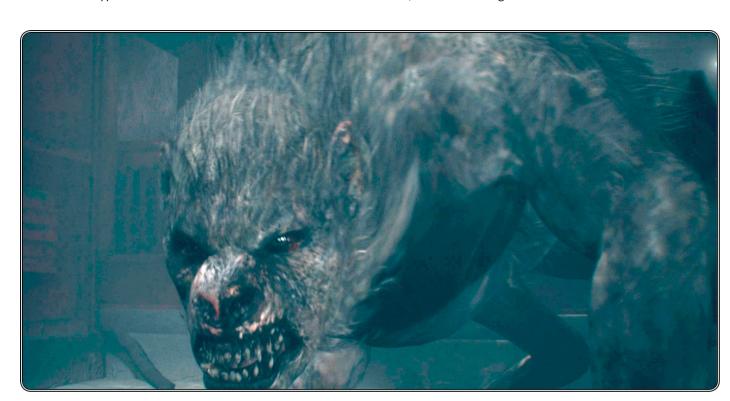

Pull yourself up to trigger a new scene: Galahad drops to the floor and encounters a tall, strange-looking escapee in hospital

But this is no typical lunatic. It's a Half-breed...and from the sound of it, more are lurking in the area.

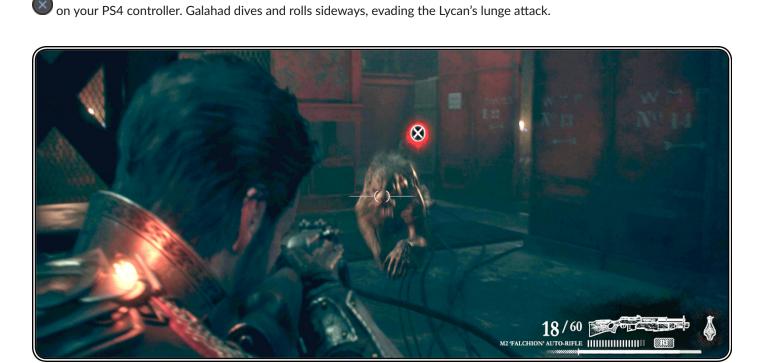

ELIMINATE THE LYCANS

Three Lycan Half-breeds roam the basement, but fortunately they attack one at a time. If you need ammo, hustle to grab the ammo crate glinting on the ground directly ahead of you (46) as the battle starts. Note that there's also another crate in an alcove on the other side of the machinery stack (47).

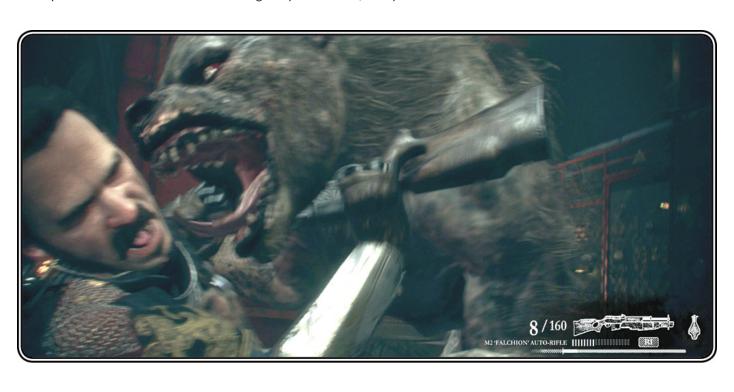

How to Dodge a Lycan

When a Lycan attacks, the beast sprints at you, makes a jumping lunge that inflicts damage, and then tries to hurry away before you can shoot. During each Lycan's approach you see a red-highlighted "X" appear. When you see this prompt, quickly press

How to Fend Off a Lycan

If a Lycan gets in close, it can force you on the defensive and trigger a tense standoff. Tap arpidly when the prompt appears to keep the Half-breed monster from tearing out your delicate, fleshy throat.

How to Kill a Lycan

To kill a Lycan you must first wound it with gunfire. A wounded Lycan drops to the ground, immobilized for a few seconds. Rush to the fallen creature for an "Execution" move—that is, press of to finish it off with a merciless knife thrust to its heart. Make this move quickly! Lycans recover from gunshot wounds within a few seconds and then rush away.

Here are three basic strategies you can try:

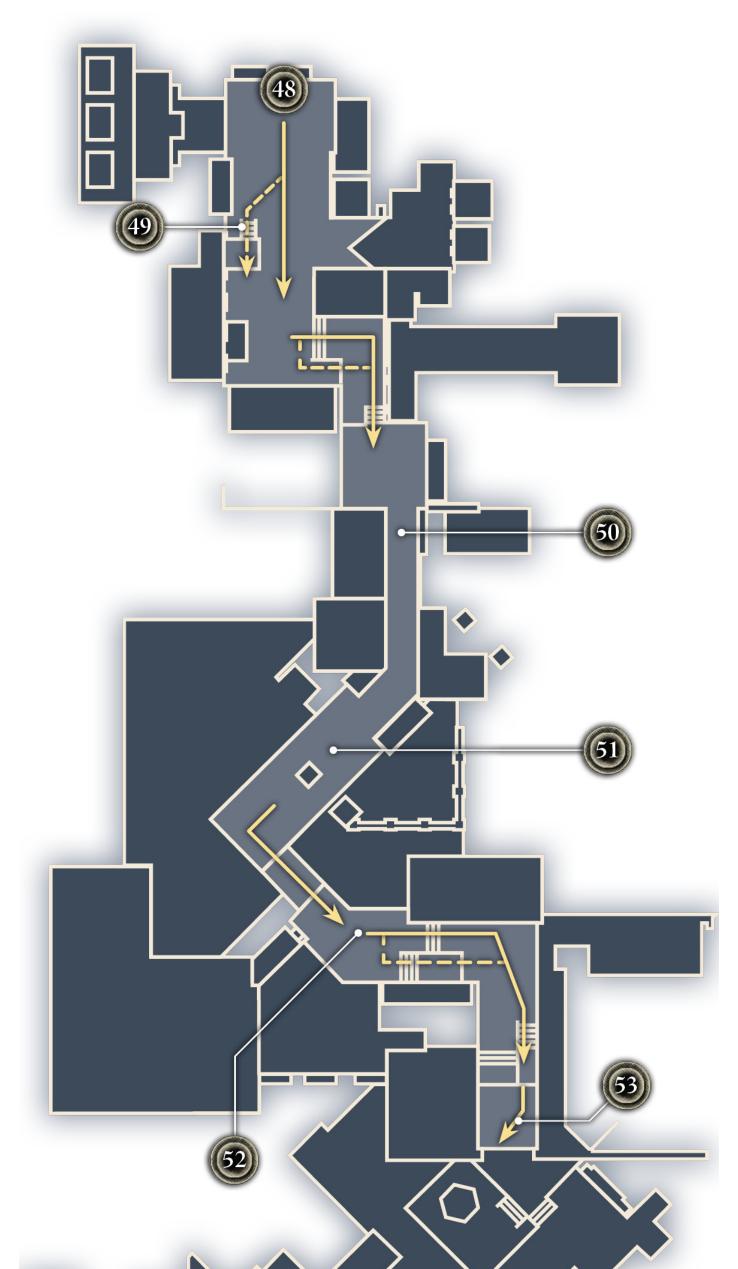

- Cut off Lycan approach angles. Stand in a corner and hold in to ready your aim. This way, you can see any Lycan that rushes you, and quickly adjust your aim to wound it with gunfire. Once you've killed a wounded Lycan with the execution move, hurry to the next closest corner and take up aim again.
- check the meter underneath your weapon readout.) You should be able to put the beast into a downed state before it gets close enough to slash you. • Use your Falchion's Alt-Fire. The M2 Falchion rifle's secondary fire is a concussive air blast that can briefly stun a Lycan,

• Use Blacksight effectively. Once a Lycan starts its charge, immediately enable Blacksight if you have it available. (Again,

knocking it backward. Target a charging Lycan and press for knockback, then quickly pump it full of primary fire bullets. When the creature falls wounded, finish it off with the execution move.

53 Final rooftop

level (48) Galahad spots the creature but it eludes him again, this time by leaping over a closed gate.

When the other Knights finally arrive, Galahad borrows Igraine's Arc Gun and continues his pursuit. After climbing up to street

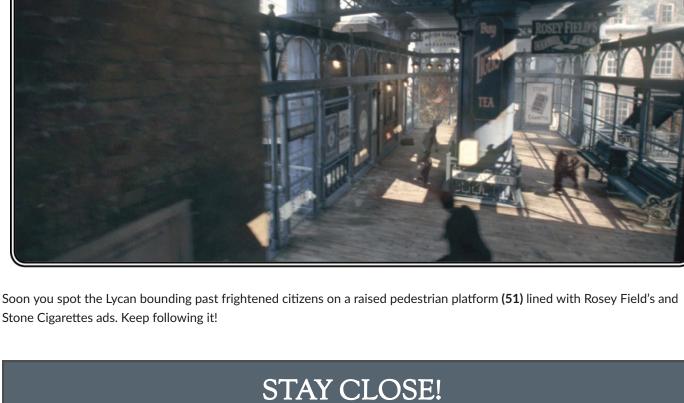

Run up the cart (49) tilted against a shed, and then climb from the shed over the gate. Alternatively, you can also fire the arc rifle at the closed gate to blow it up, and run through the now torn-open gate. Accelerate along the walkways, sprint through

PURSUE THE LYCAN

the brick arch (50), and then hop over a series of low walls until you pull yourself up onto a roof. (The route is linear without dead ends; you can follow the path on our map.)

DIRECTIVE

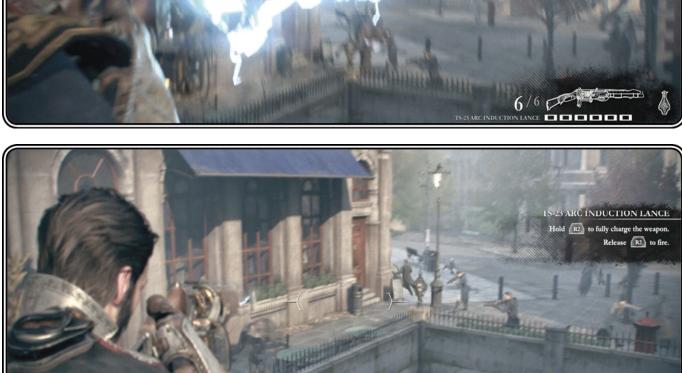

If you let the Lycan get too far ahead of you, you "lose the mark" and get bounced back to the manhole to restart the chase.

Just beyond the platform you pass Igraine and Lafayette running parallel to your route (52) on an upper walkway to the right. When you hear Igraine call out, "We need to press forward!" you know you're almost at the end of the chase.

Hustle around one more corner to see the beast scaling another roof up ahead. Climb up to that final rooftop (53)—it overlooks the city square—and see the beast bounding toward Igraine and Lafayette. Galahad automatically wields the Arc Induction Lance. Quickly! Aim just ahead of the Lycan as you hold in to fully charge the weapon. Then release the trigger to fire the

electrical bolt.

SAVE IGRAINE'S NECK

rendezvous back at Regent Street.

As the Knights gather over the carcass, Perceval reports that he managed to capture one of the Half-breeds and calls for a

If you miss the rooftop shot with the Arc gun, the Lycan attacks and kills Lady Igraine. Don't miss!

The scene switches to Regent Street in Mayfair where Sir Perceval hands over a Half-breed captive to a pair of perplexed London police officers. Commissioner Doyle of Scotland Yard arrives with a piece of evidence that seems, well, "elementary." (Do you think the commissioner's first name might be the same as the founder of the The Order?) As Doyle puts it, given the bloody bedlamite uprising combined with the gruesome Jack the Ripper murders and an increasingly volatile rebellion, "Strange, don't you think, that Whitechapel has become the epicenter of our recent conundrums?"

When the other Knights arrive, they also note the disturbing fact that Whitechapel's underworld seems to be giving safe harbor to the rebellion. And why are so many Half-breeds appearing in Bedlam, the mental hospital? As Galahad concludes: "Something is amiss." The team decides to bring up the matter before the Council of Knights.

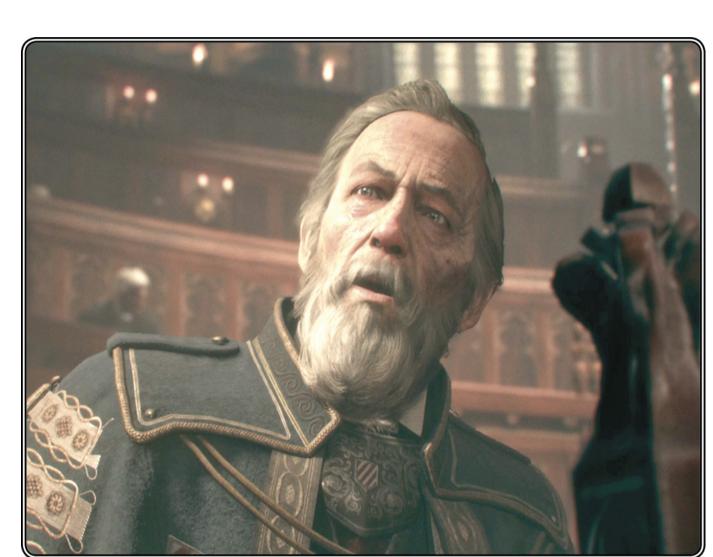

The Fourteenth Day of October, 1886

As this chapter opens, the sonorous voice of the Lord Chancellor addresses the Council of Knights in the roundtable room of the Palace of Westminster. He speaks of centuries of tradition, and of The Order's sacred mission to preserve the balance between Man and Half-breed.

INSPECTABLE ITEMS		
0	Flyer	
2	Communicator	
6	Diagram	
4	TS-27 device	
6	Sniper rifle	

Legend has it that the Lord Chancellor fought side by side with The Order's founder, none other than King Arthur himself. But when Sir Perceval calls for a mission into Whitechapel, the Chancellor dismisses it as a matter for the civil authorities. Not even the intercession of the Lords Darwin, Hastings, and Dunglass can persuade the Council to act in Whitechapel.

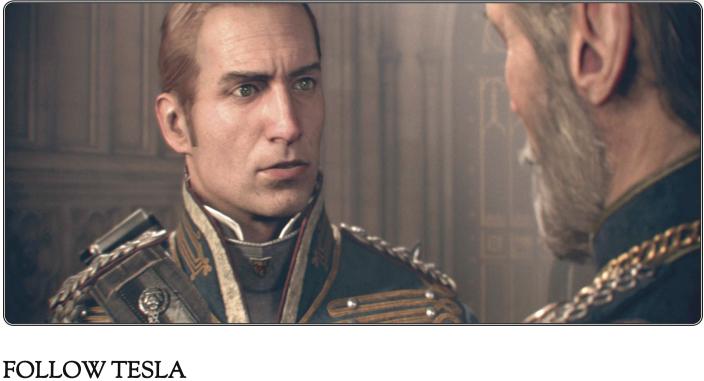

When the meeting ends, walk Galahad completely around the table, stopping if you want to eavesdrop on fellow Knights, including a tense conversation between the Lord Chancellor and his daughter, Lady Igraine. Exit the council hall to trigger a series of scenes.

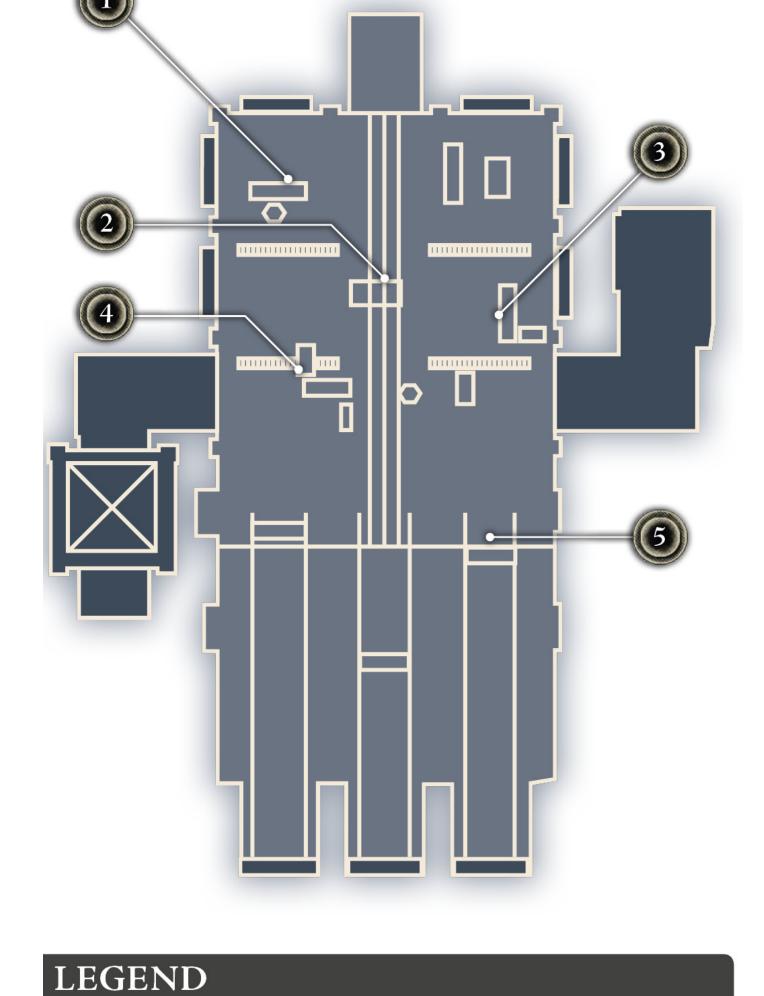

First, Lord Hastings speaks to a peer of a pending voyage across the Atlantic to America aboard the *Agamemnon*, a massive airship built by the United India Company. Then Sir Perceval makes a pitch to Sir Lucan, the Knight Commander, for an incursion into Whitechapel. (Lucan, born Alastair D'Argyll, is also son of the Lord Chancellor and brother to Lady Igraine.) Perceval receives grudging, unofficial permission to make a reconnaissance. And so, as Commissioner Doyle might say, "The game is afoot!"

After Galahad has his own short conversation with Lucan, you hear Nikola Tesla call from just down the hall. Follow Tesla

around the corner to the elevator to trigger the next scene.

LEGEND

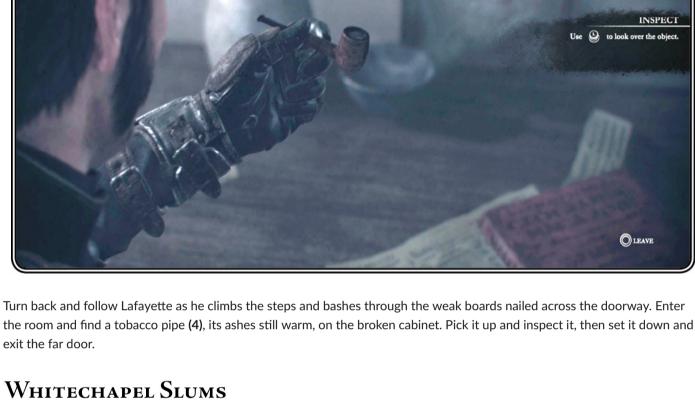

The carriage arrives in lovely Whitechapel—or, as Perceval calls it, "A nest of cutpurses, collaborators and whoremongers." From the start (1), turn around and go past the carriage. Follow the lane to the right a short distance to the crate next to a trash fire. Pick up the newspaper (2) and read about the new Benz motorcar named Clara.

Now come back past the carriage and follow Perceval down the dingy lane. Turn right into the narrow walkway to the marked gate (3). Use the prompt to help Perceval move the wooden beam blocking the gate. Perceval and Igraine go through then Galahad lets the beam drop again. The plan: rendezvous at the hospital.

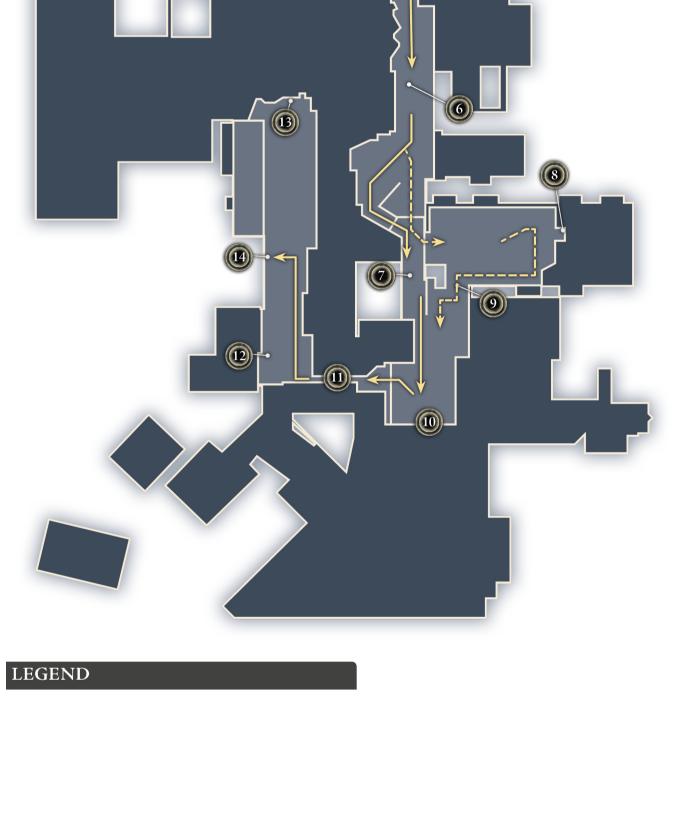

position. Now use

Find Lafayette waiting for you at the bottom of the staircase (5). Follow him down the alley past an outdoor meat/produce stand (6). Approach Lafayette and use the prompt button to trigger a scene: up ahead, a rebel guard stands with his back to you. Galahad picks up an apple from the stand; use the left stick to inspect it then press the prompt button. Lafayette gets into

to toss the apple; Galahad gets the guard's attention. Then Lafayette neutralizes him.

Continue up the alley past the mugging. Here the path splits. You can go around the muggers to the right and climb the stairs (7) or veer left instead and go downstairs through the door marked "Shelter." Take the latter route, which leads into a murky room where unfortunate folks use wooden crates as beds.

Cross the first room to find the flyer (8) that describes the services available at the Deliverance Hostelry: "Rations, Rinse & Redemption." Proceed through the hostelry to its back door (9) and walk out into the courtyard (10) to trigger a cutscene.

- Hurry forward to find cover behind the street barricades (36). The attackers include a rebel sniper in a window above the

the Ferris and Wright hardware store (37). If you take the latter route, Galahad calls to Lafayette to "take the street." Move through the store and climb the stairs to the second floor to find the pair of M84 Marksman Carbines (38) (dropped by the two snipers you took out earlier). Grab one and get extra ammo from the other. Look for grenade pickups as you move through the rooms as well.

Galahad and Lafayette reach a vista point on a high rooftop. Galahad takes the TS-28 Monocular and starts scanning the area. He spots the hospital, two miles west—your destination. Then control is handed over to you.

LOCATE PERCEVAL AND IGRAINE

Use the right control stick to move the Monocular. Swing your view low and to the left to spot a collapsed section of the city's overhead rail tracks. (You'll be there shortly.) Then scan to the right to see electrical bolts from an Arc Induction Lance firing on the street below. That must be Igraine and Perceval.

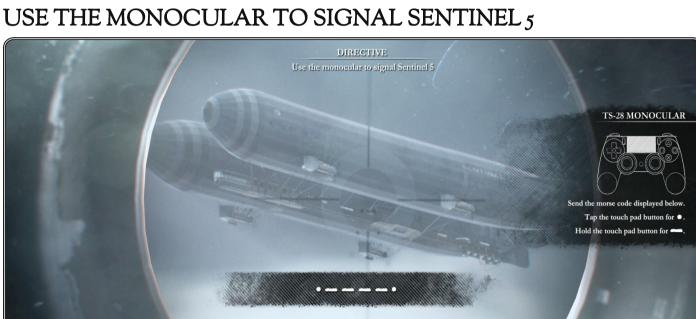

Before you move to join them, Galahad contacts Air Command, looking for standby air support from anyone in the vicinity of Whitechapel. The airship Sentinal 5 responds and calls for visual confirmation.

LOCATE AIRSHIP SENTINEL 5

Scan the Monocular view to the far upper left to find Sentinel 5 (circled in our shot) flashing red and blue lights.

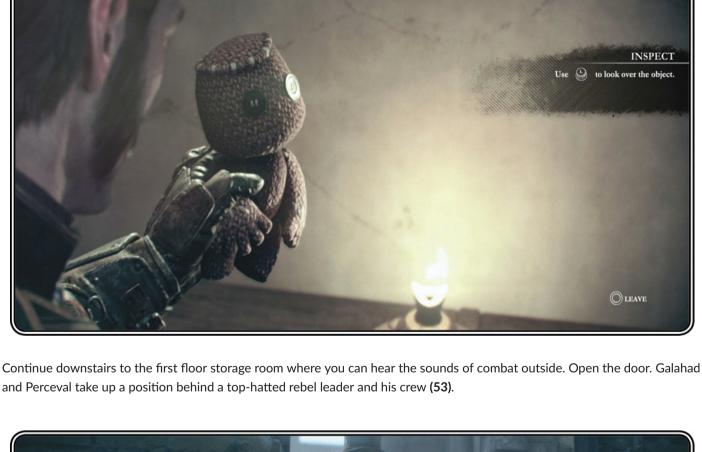

Once the Monocular zooms in on the airship, you must send visual confirmation of your position via Morse code signal: dot, four dashes, dot. (It appears onscreen.) Just tap your PS4 controller's touch pad button for a dot, and hold it down briefly for a dash. When the airship confirms the signal, Galahad automatically follows Lafayette off the roof.

Whitechapel Rendezvous

Move through the ruined building then make the jump across the gap (51) between buildings. (Lafayette almost doesn't make it!) Climb through the window into the apartment and find the odd stuffed doll (52) sitting on a cabinet next to an oil lamp.

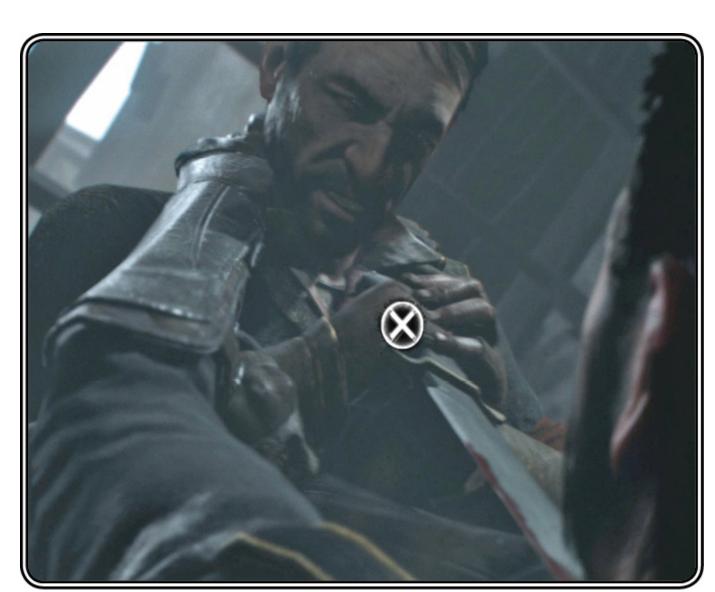

Gun down the rebel leader then hop up and fight your way down the narrow lane to the right. Be patient—the space is tight and packed with many angry gunmen. When you finally clear the lane and reach the wall at the end, jump over it.

Galahad crashes through the decrepit roof below (54) and lands on a rebel firing his automatic rifle. Be ready to push when the prompt appears as the rebel pulls his blade on Galahad. If you miss this prompt, you can still recover as the rebel pins Galahad to the floor. Start tapping until Galahad pulls a reversal and ends the threat.

Another rebel gets the drop on Galahad but Perceval saves the day with a concussive Falchion blast. This triggers a new scene: Perceval points out that these rebels are particularly well armed. In fact, their weapons seem to have come from The Order's own arsenal!

Ignite thermite in the distillery

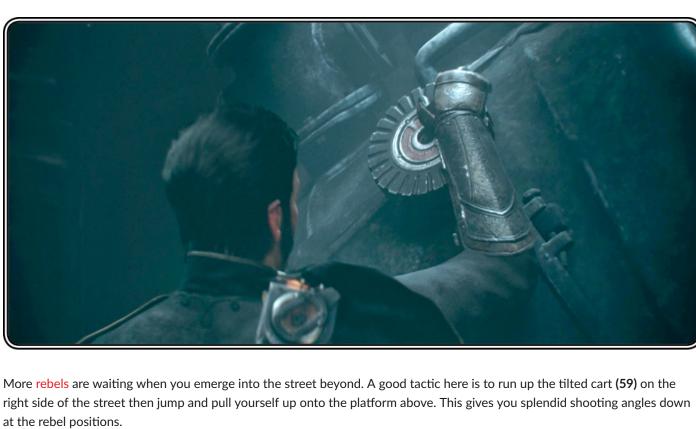

the button indicated to grab him with Lafayette. Galahad automatically wields his pistol as you drag the constable to safety. Start picking off the rebels up on the G. Miceli & Son balcony. Get headshots for quick kills, if you can. Nail them fast or you'll get a grenade dropped in your lap.

Lafayette gives colorful expression to his frustration with London's city planners: another deadend! (Note the rebel's raven & white tower insignia painted on the wall ahead.) Galahad grabs the Monocular and pinpoints a weak spot in the elevated tracks. As he prepares to move forward, you see an armored rebel heavy wielding a Thermite Rifle move into position on a raised platform (63) up ahead. That's not good. You need to reach that platform to access the tracks.

Sling thermite dust at the armored goon. When his thermite clouds appear near you, hustle away before they ignite. Note that an explosive barrel sits just to the right of the rebel heavy. When he foolishly drifts over near the barrel, explode it with a flare or pistol shot to take him out. When the street is clear, follow Perceval to the cart (64) lying on its side under the platform.

HELP PERCEVAL WITH THE CART

Approach the left side of the cart and press the button indicated to help Perceval pull it onto its wheels. Follow Perceval up the

PLANT THERMITE ON THE BRIDGE

tilted cart, jump to the ledge above, and pull yourself onto the platform.

From the platform, climb the stairs up into the room. You need a Thermite Rifle for the next step. If for some reason you swapped yours out, another Thermite Rifle is on the room's floor with an ammo crate too. Hop out the window and plant a thermite cartridge on the track support beam (65) where indicated. Then shoot it with the rifle's ignition flare...and watch the glorious collapse.

Move forward and jump to swing across the gap to the next balcony using the metal lamp strut. From this balcony you see your fellow Knights rushing down the street below.

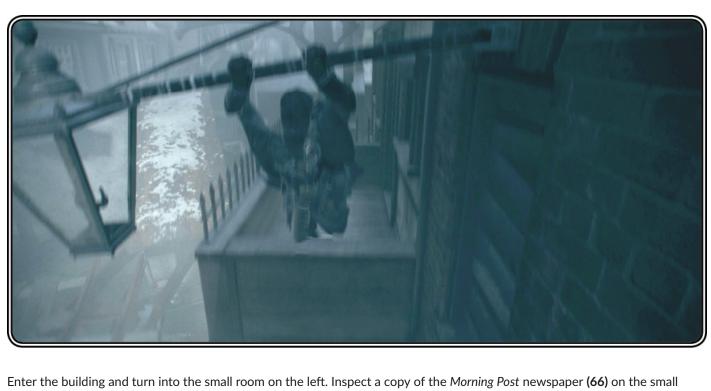

table near the opposite door—unrest is spreading across London, and the Queen is nowhere to be seen. Exit the room, head downstairs, and leave through the red door to trigger the chapter's final scene.

STOUT & ALES

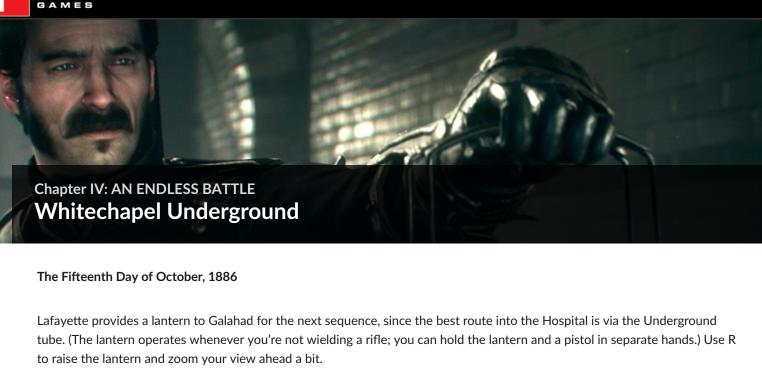

The four Knights rendezvous at the hospital gate. The police refuse to move in, for safety reasons. Soon, those reasons become clear: a Half-breed pack is roaming the grounds. Dispersal is required, so Galahad calls in air support. The airship *Sentinel 5* appears and makes a sonar payload drop. Then Galahad and Igraine deploy into Bedlam.

After finally vanquishing the Lycan Elder, Galahad rushes to the fallen Igraine. He carries her into the hall where he spots a fleeing rebel leader—the same one encountered earlier in the Whitechapel street and brothel. Then Igraine directs him into the Psychiatric Ward; there's something she wants Galahad to see.

SEARCH THE REBEL HIDEOUT

After Galahad lays Igraine on a ward bed (30), start searching the rooms. You find a number of things to inspect, including some dead ends. First, head left toward the corner with huge wall maps of London and The World, strange things to find in a psych ward. Inspect the photo (31) of the United India Company's board of directors lying on the cabinet. Note that Lord Hastings is circled—clearly a rebel target.

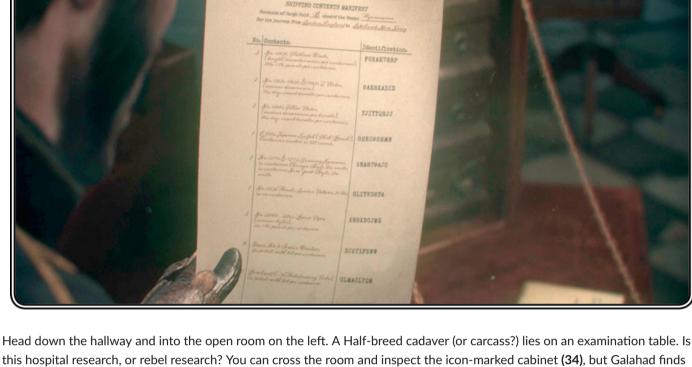

of value.

Now move across the room to the long table (33) to find two Inspect icons. The left drawer produces nothing of value, but the paper on the right side of the desk is the Agamemnon's shipping manifest, showing all the cargo destined for the Americas.

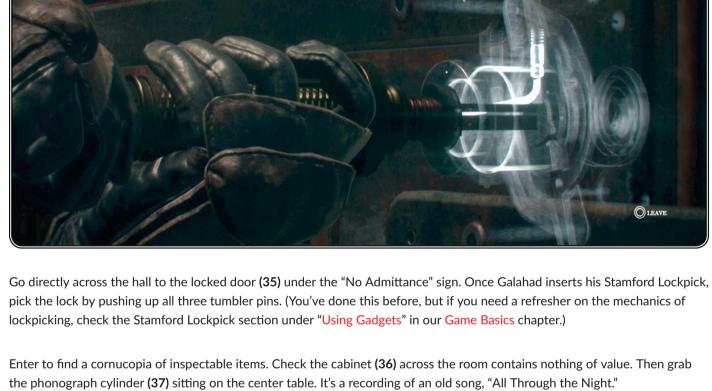

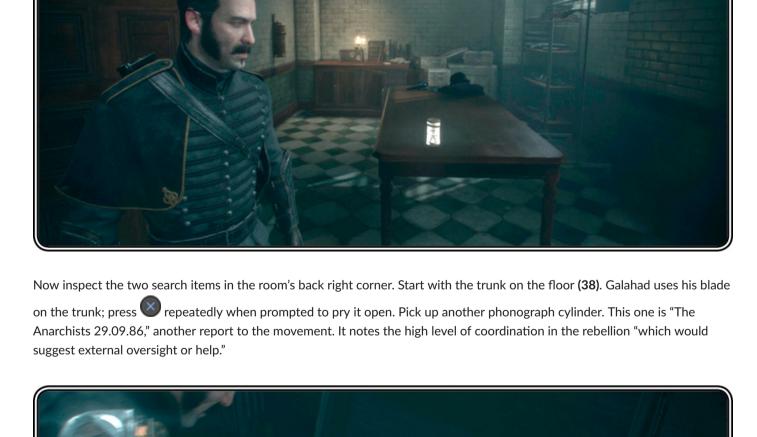

nothing of note inside.

GET IGRAINE AND LEAVE THE HOSPITAL

Now you can return to Igraine's bed (40). Press to trigger a cutscene: Galahad helps Igraine out of the ward. As he does so, he reports to Perceval on their discovery of the rebel staging area, and the potential threat to Lord Hastings and the United India Company.

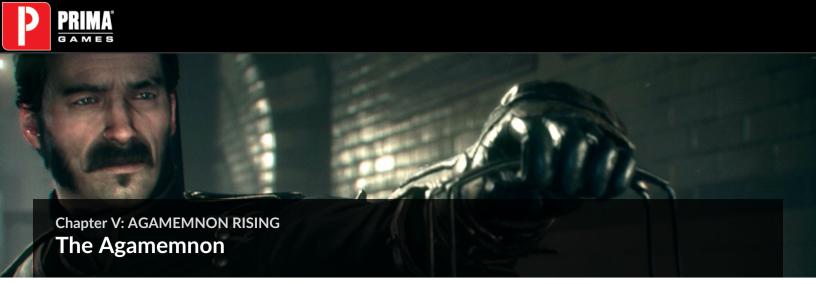

Watch the chapter-ending scene as the Knights reunite and Nikola Tesla dispenses equipment. Lafayette reports that the Agamemnon, the flagship bearing Lord Hastings to America and clearly targeted by the rebels, has already departed. Perceval fears that the guard detail aboard is compromised by rebel infiltration, so the Knights must "unravel" the situations themselves. The question remains: how to get aboard the Agamemnon? The answer is floating above them.

INFILTRATE THE AGAMEMNON

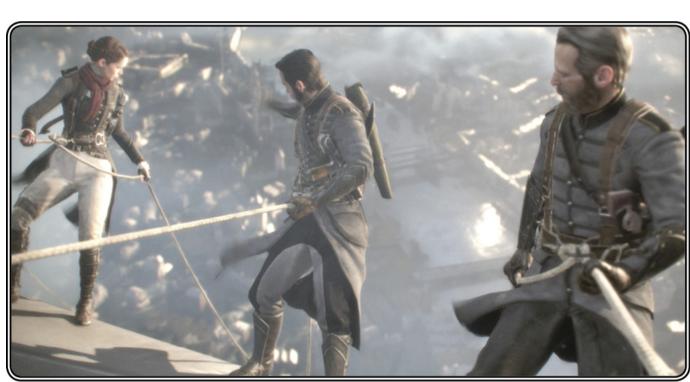

Engineering

UPPER ENGINEERING

LOWER ENGINEERING

First, you must rappel down the side of the Agamemnon's hull to reach the engineering access hatch. Perceval orders the team to start their descent. Move the left stick in the direction you want Galahad to go, relative to his position on the screen. Then, when Perceval calls "Let's go!" press We to kick out away from the hull and slide down the rope. Repeat until you reach the struts near the propeller housing at the bottom of the airship.

Now push the left stick toward the hatch to move Galahad along the struts in that direction. When you finally reach the hatch, a quick cutscene shows the team hustling into the massive engineering hold. Safe! For now...

Perceval sends Galahad and Lafayette to secure the airship's cockpit while he and Igraine try to mingle with guests to provide "eyes on the ground." His rules of engagement: do what you must, time is short. As the teams move out, Galahad pulls Perceval aside to ask about the old man he met in Mayfair and Whitechapel. The answer: "Patience, old friend. All in due time."

hold. Follow Lafayette down the first staircase and pause to listen to the guards below. Then proceed to the closed hatch and ladder (3) that leads down. Unfortunately, the hatch has a powerful magnetic lock.

Perceval calls for stealth mode as the Knights reach the interior door (2) then deploy into the upper level of the engineering

DISRUPT POWER TO THE MAGNETIC LOCK Facing the hatch, turn right and follow the catwalk to the end. There you can inspect a broken music box (4) sitting on the

wooden handcart. Interesting, but useless.

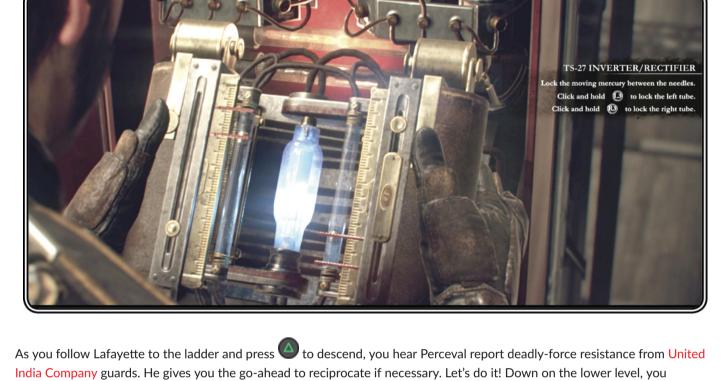

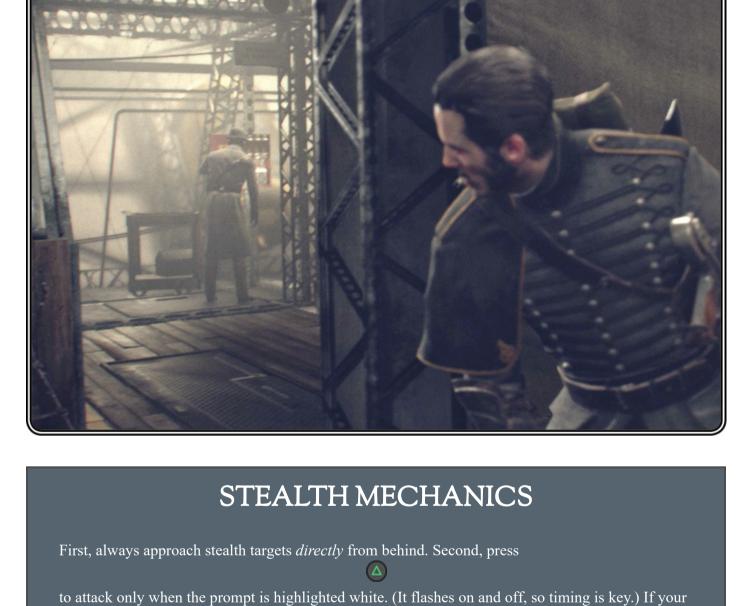

your TS-27 Inverter/Rectifier. Galahad automatically hooks up the clips and opens the device. Now use it the same way you did in Tesla's lab, trapping the two bouncing mercury blobs between the needles. This inverts the current, overloads the circuit, and disables the magnetic lock.

Go back past the hatch and approach the red power box (5) at the other end of the catwalk. Press the button indicated to wield

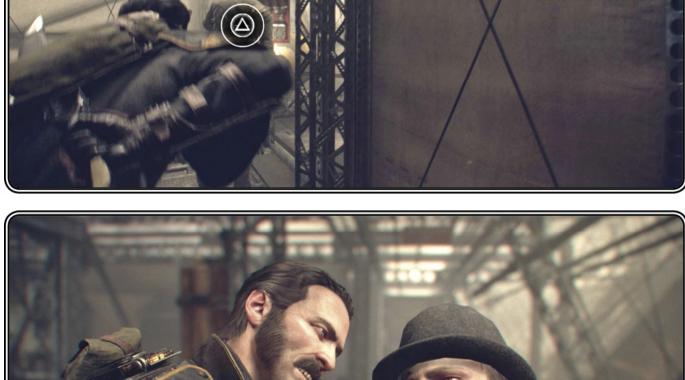

automatically take cover (6) and assess the situation.

target turns enough to catch a glimpse of you, or you mis-time your attack, the consequences for Galahad are always dire.

Creep up behind the guard tinkering with the power box (7). When you get close, a flashing prompt appears. Carefully time your button-press for when the prompt is highlighted white. If you strike while the prompt is dimmed, the guard turns and shoots you. This boots you back to the checkpoint for another try at your stealth approach.

overlooking the foyer. He assembles his M84 Marksman Carbine, and employs its scope to gather additional intelligence.

Hastings, perhaps for added security purposes. Galahad moves upstairs to a better vantage point (22) on the balcony

Lucan and Hastings stand on the foyer floor near a display (23). United India Company guards are posted around the room, but some are rebel assassins in disguise. As Galahad points out, the stolen company uniforms stashed in the London Hospital didn't have proper insignias on their shoulders. So your task now is to find the guards with no shoulder patches.

A total of four guards stands in the foyer. Get each guard centered in the sniper scope and press to zoom in. Then press whenever the prompt appears to make an examination. Note that some examinations require two presses.

IDENTIFY THE DISGUISED REBELS

Here are the locations:

until he turns to show his patchless shoulder. Then press again to verify that he's rebel to Perceval.

• One guard stands at the top of the staircase to the right (24). He's a bona fide Company guard with a patch.

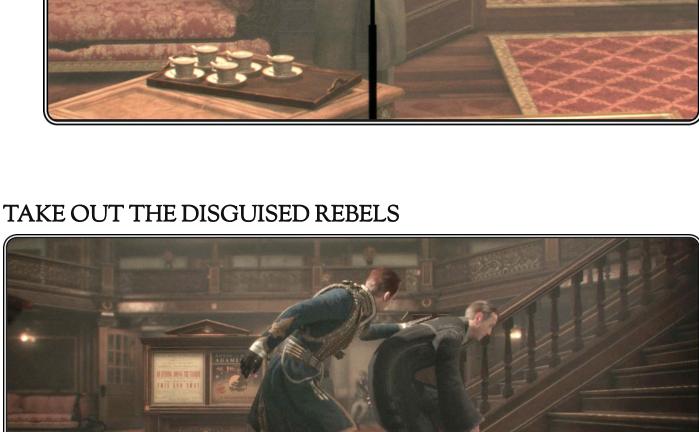

reappears. Galahad reports to Perceval.

• The guard at the bottom of the same staircase (25), nearest Lord Hastings, stands with his back to you at first. Press

and keep watching in zoomed view until the guard turns around. There's his patch! Press again when the prompt

• Use the same process with the guard at the railing (26) up on the balcony opposite from Galahad. Press and wait

Use the sniper rifle to nail the floor level rebel. (Hurry! If you wait too long, he strolls over and assassinates Lord Hastings.) Shooting the imposter triggers a cutscene: Galahad calls out a warning to Lucan, who hustles Lord Hastings upstairs to safety.

calls out: "Time for Plan B!" The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Furone. All rights reserved.

Meanwhile, other rebels start pouring into the foyer from an upper doorway, taking out the Company guards. One of them

STOP THE REBELS FROM COMING INTO THE FOYER

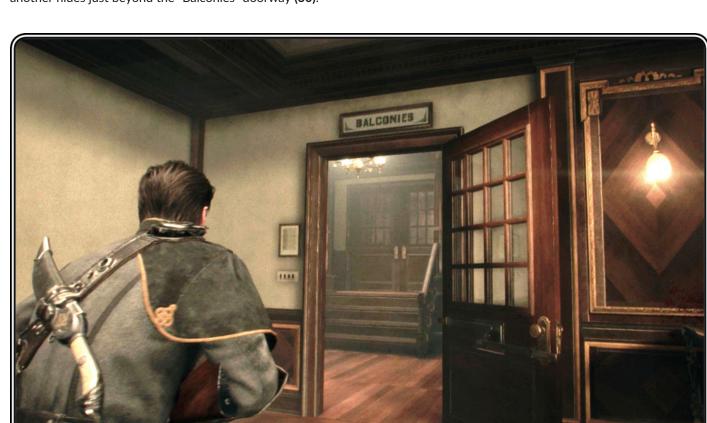

Start picking off rebels from your sniper post using the M84 Marksman Carbine. Use the scope's zoom function to target headshots on rebels. You can nail targets efficiently even if they're using cover. Stay upstairs for the first wave, moving along the banister to get better shooting angles, if necessary.

When you find no more targets from the balcony, swap your sniper rifle for a pistol. Be ready! Descending the staircase (29) to the ground floor triggers a second rebel attack wave. This one includes an aggressive shotgunner with a powerful Coach Gun who rushes across the foyer for close-range attacks. (If you're still equipping the sniper rifle, these in-your-face rushes can give you fits!) Watch out for a rebel grenadier as well.

You must clear the foyer completely, including two enemies upstairs on the far balcony. One is at the top of the stairs, and another hides just beyond the "Balconies" doorway (30).

When this last foe falls, a brief cutscene plays: a powerful explosion rocks the airship, and Perceval reports a bomb detonated on the front engine. Suddenly, the same rebel commander you saw in Whitechapel appears and orders her troops to fall back. She orders a grenadier with a backpack to follow her, and they slip out a side door.

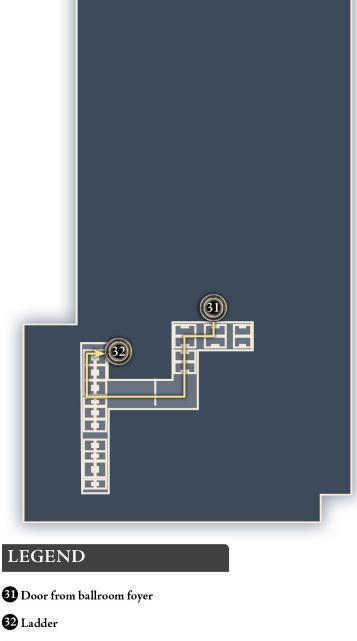

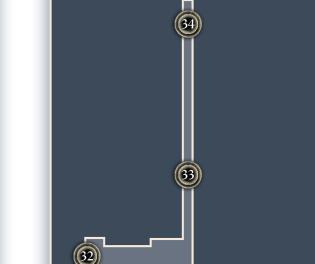

Your new objective is to follow this "mark" before she escapes. More rebels sweep into the room to cover their leader's exit. As you fight them, you hear the Agamemnon's officers calling evacuation to the lifeboat decks. Gun down the rebels and then head

PURSUE THE REBEL LEADER AND HER ACCOMPLICE

out the side door (31). It leads into the propeller housing.

3 Hop strut

- 34 Tanks (rebel smokescreen)
- grenadier escape down a catwalk. The soldier tosses a smoke grenade behind them for cover as Galahad reaches the level.

appears a second bomb is somewhere aboard the ship.

Follow the passage to the ladder (32) and descend it to trigger a quick cutscene: the rebel commander and her bandanaed

When control returns, move down the ramp, turn left, and follow the long narrow catwalk toward the smoke. Press 🕙 to

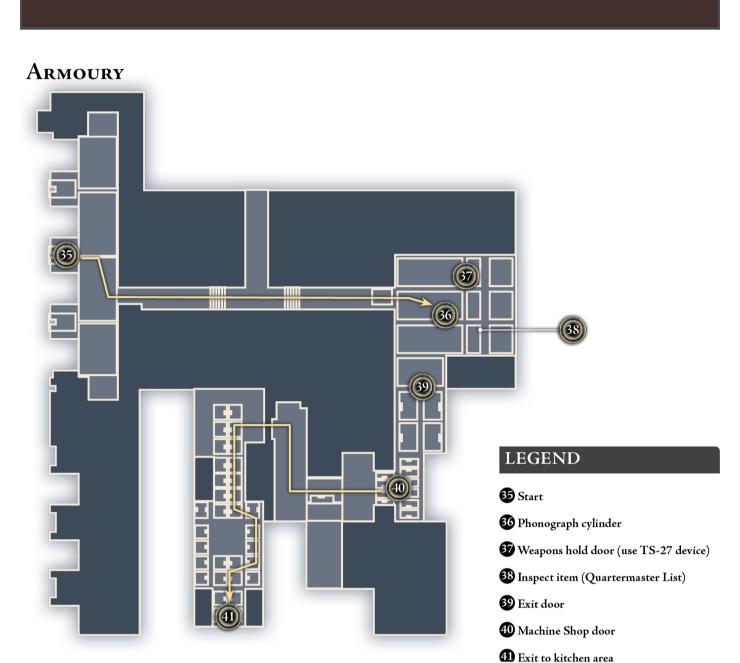

hurdle the strut (33) halfway down; Galahad automatically slides sideways through the smoke-filled tanks (34). This triggers a long cutscene: Galahad reports he's lost the mark, and Perceval calls him back to the lifeboats to face a bigger problem. It

Here you cut to the hectic scene on the airship's Starboard Emergency Deck. As panicked passengers herd into aerial lifeboats for evacuation, Lucan and Perceval wrangle over the situation. Galahad orders Igraine to find Lafayette in the cockpit and evacuate. When the button prompt appears, press to release the lifeboat carrying Lucan and Lord Hastings. Then Perceval reports that a nearby guard station armory is available for plundering before you hunt down the rebels.

MORSE TITLE

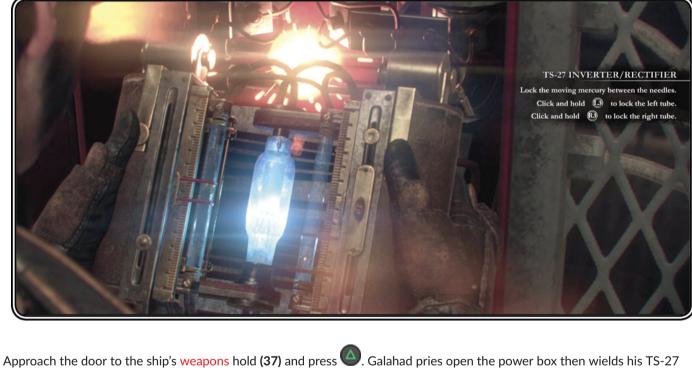

This scene's title is a series of Morse Code messages. "CQD" and "SOS" are both standard radio distress calls. "DE" means "from" or "this is." And "GFAXX" stands for the Agememnon.

FIND THE REBEL SABOTEURS

From your starting spot (35) when the cutscene ends, follow Perceval through the open door under the Armoury sign and down the walkway into the Ship Security area. Find the "Evacuation Procedures" phonograph cylinder (36) on the desk. If you listen to it, note the "class-prioritized order of evacuation."

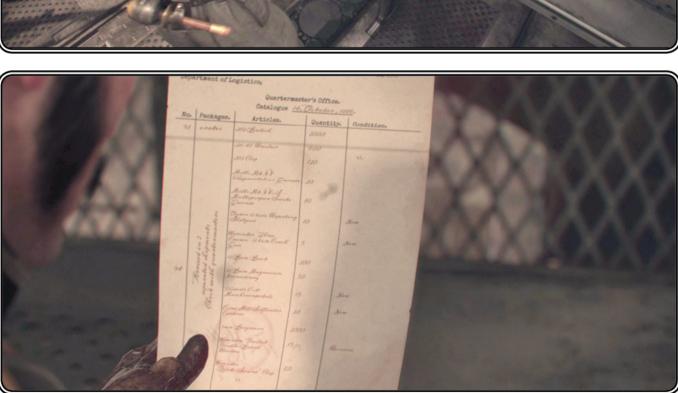

Inverter/Rectifier and hooks up the clips. As before, trap the two mercury blobs between the needles to disable the door lock. Then enter the weapons hold and take your pick of armaments. Grab the ammo crate after you select weapons.

Finally, inspect the piece of paper, a quartermaster's list (38), sitting amongst the tools on the last table. As Galahad points out,

the ship is stocked with enough munitions to support a small army. Clearly, the United India Company is very serious about

security.

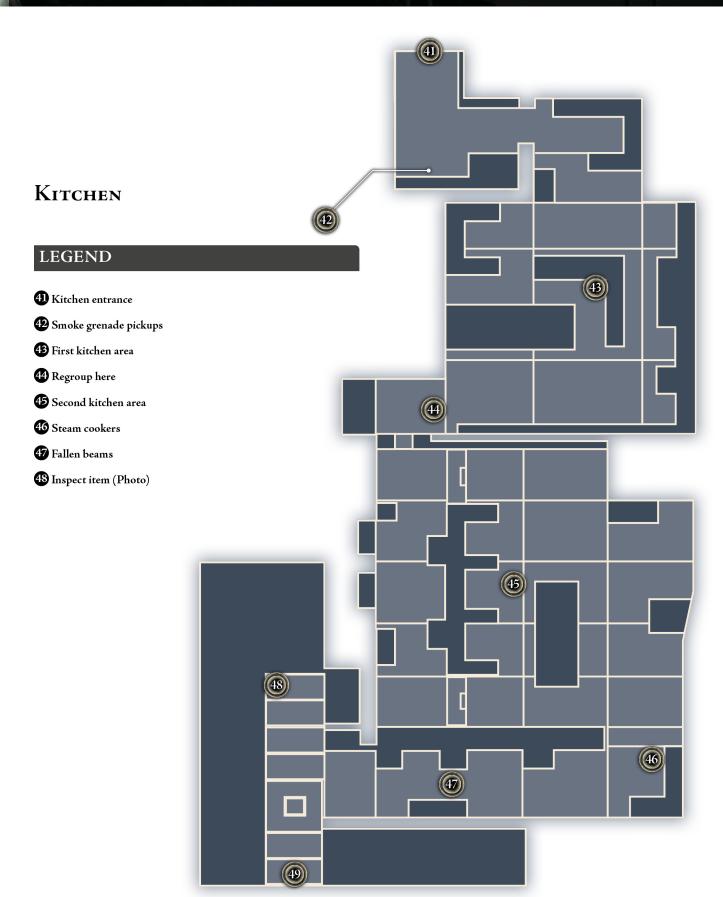

Work your way through the machine shop (see our map for the path). When you reach the far exit door **(41)**, you hear a rebel voice shout that he's "moving to the second device." That's your man! Open the door to see two rebels scurry away. Follow

Exit the weapons hold, turn right, and follow Perceval through the exit door (39). He tells you to be ready for more rebels: wise words. Open the nearby Machine Shop door (40) and examine the dead guard on the floor just inside. Perceval says, "All this to

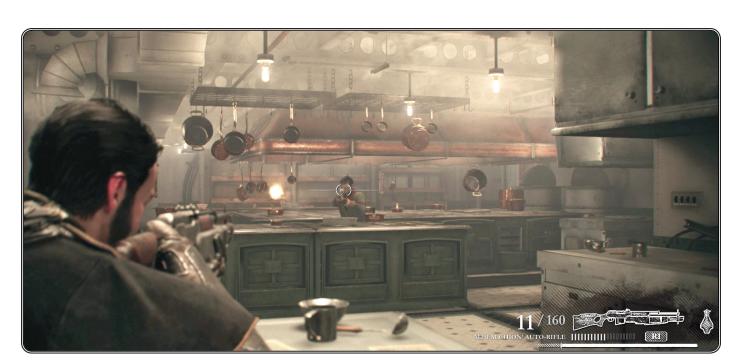

The Order 1886 © 2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The

Order" is a trademark or a registered trademark of Sonv Computer Entertainment Europe. All rights reserved.

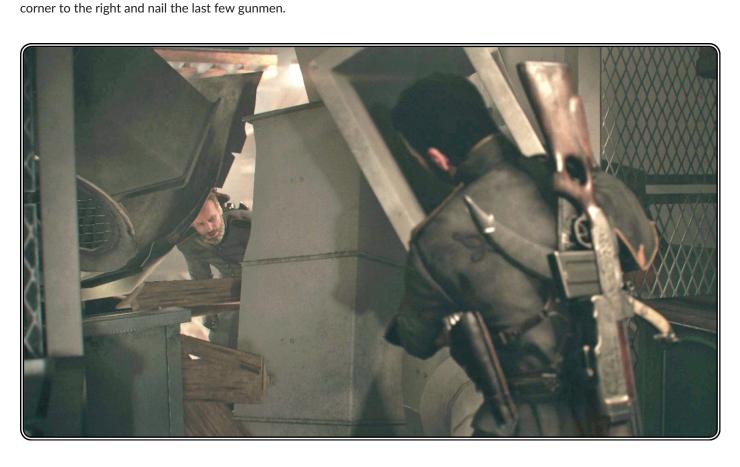

This is a tough fight, so grab the pair of smoke grenades stashed in the Dry Goods Storage alcove (42) as you pass. Then move into the first (43) of two kitchen areas and take cover. Toss a smoke grenade then push forward and eliminate disoriented rebels. Watch out for shooters popping out from nooks on the left side of the room; also beware the shotgunner with a Coach Gun who rushes you. When you've cleared the first kitchen, rejoin Perceval in the small connecting alcove between kitchens (44).

Now move into the second, bigger kitchen (45) and attack using the same basic approach. A center wall section splits this area into two parts. Move left into the big cooking area and toss another smoke grenade greeting, then start shooting. This is a perfect place to use your Blacksight ability. You can clear the entire space in one Blacksight cycle! Then advance around the

DICING AND SLICING

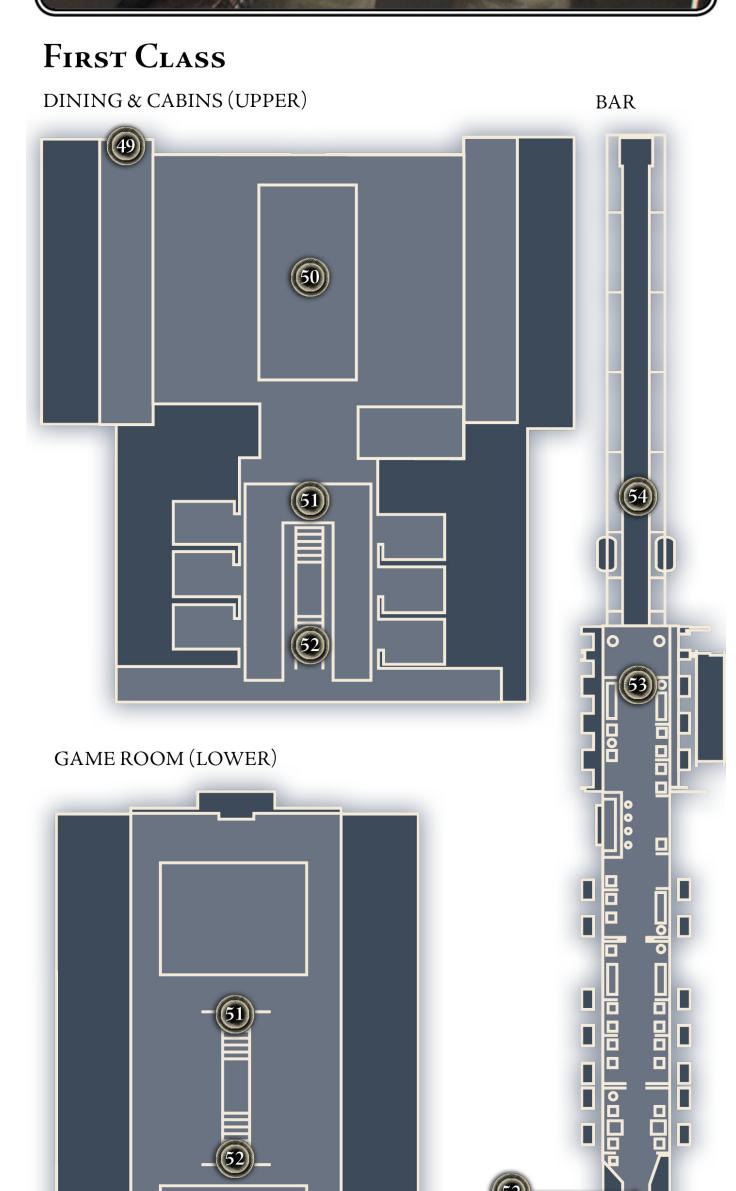

If you get directly across a cooktop from a rebel, you can grab him for a melee kill!

Exit the kitchen past the steam cookers in the far corner (46) into the Washing area. Here you find fallen ceiling beams (47) obstructing the way. Move next to Perceval at the obstruction and press to trigger a new scene. Perceval and Galahad struggle with the debris...and then a further collapse suddenly cuts them off from each other.

Continue alone into the next corridor, turn right, and inspect the photo (48) of the Agamemnon's friendly chefs. Given what you know of the ship's evacuation procedures, these guys are probably at the bottom of the lifeboat list, so good luck to them. Turn and exit via the door to the First Class Dining Hall on the corridor's other end (49).

49 Door from kitchen

LEGEND

- 50 First Class dining
- **51** First Class cabins
- 52 Stairs to Game Room & Lounge **33** Rebels
- **5** Rebel grenadier
- This is the First Class dining hall (50). Look through the windows on the right—flames engulf the airship's front engine. Shots soon ring out across the dining hall from the hallway (51) lined with First Class cabins. More tough rebel fighters try to slow

your pitiless advance. Scour them out of the cabins. When the cabins are clear, Perceval reports that he's at the ship's stern and will sweep back towards you.

Head downstairs (52) to the Game Room and run around to the next flight of stairs. Descend those to the Lounge and start moving through the long, narrow room. Be ready! Two rebels wait at the far end (53); one is armored and wields a Coach Gun. If you have difficulty with him pick up the M81 Maschinenpistole near the entrance to the room. Dispatch the rebels and then

Unfortunately, trapped men often make desperate moves. Watch the dramatic confrontation: two powerful Knights face off against a poor lower-class lad with a burning vision of justice.

Oh the Humanity

Chapter VI: IN THE DARKEST HOUR

The Fifteenth Day of October, 1886

Galahad regains consciousness in a nightmarish inferno. The fiery wreckage of the fallen Agamemnon has also laid waste to the magnificent Crystal Palace in Hyde Park.

Airship Ruins

LEGEND

1 Start
4 Communicator
2 Path
5 Perceval
3 Fallen man

Immediately press to drink Blackwater. Once Galahad recovers, push forward through the blazing wreckage and veer right at the intersection (2). Soon you trigger a quick scene: a poor soul staggers aflame down the slope. Keep pushing ahead as Igraine attempts contact. Galahad's communicator is shot, so he tosses it aside.

Veer right again to find a fallen man (3) who, at first glance, appears to be Sir Perceval. When you inspect him, however, you see it's a United India Company guard—an actual one, with the insignia on his shoulder.

Continue your painful excursion through falling debris until you reach the communicator (4) on the ground. Pick it up to trigger a short cutscene: again, Galahad hears Igraine calling over the link, and tries to answer. Then he spots something through a collapsing section of hull.

When Galahad grabs a fallen strut, tap repeatedly to tug at it. The prompt appears three separate times before Galahad manages to yank the strut free, clearing the path ahead. This triggers the scene's final cutscene: Galahad finds Perceval, at last (5).

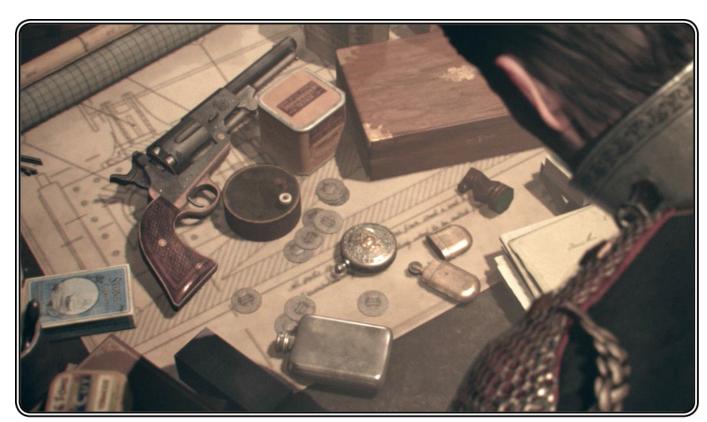

After the fadeout, you see Galahad, Lafayette, and Igraine riding the elevator down to Nikola Tesla's laboratory in the Palace of Westminster. When they arrive, Galahad sends the others back up to the Council, saying he'll join them in time for "the succession." Then he proceeds into the lab.

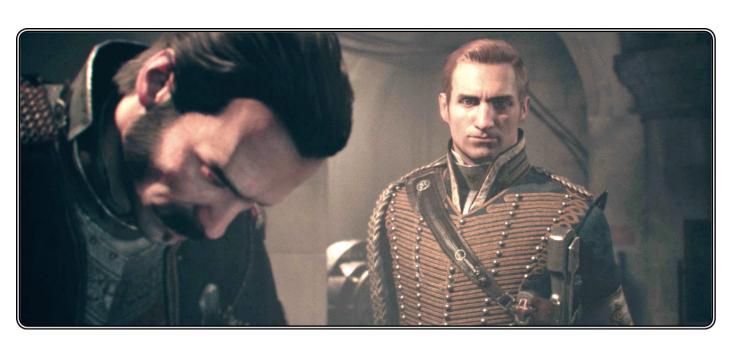

Tesla offers sincere condolences; he's collected a number of Perceval's personal items. Galahad picks up Perceval's pocket watch, engraved with the insignia of The Order—the tail-devouring dragon, the Ouroboros, symbol of eternal return and renewal. Use your left controller stick to examine the watch.

When you finish, Sir Lucan appears and the cutscene continues. The Knight Commander suggests that Galahad avoid dark thoughts and concern himself with "the upcoming solemnities." But too many questions remain, and Galahad is not one to sit and cogitate for long. Lucan also reports that Lord Hastings and the United India Company are grateful for the intervention that saved their lives.

The Seventeenth Day of October, 1886

This chapter is actually a long cutscene, so sit back and enjoy the "solemnities" as The Order carries out its time-honored rite of succession.

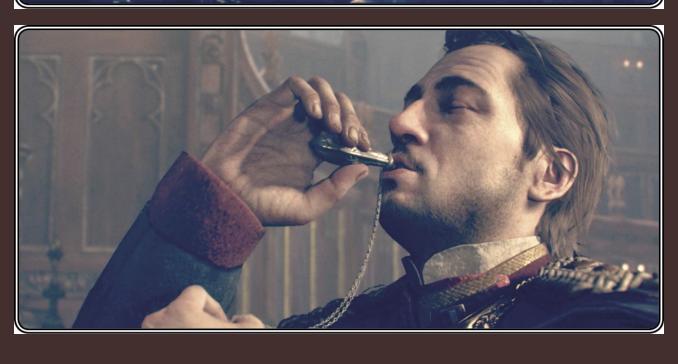

The Knight called Sir Perceval, born Sebastien Malory more than six centuries previous, appears before the Council of Knights one last time. Then both his name and his Blackwater flask are passed on to a most worthy successor.

LIFE, REPLENISHED

During this scene, you also learn how the life-saving Blackwater is replenished.

When the new Knight is seated at the Round Table, the Lord Chancellor calls the Council Chamber to order. Then he turns the succession ceremony into a cautionary tale, warning that those who defy Council mandates with rogue actions walk a dangerous path. But Galahad can hear only so much disparagement of his friend before making an ardent defense.

Suddenly, a thundering explosion from outside rattles the chamber, shaking even the great chandelier hanging above. A Royal Army officer bursts in with news that the rebels have ambushed and trapped Lord Hastings' carriage on the nearby Westminster Bridge. All Knights, to arms!

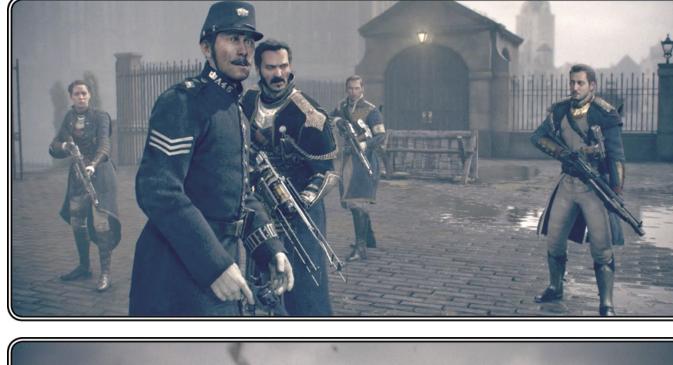

The Seventeenth Day of October, 1886

down as the Knights rush out to meet the threat and rescue Lord Hastings on the Westminster Bridge.

This chapter literally starts with a bang, as rebels with powerful ordnance rock the Palace of Westminster. More bombs rain

The Knight Commander orders his charges to take defensive positions on the bridge. Sir Lucan defers tactical command to Galahad, who grabs a TS-23 Arc Induction Lance for the fight. As the Knights arrive in the midst of chaos, a sergeant reports that Lord Hastings' carriage has been hit in the middle of the bridge. Galahad and team push forward—just as another rebel cannon strike shatters the bridge's equestrian statue.

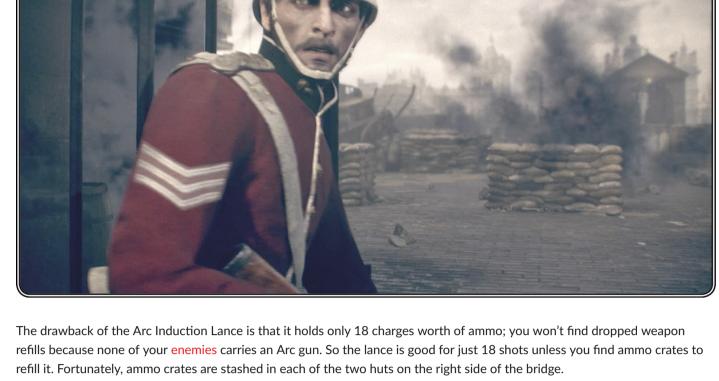

You start out in cover behind a sandbag implacement (1). The Arc rifle is an extremely powerful weapon with near-perfect accuracy. Don't waste time with specific aiming—just charge it up, point it in the general direction of your target, and discharge

CLEAR A PATH TO THE CARRIAGE

when ready. The electrical surge bolt instantly eviscerates any flesh in its path. It's a true one-shot kill, delivering damage of 500 at "volume" (the area of damage inflicted expands over distance).

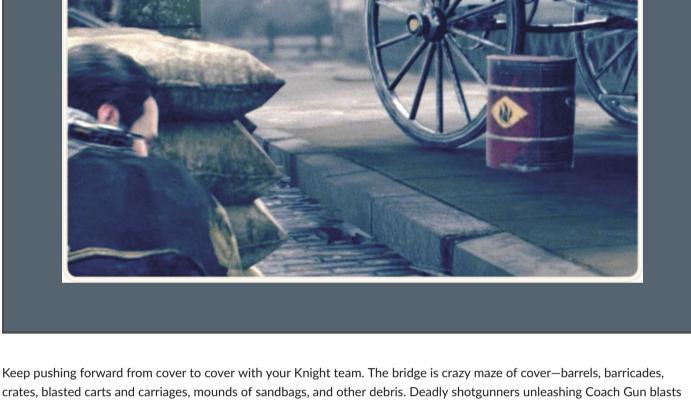

BARRELS ON THE BRIDGE

Three explosive barrels (B) can be found on the bridge. Target them with your secondary weapon when rebels are near them. Don't waste Arc induction rounds on barrels when a simple pistol shot

fellow can actually survive the first Arc shot you fire into him!

does the trick.

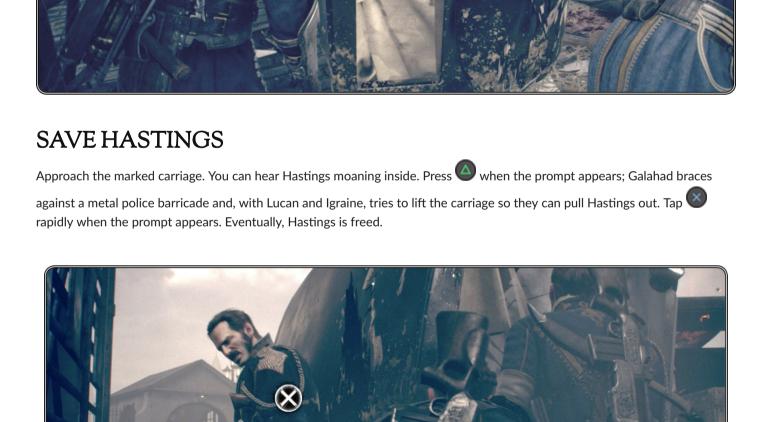

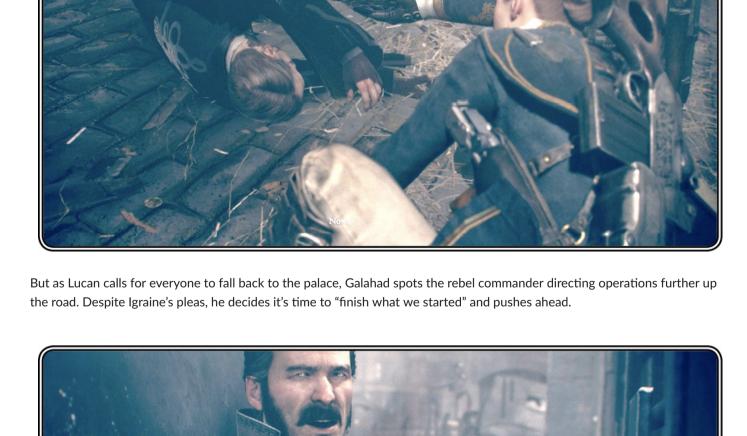

can pop up suddenly or make a rush from hidden positions. So proceed carefully, and check your flank often.

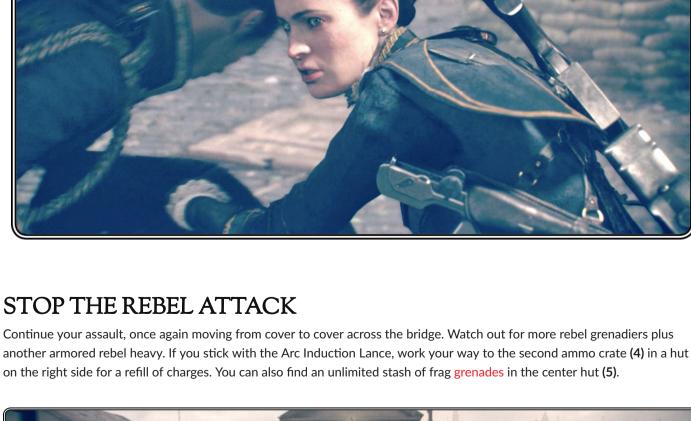

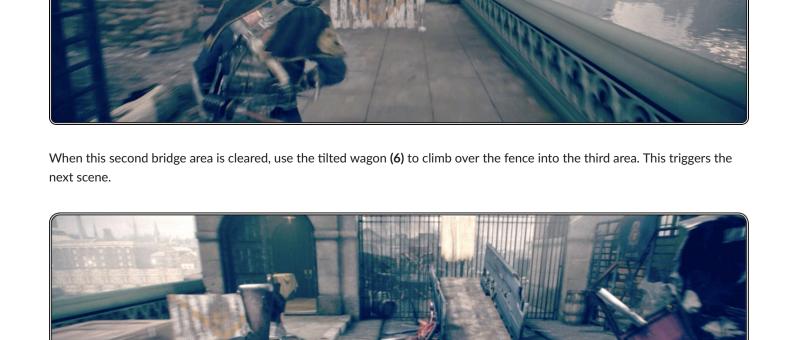

When you finally reach the carriage in question (3), you find it turned on its side. A rebel crouches on top, trying to pull the door open. Next to it, a Green Hill & Ferris St double-decker trolley car has been turned into a rebel nest, including a tough rebel leader up on the top deck. Patiently neutralize it with Arc blasts. When the last rebel drops, you hear Igraine call out,

"Clear! We've retaken this portion of the bridge!" Now you can safely examine Hastings' upended vehicle.

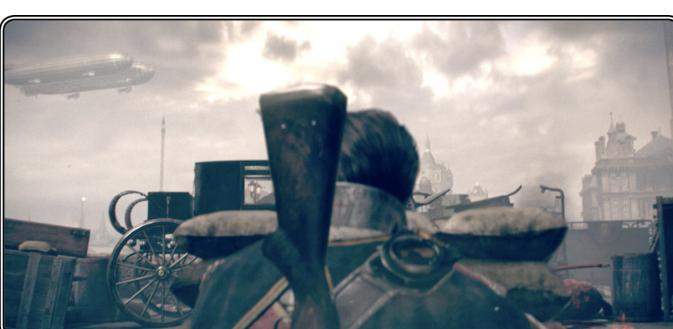

Order" is a trademark or a registered trademark of Sony Computer Entertainment Furone All rights reserved

Watch as Galahad spots a rebel lieutenant deploying his crew. Galahad contacts the airship *Sentinel 3* and calls for air support. The airship spotter reports a rebel wielding a shoulder cannon up ahead on the bridge. Ah, so *that's* the source of all those explosions! This gives you a new directive.

TAKE OUT THE ARTILLERY

Once again, start fighting from cover to cover as you dodge cannon shots and dash through the obstructions and sandbag piles. Find another stash of frag grenades (7) in the last hut on the right side, but be ready for a shotgunner who hops into your path as you approach the hut. Gun him down, grab some grenades, and start flinging them liberally.

Weave your way back and forth across the bridge until you clear out all the rebels in the area. Then proceed to the bridge's left side. Up ahead, the rebel artilleryman (8) continues to blast away with his TS-29 Magnetically-Assisted Cannon from atop another trolley.

Nail him to end the threat and trigger a cutscene: Galahad climbs atop the trolley, takes up the shoulder cannon, and decides to take on the entire rebellion by himself.

ELIMINATE THE REMAINING REBELSSling glorious cannonfire into the rebels below. You have unlimited ammo, but Galahad auto-reloads every three shots.

Attackers move in from multiple directions and set up all across the bridge. Some take up positions atop the opposite trolley car, or behind cover below to your left. Keep scanning the area to target attackers until the battle ends and Galahad dismounts from the trolley.

Here you can sit back and relax for a while as *The Order: 1886* takes care of some cinematic storytelling. Galahad ignores calls from Igraine to return to the palace. Instead, he confronts the rebel lieutenant and "convinces" him to reveal where his commander can be found: the Whitechapel brothel.

Soon after, Galahad makes an indiscreet return to Aux Belles Muses. Watch as he finally encounters the rebel commander...and then meets the true royalty behind the rebellion.

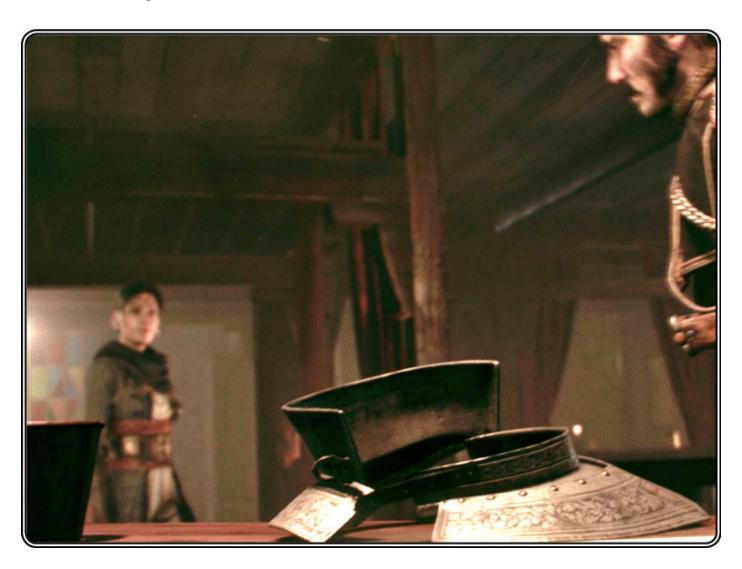

The Order 1886 © 2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Furone. All rights reserved.

Lakshmi is one reason why the rebels are better organized these days. And she delivers a disturbing message to Galahad and his Order: "We fight the same evil." The United India Company, she claims, is spreading the very scourge that the Knighthood has sworn to fight. Unsettling evidence can be found at the company's docks in Blackwall Yard. She offers to take him there.

Galahad is skeptical, but agrees to see this evidence. Yet he wants The Order left out of it. So he removes his Knight's collar and tunic before setting out.

DEAL WITH THE GUARD

site.

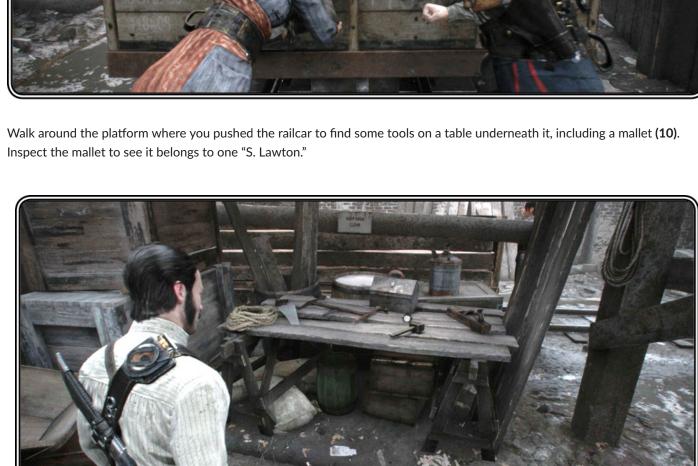

Creep up to join Lakshmi at the barrier (6) then crawl over to trigger a quick, somewhat amusing exchange with a Company guard. After he takes his rest, move on behind Lakshmi again. Continue out of the tunnel to the embankment construction

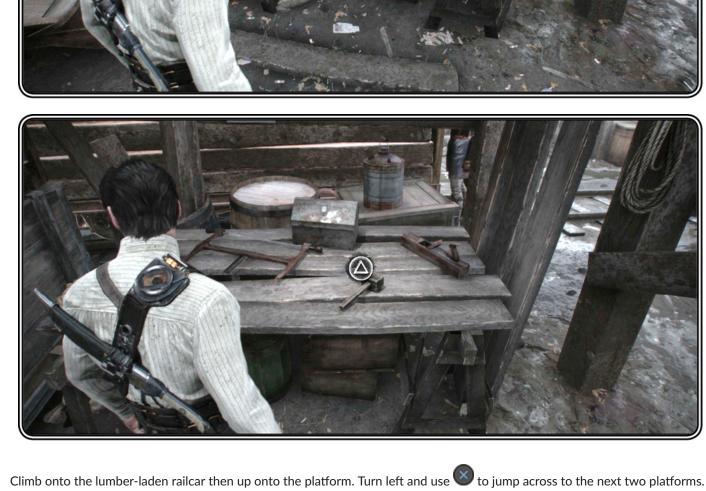

Then get behind the nearby railcar (8) loaded with wood beams and push it as far as it will go (9). From here you can climb up

the platforms, but first, find another inspectable item.

The second one (11) is narrow, only a few beams wide. Turn right on it and jump across to the platform next to the open pipe. Then climb up to the street (12). You've reached the United India Docks, Blackwall. Follow Lakshmi to the locked gate (13) leading into the yard. Then use the button prompt to trigger the next scene.

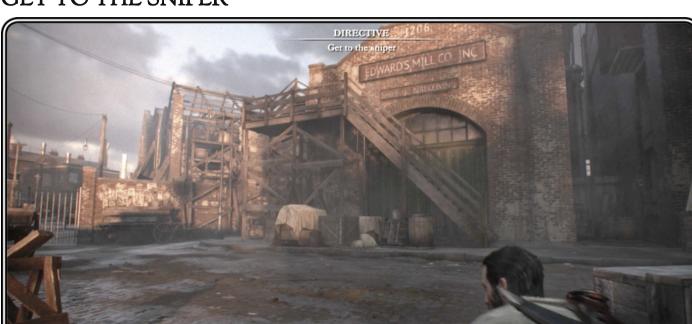

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

Galahad boosts Lakshmi over the gate, but a sniper down the street in a window of the Windham Offices building opens fire before she can pry the gate lock open.

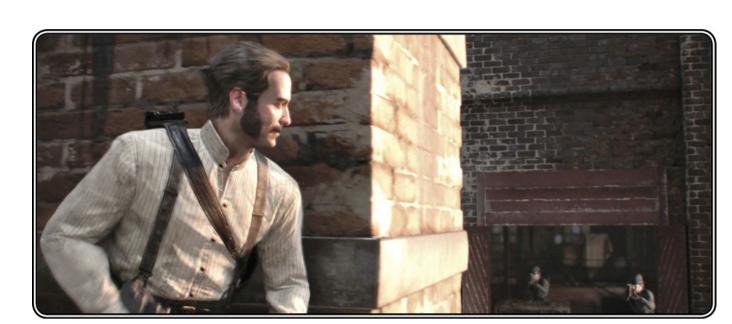

GET TO THE SNIPER

Climb the stairs of the Edward's Mill building. At the top, run across the tar roof and take cover behind the brick chimney (14) then gun down the Company guards across the gap. You can also step out and nail the guard out on the front balcony.

Down on the street, a squad of guards emerges from the ruined building to attack Lakshmi, who stays in cover. Traverse to the upper walkway (15) of the Windham Pottery barn then grab the frag grenade and M82 Carbine pickups. Climb through the open window onto the balcony, toss grenades down at the Company men threatening Lakshmi in the street, and use the newly acquired rifle to pick off survivors.

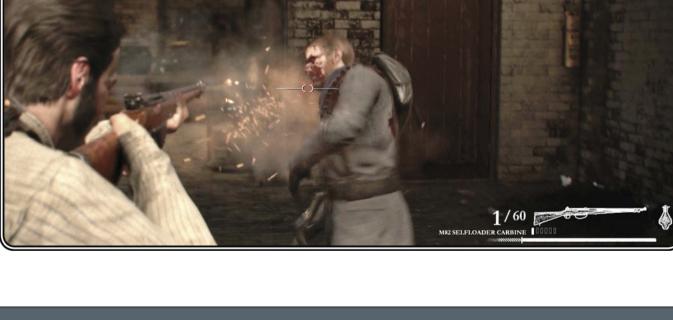

EARNED EXIT

The balcony's exit door remains closed and locked until you clear the street below for Lakshmi.

The UIC (United India Company) sniper keeps Lakshmi pinned down from his post in the next building up the street. Exit the balcony via the newly-opened door and pick off a guard who pops up from behind a crate (16) just down the upper walkway. Find another frag grenade pickup at the end of the walkway then use the gap in the railing to drop down to the second-level walkway. Grab the ammo crate (17) at the end of that walkway, turn right, take a deep breath, and drop down to the ground floor.

Dropping to the floor triggers a wild assault by Company guards who rush in the doorway from the back alley. Take cover immediately behind the pottery worktable and patiently pick off the attackers, including a shotgunner who rushes up your flank for some close-range mayhem. Target him first and find another frag grenade pickup on a nearby table (18). Then clear out the rest of the room.

This is a great place to utilize your Blacksight, especially if you've filled up your meter during the

previous engagement.

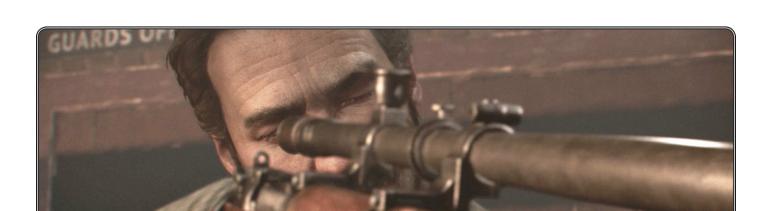

BLACKSIGHT

More guards rush into position outside in the alleyway. Take cover at the doorway (20) and pick them off one by one. (If you run low on ammo you can snag ammo boxes inside near the door (19) and outside on the work patio (21).) Push forward to

cover...because just around the corner, an armored heavy guard (22) with a Thermite rifle joins others in the attack.

ALLEY AND STREET

Fight your way from crate to crate up the back alley toward the main street. Climb the stairs (23) and jump across the gap to the platform. Jump up to grab the wall, and then traverse up again to grab the window ledge and pull yourself into the Planning

Offices building. Go to the door (24) and press the button prompts to trigger the stealth sequence: Galahad does a silent

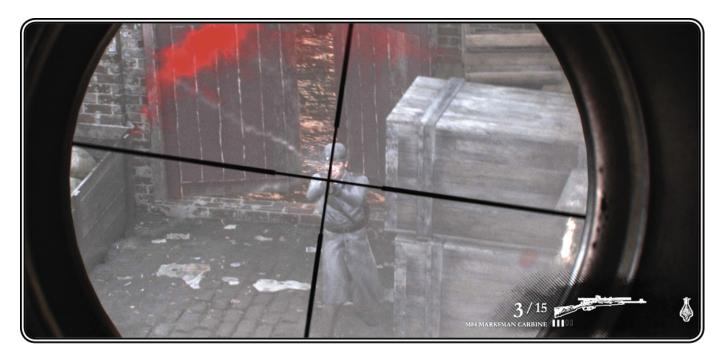

takedown of the shooter then sets up with the sniper rifle at the window (25) overlooking the yard.

HELP LAKSHMI TO SAFETY

Now your job is to protect Lakshmi from the growing horde of Company killers approaching her on the street below. (Note: You can't move from the window until the sniper sequence is over.) Once you clear the first attack wave, Lakshmi pushes forward a few crates until a second wave attacks. Clear the yard again! Be sure to target the explosive barrel (B) to inflict extra damage. Lakshmi pushes forward again. One last squad of attackers rushes into the yard. Once you clear this third wave, Lakshmi advances all the way to the Foundry entrance.

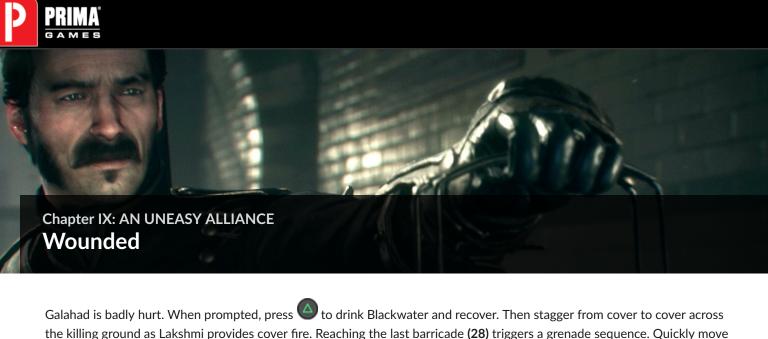

Open the next door (26) to trigger a cinematic action sequence: a Company guard ambushes Galahad on the balcony. Quickly press when the prompt appears as the guard makes a knife attack. The men crash through the railing and slam to the ground (27).

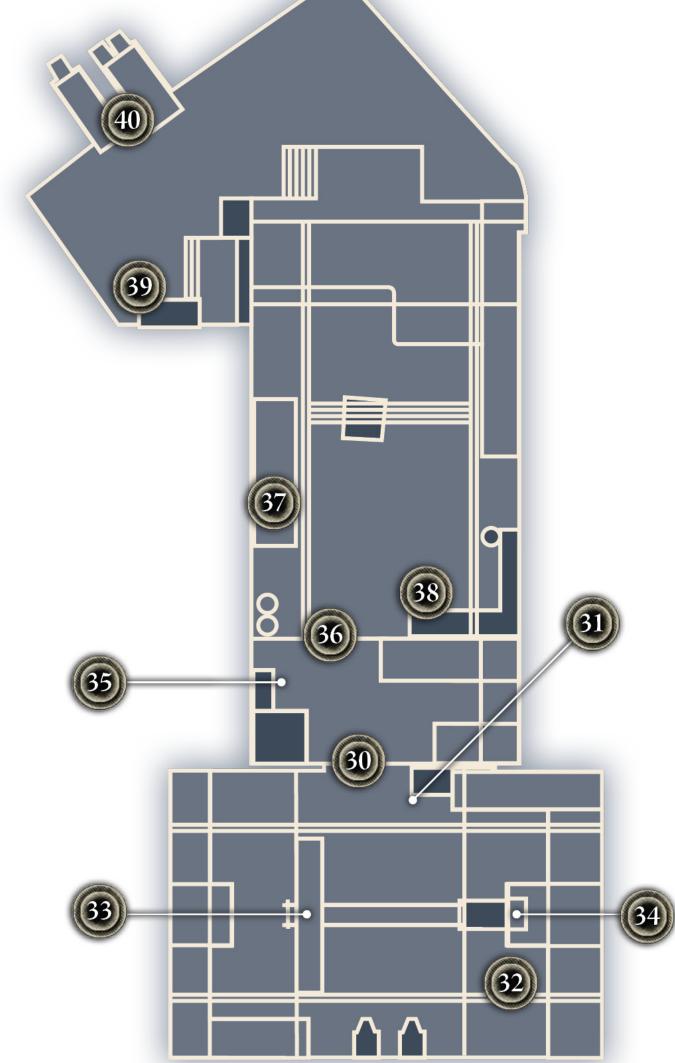

the killing ground as Lakshmi provides cover fire. Reaching the last barricade (28) triggers a grenade sequence. Quickly move the targeting reticle over the live grenade's icon and then press to toss the grenade back at the guards. Galahad automatically stumbles to safety through the foundry entrance (29) as Lakshmi slams the security door shut behind him. Safe...

Watch as Devi, Lakshmi's second in command, reports on the Company cargo bound for the Americas and the West Indies. Note that Devi calls Lakshmi "Rani," the name for a Hindu queen. As the trio spies through the gate, they spot Lord Hastings. When Galahad notes that Hastings is often at the Council, Lakshmi replies, "How convenient for him." As the Knight moves away, Devi questions his trustworthiness, but Lakshmi says that "the scientist" vouches for him—meaning Tesla, no doubt.

DRY DOCK SHIP AND JOINER'S SHOP

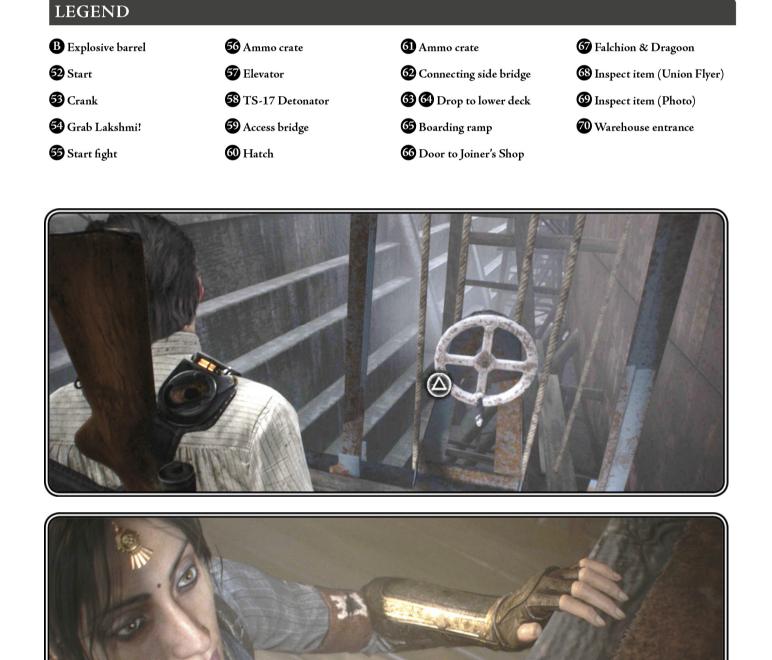

(65)

66

Jump across two platforms to the hoist crank (53) and turn it to raise that platform. Then approach Lakshmi and press 🔷 to

boost her up so she can scout the situation.

67

Hop across the platforms along the ship's hull. On the second jump, be ready for a quick action event: Galahad reaches the platform (54), then Lakshmi jumps. As she flies through the air you must use the right stick to move your targeting reticle over the icon on her reaching hand to activate a prompt. Press Quickly when the prompt appears to catch Lakshmi and pull her

Both characters quietly crawl up onto the ship's top deck, but guards spot them and call out a warning to Lord Hastings'

You start out behind cover (55) with an M84 Marksman Carbine sitting on the stack right in front of you. You can use it now to snipe targets on the top deck. But another good option is to use your secondary weapon with Blacksight to clear the top deck, and then grab the sniper rifle for two purposes: first, to pick off the sniper firing down at you from the crane, and second, to

HELP LAKSHMI DESTROY THE CRATES

Warehouse: Side

Galahad and Lakshmi move into the next room of the warehouse. Follow Lakshmi to the crate in the corner (74) and light it by holding down after she douses it with fuel. Follow Lakshmi across the aisle and repeat the same process at (75). Soon this section of warehouse is an inferno.

Now follow Lakshmi to the high ledge (76) and press the button prompt to boost her up to the next level of the warehouse. She drops down a ladder; use the prompt to climb up.

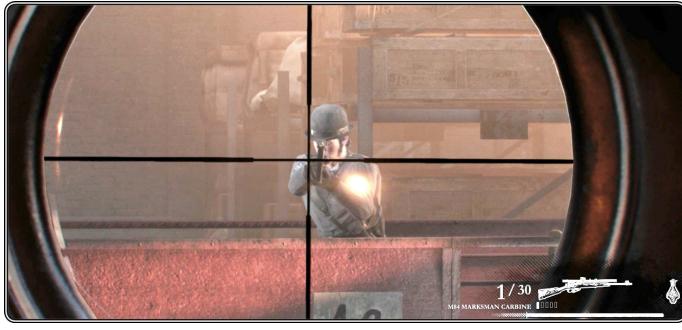

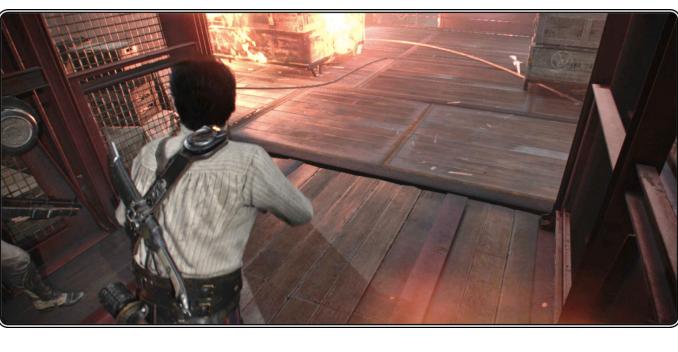

Warehouse: Upper

While Lakshmi douses another crate (77) in fuel, use the time to pick up a full set of frag grenades by the nearby weapons crate. When she's ready, light the marked crate. This triggers a quick scene: guards suddenly burst in via the catwalk across the warehouse. Galahad tells Lakshmi to finish burning the cargo while he holds off the attackers. Then he takes a position behind cover along the railing.

Start shooting! Toss plenty of grenades—your refills are unlimited from the supply in the crate. The first wave of Company men stays on the opposite catwalk, shooting and tossing their own grenades at you. If you run low on ammo you can find an ammo crate in the elevator (78).

When you finally clear the catwalk of guards, Lakshmi reports more crates down on the ground level that must be destroyed. Follow her into the elevator. She automatically pulls the lever and you ride down to the main floor.

Warehouse: Lower

More guards flow onto the far catwalk the moment the elevator arrives on the main floor. Rush forward to cover behind one of the crates (79) and defend Lakshmi as she finishes the work of roasting vampires. This time Company shotgunners drop to the floor and rush your position, so don't get too focused on the catwalk shooters.

After about a minute, a very tough armored heavy takes up a position on the catwalk with a TS-17 Detonator and starts raining

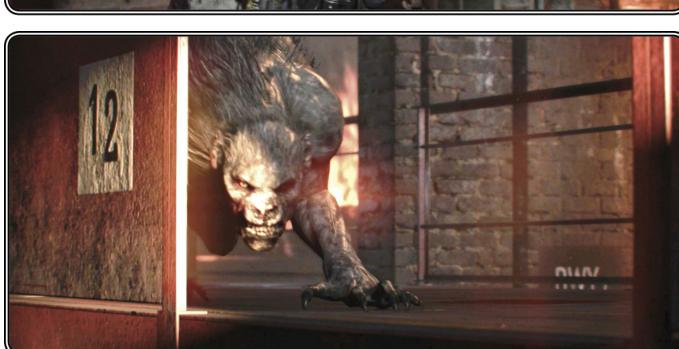

explosive mines on you. Watch for the glowing red X-icon and hustle away if one lands near you. (Remember, you can shoot explosives in the air if you have Blacksight available and you're really good.) This heavy can take a lot of punishment, so give him plenty of targeting attention until he drops. When the last Company guard finally falls, you trigger a new scene.

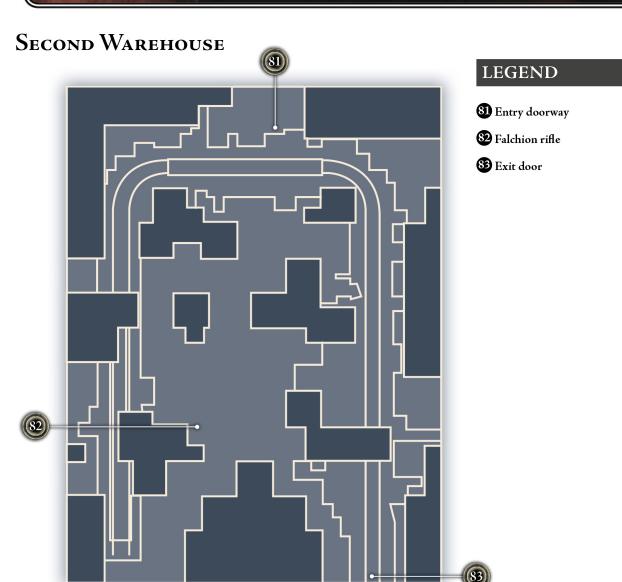

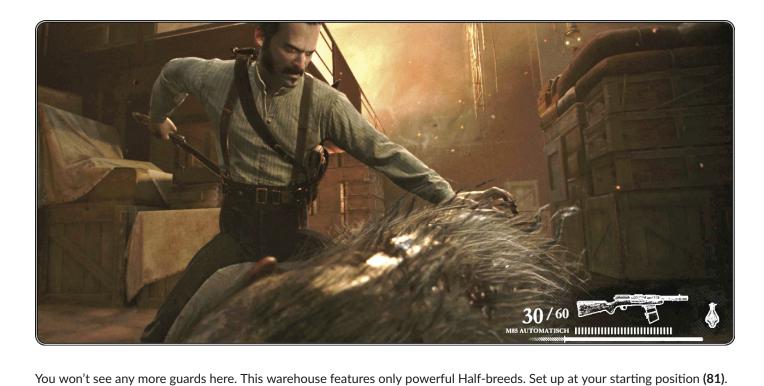

Lakshmi rushes to immolate one more crate and reports that's the last of them. But the exit door (80) is locked...and worse, an angry Lycan appears on the far catwalk! Galahad and Lakshmi barely escape into the next warehouse.

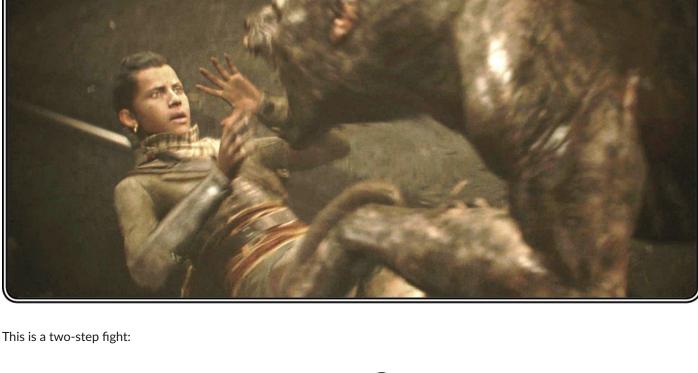

The Lycans come one after another in fairly quick succession from any direction. Wield your Falchion and knock each charging Lycan back with your secondary fire concussive blast, and then immediately switch to primary fire until the beast falls wounded. Rush to any fallen Lycan and press to administer the finishing blow with your blade. Be ready to start tapping

rapidly if a Lycan gets Galahad in its grip.

There aren't any ammo crates in this area. But there is a Falchion rifle (82) near the middle of the warehouse that you can use

Once you've killed two Lycans, Lakshmi cries out that she's found a door, and a cutscene plays. Get ready for an action event! Galahad and Lakshmi hear Devi calling beyond the door (83). Suddenly it bursts open with Devi in the grips of a howling Lycan.

• First, Galahad gets the monster in a headlock. Start tapping appidly until Devi rushes in and stabs the Lycan. The beast knocks Galahad aside and turns its attention back to Devi.

for pickup ammo, if needed.

Hurry! Swiftly pull that trigger to blast the Lycan and wound him. Then Devi finishes the job.

• Next, use your right stick to quickly move the targeting reticle over the action icon until the

prompt appears.

The Eighteenth Day of October, 1886

Shaken and angry by what he's found in the Blackwall Yards shipping warehouse, Galahad decides it's time to get to the bottom of United India Company's unholy plan. The obvious place to start is the very agency founded to prevent just such a thing: the Council of Knights.

The confrontations begin just outside the Council chambers, where Lady Igraine accuses Galahad of shady dealings at Whitechapel. (She calls it "some kind of clandestine infiltration," a nice British way of saying "sneaking around like a thief.") When Igraine softens a bit and asks him to share what he knows, Galahad hardens and tells her to back off.

Inside the chamber, Galahad's attempt to present his findings to the Lord Chancellor are met with derision and dismissed out of hand. But although Sir Lucan agrees that the allegations seem extreme—and that proof (given the all-consuming fire) is nonexistent—he agrees to support Galahad's plan to breach the United India House under cover of night.

Suddenly, Lakshmi notices that her man Finley is missing. Odd noises emanate from a nearby office (53)—its door is ajar,

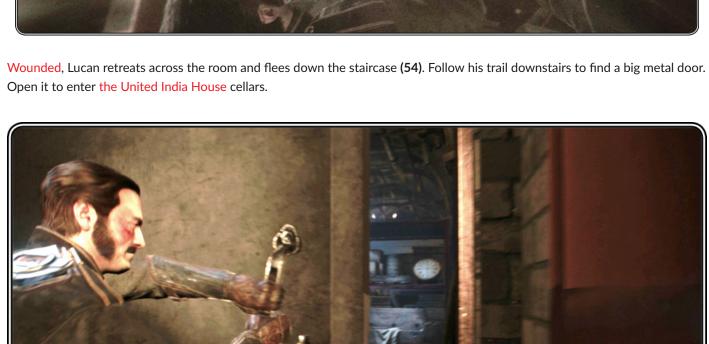

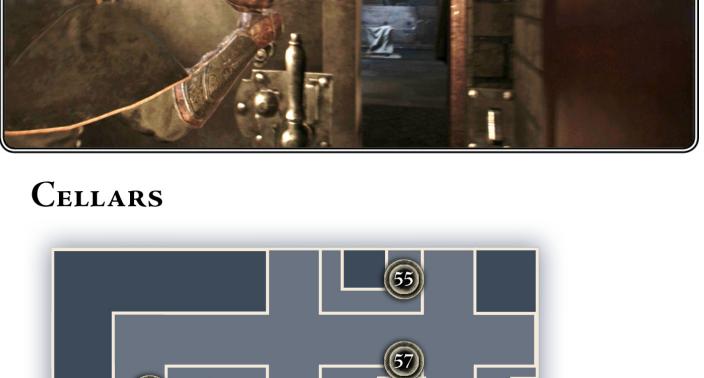

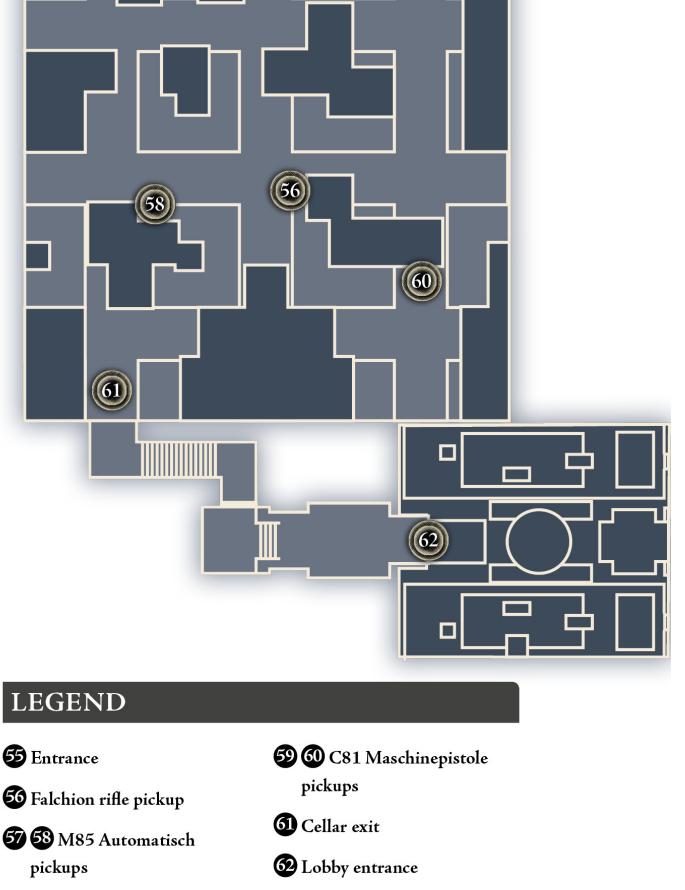

Now Lucan attacks Galahad. Be ready with your controller again! In the struggle, the Knights smash through the nearby bannister and crash to the lower level. Lucan pins Galahad and rears back to strike him. Hit when the prompt appears: Galahad dodges the punch then draws Lucan's blade and slashes him.

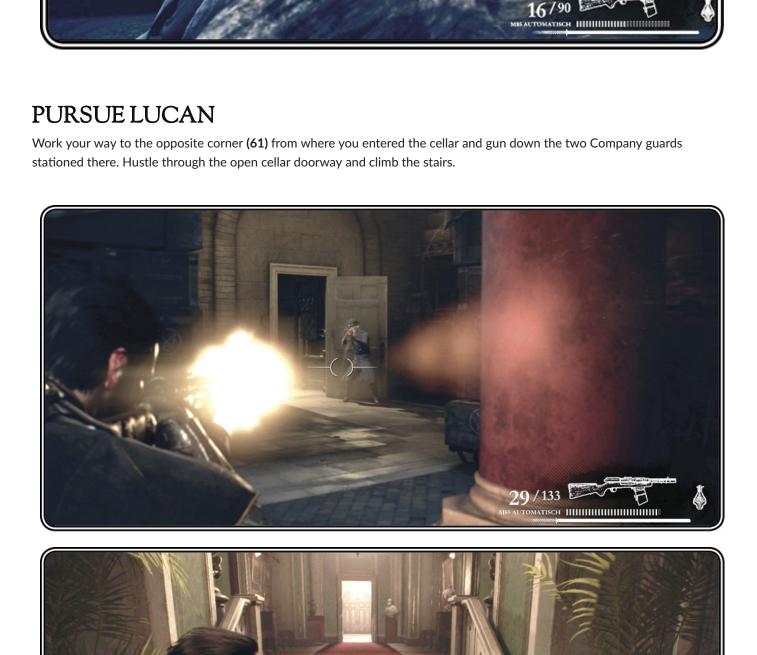

(57,58) and two C81 automatic pistol pickups (59,60). With the Falchion, use _____ to knock back attacking Lycans, wound them with primary fire, and then finish them off with your blade by pressing . After you kill three Lycans, you get a new directive.

ELIMINATE THE LYCANS

Time for another Lycan battle! You know the mechanics by now. You can find a Falchion rifle with its concussive blast secondary fire in the middle of the cellar (56). Other weapons are scattered about as well—two M85 assault rifle pickups

• Quickly press the button when the prompt appears to counter Lucan's first attack. (If you mis-time your press, the face-slam is grisly.) Galahad kicks off the railing, draws his blade and runs it through his foe.

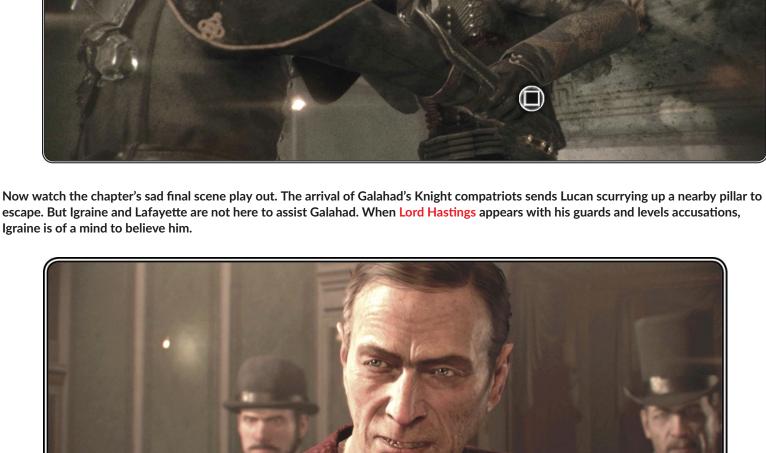

slam his face into the stone railing.

Upstairs, when you step through the doorway (62)into the main lobby, you trigger a scene: Lucan assaults Galahad and tries to

But Lucan's strength is formidable, and his inner nature suddenly bursts forth. Quickly press the utton when the prompt

appears. Galahad manages to avoid death, but not by much.

Chapter XII: A TRAITOR AMONGST US Scene: The Trial

The Twentieth Day of October, 1886

Everything after the game's Prologue has been, in essence, a flashback: the backstory. Here, one last bit of "history" is presented—Galahad's kangaroo court trial—and then The Order: 1886 brings us back to the grim present, to the reality that hits like an ice-cold dunking.

A shackled Sir Galahad kneels in abject humiliation before his brethren, the Council of Knights. Witnesses present the evidence against him: Igraine, Lucan, and yes, even the oily Lord Hastings himself.

Despite the gravity and truth of what Galahad knows, he is given no opportunity to present a defense, or to even speak. In solemn succession, Knight after Knight—including his oldest, most loyal friends—finds Galahad guilty of treason. Then the Lord Chancellor renders the verdict.

Now you see an impressionistic recap of the events of the Prologue: incarceration, torture, escape, and Galahad's desperate, final plunge from the palace ramparts into the Thames. As the montage ends, we're brought to the present moment, and time moves forward again.

November-December, 1886

This chapter begins just moments after Galahad's dive into the river. Its lone scene serves as a narrative bridge to the story's final, fatal confrontation.

This hallucinatory sequence of images shows us Galahad's rescue and recovery at the hands of Nikola Tesla and the shadowy, hooded older gentleman—the same man we saw earlier in surreptitious consultation with Sebastien Malory, the previous Sir Perceval. Also making an appearance in the safehouse is the Indian queen, Lady Lakshmi. The recovery ordeal begins.

After nearly a fortnight, on December 2, Galahad finally makes a breakthrough to full consciousness. Lakshmi explains that the safehouse is on the Thames Embankment, north of the river. But the authorities are scouring the area, and it's time to move on. She will accompany him back to Whitechapel, the headquarters and heart of the rebel resistance.

Nikola has left him his gear and Knight's regalia...as well as a vial of stolen Blackwater.

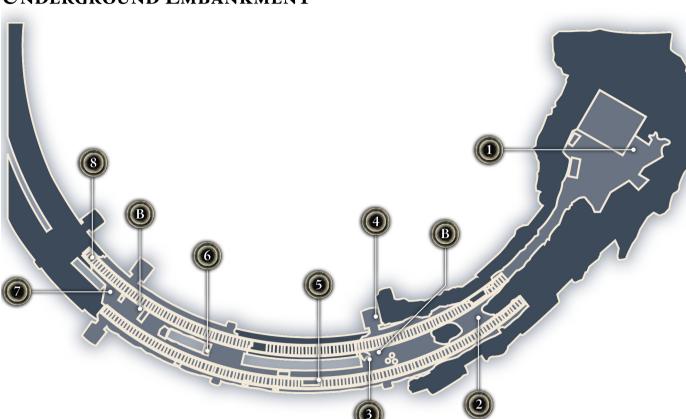

The Second Day of December, 1886

Galahad begins his road to reclamation with a "tactical retreat" to Whitechapel via the Thames underground embankment. Armed at first with just his Duelist revolver, he must fight through dark passages patrolled by United India Company mercenaries.

Underground Embankment

2 Guards attack

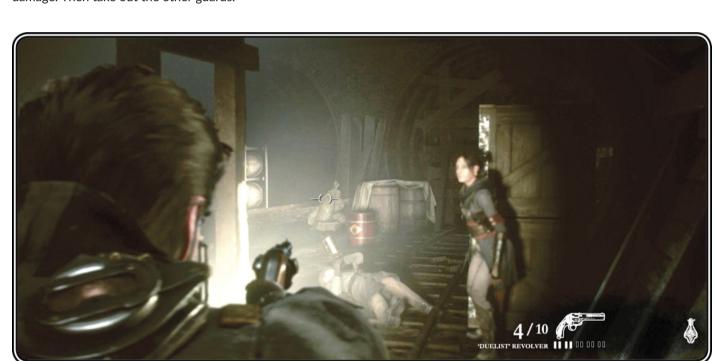

6 7 Ammo crates

3 Ammo crate

8 Exit

ESCAPE TO WHITECHAPEL

As the short journey begins (1), Lakshmi reveals her Blackwater source: Sir Bors de Ganis, a Knight whose origins trace back to the search for the Holy Grail. (According to Arthurian legend, Sir Bors sought the Holy Grail with Galahad and Perceval.) Proceed down the first dark, narrow stretch until the passage opens up to a second track (2) and you hear voices up ahead. Three Company guards open fire. Target the explosive barrel (B) up the righthand tunnel (just left of the track) to inflict some damage. Then take out the other guards.

After you eliminate the first crew, swap to the Dragoon revolver (3) sitting on a side room table then grab the ammo crate (4). You hear another Company squad advancing up the left tunnel. Look for their approaching lantern lights as they slide around the rail cart (5).

Continue past the cart up the left tunnel. You can find another ammo crate (6) where the tunnel opens up to two tracks wide again. Slide sideways to the righthand track and prepare for one more wave of five Company guards. Target another explosive barrel just up the tracks, and look for one more ammo crate (7) if you need it.

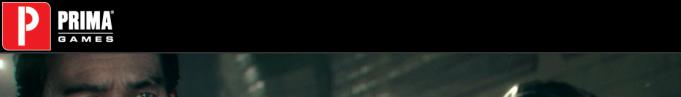

watch as Lady Igraine bursts into the safehouse with an escort of royal soldiers. Her anguish at the clear signs of Galahad's suffering is counterbalanced by the fury of her hatred for the Rebellion.

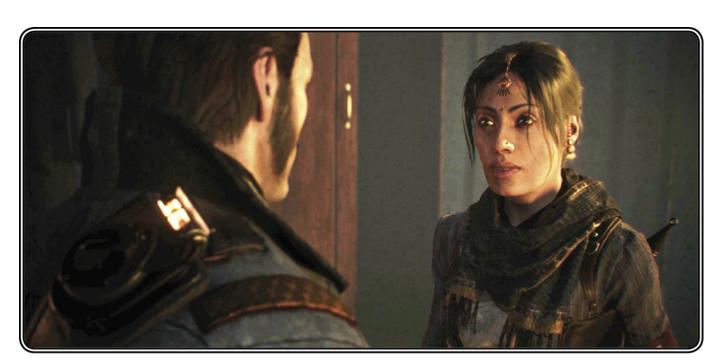

Chapter XIV: A KNIGHT OF OLD

Separate Ways

Upon arrival at Aux Belles Muses, Lakshmi orders the establishment vacated. Assuming that Galahad is now part of her coalition, she prepares to flee with him. As she says, Whitechapel must be evacuated before the authorities conduct a more brutal housecleaning.

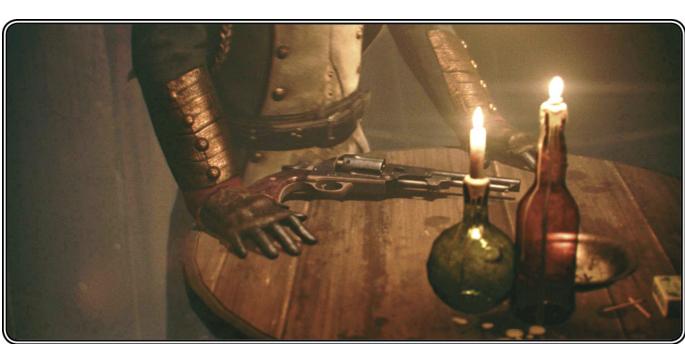

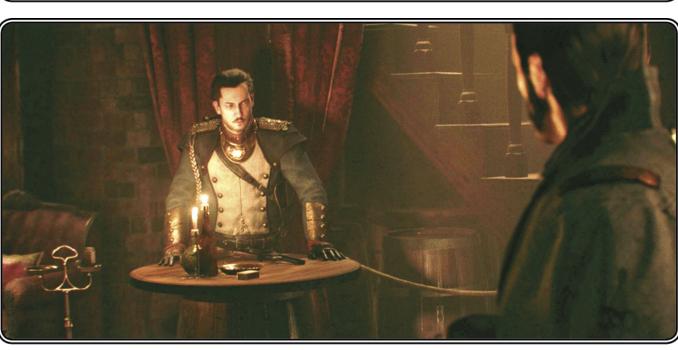

But Galahad announces that he has unfinished business at the Palace. Nikola must be saved; he is owed that much. And the good Sir Lucan, Alistair D'Argyll, will be expecting him. Galahad does not wish to disappoint. Lakshmi offers to accompany him, but this job is Galahad's alone.

However, the Knight does have unexpected moral support. Downstairs, a former student pays his mentor the benefit of the doubt. As he says, "Two revolutions have taught Lafayette that there are dangers on both sides."

LEGEND

7 Drop here from hatch

8 Frag grenade pickup

Take cover here

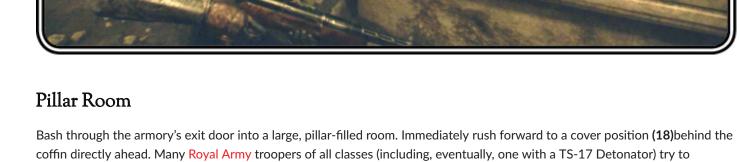

Exit this dead end and veer left to take the wooden walkbridge (13) that spans an underground waterway. Get ready as you

approach the doorway (14) on the bridge's far end. The moment you step through it, an ambush unfolds.

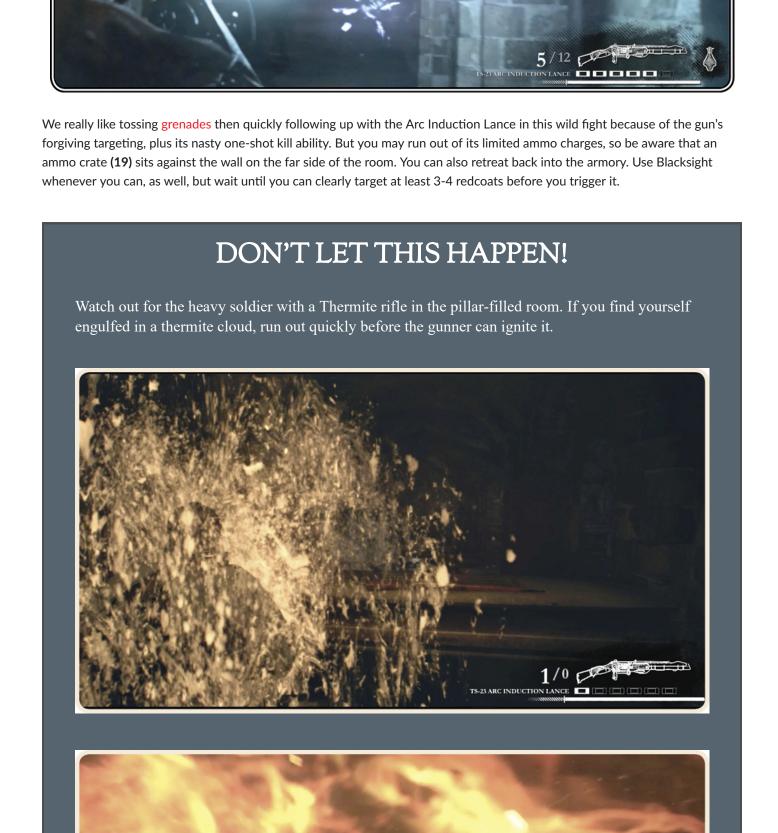

CATACOMB ARMORY

overrun you in this room. The pillars provide plenty of cover for the enemy. Although most of the shooters lean around pillars

in the room's center aisle, a few try to sneak up the outside aisles and flank you.

Now follow the corridor as it curves around and climbs upstairs to a tomb-lined passage that also happens to be a very wellstocked armory (17). The cache includes an ammo crate, both types of grenades, and some very good guns: an Arc Induction Lance, an M2 Falchion rifle, a Dragoon pistol, and others. Trust us, you'll need very good guns in the next space.

Later in the fight, an armored heavy soldier armed with a Thermite rifle joins the fray. Focus your full attention on him until you drop him. Thermite can make your life miserable, even if you're behind good cover. When the room is finally clear, make the rounds to pick up weapons/ammo. Picking up the Thermite Rifle is a good option, as it comes in handy for an upcoming battle. Now take the southern exit (20). Follow the passage to the next open room (21).

This chamber is less hectic but tough nonetheless. Walkways run in a rectangular route around the construction of a sewer drainage channel. Soldiers lay down a blistering fire on your position from the walkway across the channel. Keep an eye out for

When the walkways are finally cleared, exit into the corridor beyond (22). Veer left at the first fork and right at the second fork

two explosive barrels (B) that can help you thin their ranks more quickly.

as you hear Lucan's arrival at Tesla's lab over your communicator.

Sewer Room

23/150

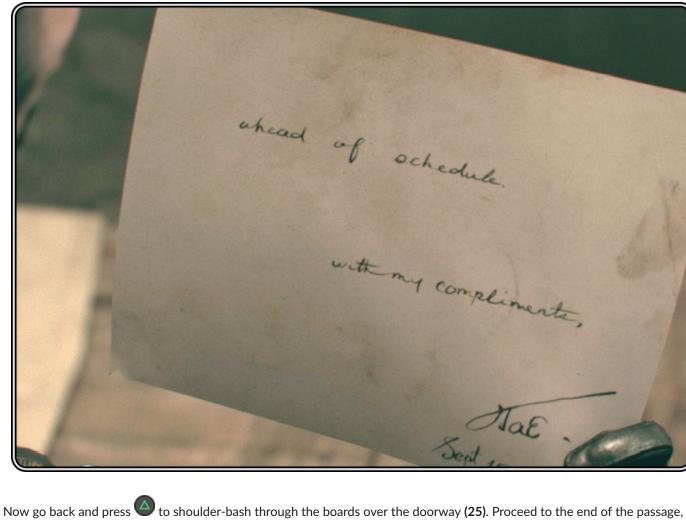

Because part of our job as a strategy guide is to relieve your stress, we'll tell you here that although Alistair's chilling tone with Nikola adds a sense of urgency to your trek through the Catacombs, don't worry—this is not a timed game sequence. Turn left at the next fork (23) and follow the tunnel into another pillar-lined room.

Note the action icon on the boarded-up doorway, but don't approach it yet. First, veer into the alcove to the right and inspect the photograph (24) sitting on the wooden crate. It depicts a "Cargo Delivery, Westminster Catacomb."

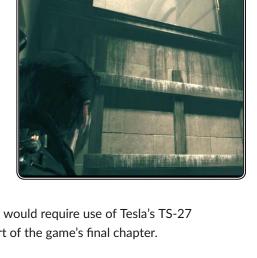

turn left, and traverse up the wall (26) to the opening. You're almost there!

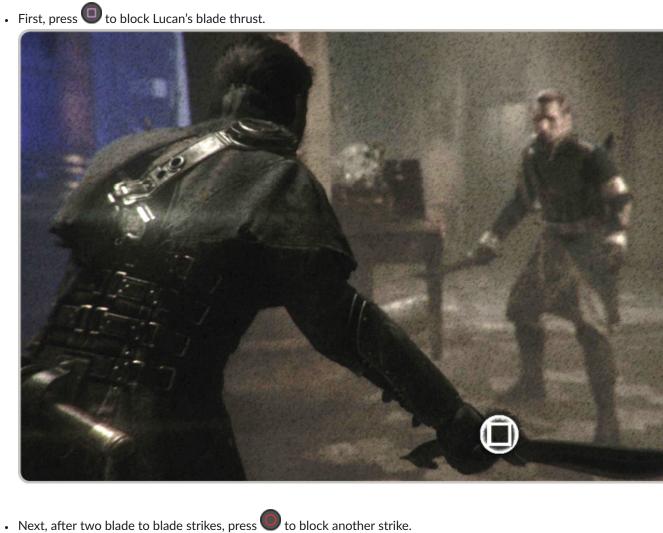

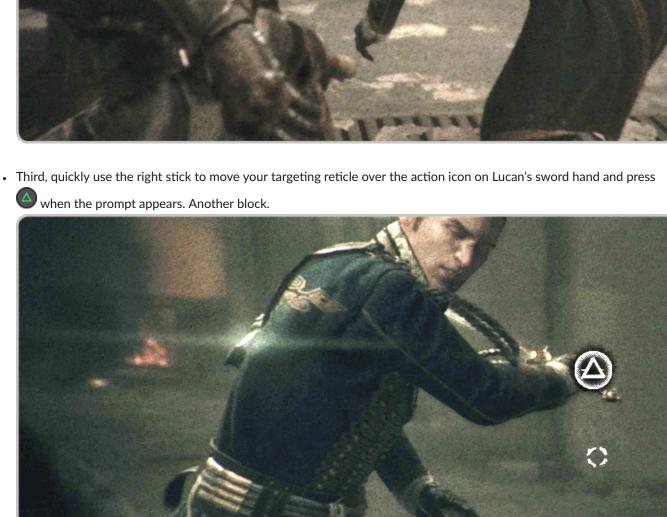

The Order 1886™ ©2014 Sony Computer Entertainment America LLC. Published by Sony Computer Entertainment Europe. Created and Developed by Ready At Dawn LLC. "The Order" is a trademark or a registered trademark of Sony Computer Entertainment Europe. All rights reserved.

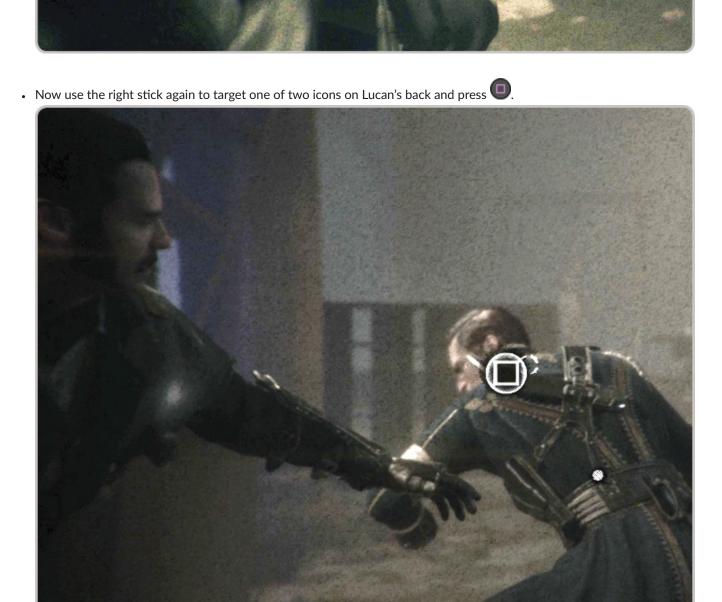

Galahad helps Nikola to a safer position outside the lab. Then he proceeds into the darkened lab to meet his "brother." Get

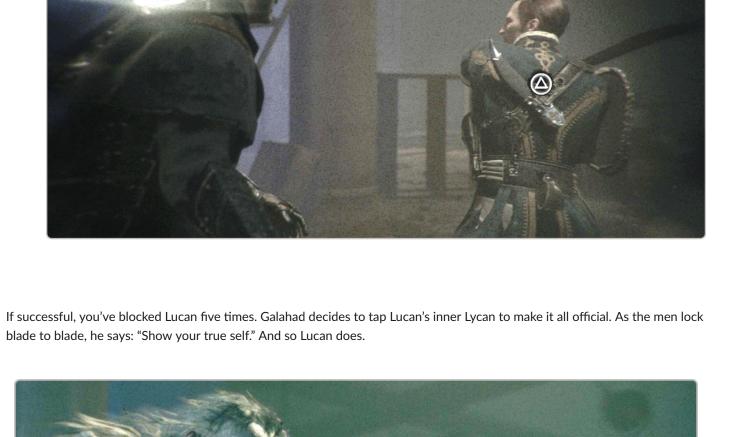

ready for the final boss battle.

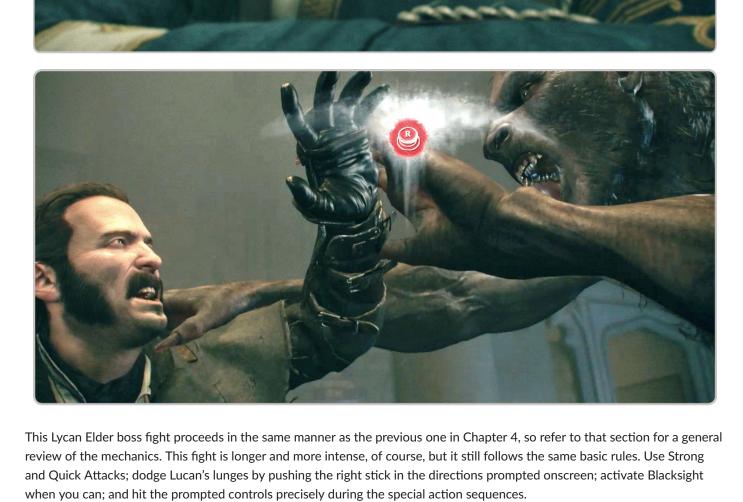

• Finally, press \times when the prompt appears.

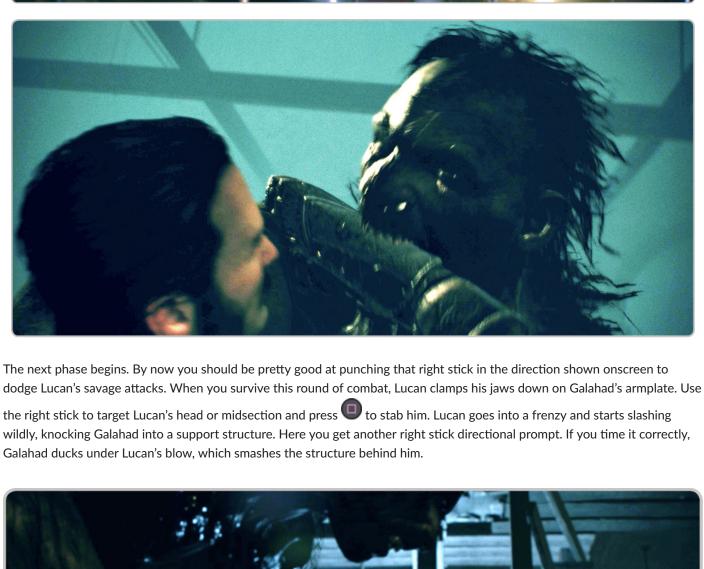

If you survive the first-phase exchange of blows, Lucan slams Galahad facedown onto the floor. Use the right stick to target Lucan's chest and hit uto slash your blade across his face. Lucan flings Galahad across a workbench, shattering test tubes,

beakers, and other equipment.

Now you get one more round of basic combat. If you're dodging Lucan's blows successfully and parrying with your own thrusts, your foe is losing strength. Look for an action icon on the floor, marking a wood plank from the smashed structure. When it changes to a button prompt, push the button indicated to grab the plank and hammer Lucan with it. After you land just a few more strikes, Lucan tackles Galahad and drives him backward, shattering scaffolding and pinning him against a pillar. During this time a flashing prompt is calling you to tap that button rapidly. When you do, Galahad stabs wildly at the beast, driving him

Lucan finally falls, but recovers enough for one more lunge, knocking Galahad's blade to the floor. Tap again to

reach for the blade. When Galahad finally grabs it, he rams home the final attack.

Here's your final action: After the battle, the former Knight brethren try to make sense of things. And then, to complicate matters, Sir Lucan's father appears. The Lord Chancellor explains the family history, then hands one final unpleasant task to Galahad...

PULL THE TRIGGER

Don't worry—there's no alternate way to end the game other than the obvious choice.

You can watch the credits roll now, or check them out after triggering a brief epilogue of sorts...
